

Contents

Preface	v
1 Introduction <i>by Athanase Papadopoulos</i>	1
2 Café conversations <i>by Athanase Papadopoulos</i>	29
3 Learning about dynamics, Kleinian groups, quasiconformality, and period doubling universality: Orsay Chapter <i>by Dennis Sullivan</i>	53
4 My mathematical world <i>by Valentin Poénaru</i>	61
5 Le Diable, le Bon Dieu et la Sphère Dimension n <i>by Alexey Sossinsky</i>	67
6 Super Hyperbolic Law of Cosines: same formula with different content <i>by Robert Penner</i>	73
7 The topological types of length bounded multicurves <i>by Hugo Parlier</i>	97
8 A recipe for the dilatation of families of pseudo-Anosov braids <i>by Saadet Öykü Yurttaş</i>	111
9 ℓ^2-stability and homomorphisms into the mapping class group <i>by Marc Burger and Alessandra Iozzi</i>	127
10 Heisenberg homology of ribbon graphs <i>by Christian Blanchet</i>	141

11 Quasicircles and Dirichlet finite harmonic functions on Riemann surfaces	155
<i>by Hiroshige Shiga</i>	
12 Universal degeneration of Riemann surfaces and fibered complex surfaces	179
<i>by Tadashi Ashikaga and Yukio Matsumoto</i>	
13 Surface bundles in 3-dimensional topology	263
<i>by Ken'ichi Ohshika</i>	
14 The complex of incompressible surfaces of a handlebody	291
<i>by Charalampos Charitos</i>	
15 Reversibility and real adjoint orbits of linear maps	313
<i>by Krishnendu Gongopadhyay, Tejbir Lohan, and Chandan Maity</i>	
16 Invariant Seifert surfaces for strongly invertible knots	325
<i>by Mikami Hirasawa, Ryota Hiura, and Makoto Sakuma</i>	
17 Minor theory for quasipositive surfaces	351
<i>by Sebastian Baader, Pierre Dehornoy, and Livio Liechti</i>	
18 The Alexander polynomial as a universal invariant	359
<i>by Rinat Kashaev</i>	
19 Alexander polynomials and signatures of some high-dimensional knots	377
<i>by Eva Bayer-Fluckiger</i>	
20 Refined Bobtcheva–Messia invariants of 4-dimensional 2-handlebodies	387
<i>by Anna Beliakova and Marco De Renzi</i>	
21 Conic singularities and immediate transversality	433
<i>by François Laudenbach</i>	
22 Honda–Huang’s work on contact convexity revisited	453
<i>by Yakov Eliashberg and Dishant M. Pancholi</i>	
23 Rambling around the Milnor fiber	493
<i>by François Loeser</i>	

24 Singular fibrations over surfaces	515
<i>by Louis Funar</i>	
25 Presentation of the fundamental groups of complements of shadows . .	557
<i>by Masaharu Ishikawa, Yuya Koda, and Hironobu Naoe</i>	
26 A'Campo type equations and integrals with respect to the Euler characteristic	589
<i>by Sabir M. Gusein-Zade</i>	
27 Almost non-degenerate functions and a Zariski pair of links	601
<i>by Mutsuo Oka</i>	
28 The Milnor fiber conjecture of Neumann and Wahl, and an overview of its proof	629
<i>by Maria Angelica Cueto, Patrick Popescu-Pampu, and Dmitry Stepanov</i>	
29 Singularities and clusters	711
<i>by Vladimir V. Fock</i>	
30 Deformations of Lebesgue's measure on the boundary of the Farey tree	723
<i>by İsmail Özkaraca and Muhammed Uludağ</i>	
31 Birational maps and Nori motives	761
<i>by Noémie C. Combe, Yuri I. Manin, and Matilde Marcolli</i>	
32 Dwork-type congruences and p-adic KZ connection	781
<i>by Alexander Varchenko</i>	
33 Temperley–Lieb–Jones category and the space of conformal blocks . .	813
<i>by Toshitake Kohno</i>	
34 Timelike Hilbert geometry of the spherical simplex	847
<i>by Athanase Papadopoulos and Sumio Yamada</i>	
35 The single intuition of a move of time	871
<i>by Victor Pambuccian</i>	
36 Continuity and discontinuity in, and between, mathematics and physics	883
<i>by Arkady Plotnitsky</i>	

**37 Zeno’s arguments and paradoxes are *not against* motion and
multiplicity *but for* the separation of true Beings from sensibles 949**
by Stelios Negrepontis
