Greetings	4
Foreword	5
Contents	6
I. Introduction	9
II. Materials & Methods	14
Habitats	14
Sampling	14
Extraction = separation from the substrate	16
Light Microscopy (LM) and epifluorescence	17
Fixation and Electron Microscopy (EM)	18
Culturing	19
Quantification	19
Molecular Genetic Methods of Detection and Quantification	20
Toxicity tests and toxin analyses	22
III. Taxonomy	23
<i>Adenoides</i>	23
<i>Aduncodinium</i>	26
<i>Ailadinium</i>	28
<i>Alexandrium</i>	30
<i>Amphidiniella</i>	32
<i>Amphidiniopsis</i>	34
<i>Amphidinium</i>	55
<i>Ankistrodinium</i>	70
<i>Ansanella</i>	72
<i>Apicoporus</i>	74
<i>Bindiferia</i>	76
<i>Bispinodinium</i>	78
<i>Blixaea</i>	80
<i>Bysmatrum</i>	83
<i>Cabra</i>	91
<i>Caladoa</i>	94
<i>Carinadinium</i>	96
<i>Ceratocorys</i>	100
<i>Chiharadinium</i>	101
<i>Chrysodinium</i>	104
<i>Coolia</i>	105
<i>Coutea</i>	116
<i>Dinotherix</i>	116
<i>Durinskia</i>	120
<i>Fukuyoa</i>	124
<i>Gambierdiscus</i>	127
<i>Glenodinium</i>	140
<i>Gymnodinium</i>	141
<i>Gyrodinium</i>	146
<i>Halostylodinium</i>	151
<i>Herdmania</i>	152
<i>Heterocapsa</i>	154
<i>Katodinium</i>	155
<i>Laciniporus</i>	157
<i>Madanidinium</i>	160
<i>Moestrupia</i>	160

<i>Nusuttodinium</i>	162	<i>Pyramidodinium</i>	222
<i>Ostreopsis</i>	165	<i>Rhinodinium</i>	224
<i>Pachena</i>	179	<i>Roscoffia</i>	228
<i>Paragymnodinium</i>	181	<i>Sabulodinium</i>	229
<i>Pellucidodinium</i>	183	<i>Sinophysis</i>	231
<i>Pentaplacodinium</i>	184	<i>Speroidium</i>	240
<i>Pileidinium</i>	185	<i>Spiniferodinium</i>	241
<i>Plagiodinium</i>	187	<i>Stylodinium</i>	244
<i>Planodinium</i>	188	<i>Symbiodiniales</i>	246
<i>Polykrikos</i>	190	<i>Testudodinium</i>	246
<i>Prorocentrum</i>	192	<i>Thecadinium</i>	250
<i>Psammodinium</i>	216	<i>Togula</i>	255
<i>Pseudadenoides</i>	218	<i>Vulcanodinium</i>	258
<i>Pseudothecadinium</i>	220		

IV. Phylogeny and systematics	260
Phylogeny of the morphological adaptations	260
<i>Amphidinium</i>	261
<i>Amphidiniopsis</i> , <i>Archaeoperidinium</i> , <i>Herdmania</i> – Peridinales	262
<i>Cabra</i> , <i>Rhinodinium</i> , <i>Roscoffia</i> – Podolampadaceae	263
<i>Gonyaulacales</i>	263
<i>Prorocentrum</i> & <i>Pseudadenoides</i> / <i>Adenoides</i>	266
<i>Sinophysis</i> & <i>Sabulodinium</i>	267
Dinotoms' – <i>Blixaea</i> , <i>Dinothrix</i> , <i>Durinskia</i>	267
Dinoflagellate taxa with cryptophyte-(klepto)chloroplasts – <i>Nusuttodinium</i>	268
The phytodinialean dinoflagellates ('Phytodiniales')	268

V. Toxins of benthic dinoflagellates and benthic harmful algal blooms	269
Introduction	269
<i>Gambierdiscus</i> & <i>Fukuyoa</i>	270
<i>Ostreopsis</i>	279
<i>Coolia</i>	282
<i>Prorocentrum</i>	286
<i>Amphidinium</i>	291
<i>Alexandrium</i>	292
<i>Durinskia</i>	292
<i>Vulcanodinium</i>	293

VI. Relevance for science and society	295
Important areas for basic research	295
1. General dinoflagellate evolution	295
2. Chloroplast evolution in (benthic) dinoflagellates	296
3. Nutritional supplements and natural products from benthic dinoflagellates	299
4. The genetics and evolution of dinoflagellate toxicity	300
Health, social and economic impacts	301
<i>Ostreopsis</i> and palytoxins	301
<i>Gambierdiscus</i> and ciguatoxins	304
<i>Vulcanodinium</i> and pinnatoxins	308
<i>Prorocentrum</i> and okadaic acid	309
Impacts of BHABs on marine biota	310
Conclusions	311
References	312
Taxonomic index	363
Acknowledgements	369
Useful web pages	371
Picture credits	372
Authors' Addresses	373
Imprint	376
