Preface — v

List of contributing authors — xi

Hidetaka Furuya

- 1 Dicyemida — 1**
 - 1.1 Introduction — 1
 - 1.2 Life cycle — 1
 - 1.3 Body organization — 2
 - 1.4 Species diversity of dicyemids — 2
 - 1.5 Development of embryos — 3
 - 1.5.1 Infusoriform embryos — 3
 - 1.5.2 Vermiform embryos — 4
 - 1.6 Gametogenesis in hermaphroditic gonad — 4
 - 1.7 Reproductive strategy in the renal organs — 7
 - Literature — 8

George S. Slyusarev

- 2 Orthonectida — 11**
 - 2.1 Introduction — 11
 - 2.2 Morphology of free-living females and males — 11
 - 2.2.1 General and external morphology — 11
 - 2.2.2 The structure of epithelial cells — 13
 - 2.2.3 The structure of the cuticle in free-swimming (mature) adults — 14
 - 2.2.4 Formation of the cuticle — 14
 - 2.2.5 Cilia — 18
 - 2.2.6 Cytoskeleton of epithelial cells — 20
 - 2.2.7 The cytoplasm of the ciliated cells — 20
 - 2.2.8 The genital pore in a non-fertilized female — 21
 - 2.2.9 The genital pore in a fertilized female — 21
 - 2.2.10 Musculature — 21
 - 2.2.11 The nervous system — 26
 - 2.2.12 Ciliated receptor — 27
 - 2.2.13 Gametes — 27
 - 2.2.14 Cell number counts — 29
 - 2.3 Plasmodium — 29
 - 2.3.1 Plasmodial cytoplasm — 30
 - 2.3.2 Reproductive cells — 30
 - 2.3.3 Plasmodial feeding — 31
 - 2.3.4 Egress of males and females from the plasmodium — 33
 - 2.3.5 Plasmodial reproduction — 33

- 2.3.6 The nature of the orthonectid plasmodium — 34
- 2.4 Reproduction and development — 35
 - 2.4.1 Reproductive biology — 35
 - 2.4.2 Embryology — 35
 - 2.4.3 Larva — 35
- 2.5 Systematics — 35
- 2.6 Distribution, biology, and ecology — 36
- 2.7 The life cycle — 37
- Acknowledgments — 37
- Literature — 38

Oliver Voigt and Michael Eitel

- 3 Placozoa — 41**
 - 3.1 Introduction — 41
 - 3.2 Distribution — 41
 - 3.3 Biology — 43
 - 3.3.1 Anatomy — 43
 - 3.3.1.1 Upper epithelium — 43
 - 3.3.1.2 Lower epithelium — 43
 - 3.3.1.3 Intermediate layer — 43
 - 3.3.2 Movement and feeding — 45
 - 3.3.3 Asexual reproduction — 46
 - 3.3.4 Sexual reproduction and early embryonic development — 47
 - 3.3.5 Ecology — 47
 - 3.4 Phylogeny and taxonomy — 49
 - 3.4.1 Placozoa in the animal tree of life — 49
 - 3.4.2 Genetic diversity and phylogeography — 49
 - 3.4.3 Genomics — 51
 - Literature — 51

Wilko H. Ahlrichs and O. Riemann

- 4 Seisonidae — 55**
 - 4.1 Introduction — 55
 - 4.2 Morphology — 55
 - 4.2.1 General and external morphology — 55
 - 4.2.1.1 Body outline — 55
 - 4.2.1.2 Head — 56
 - 4.2.1.3 Neck — 58
 - 4.2.1.4 Trunk — 58
 - 4.2.1.5 Foot — 58
 - 4.2.2 Epidermis — 59
 - 4.2.2.1 Epithelium of the epidermis — 59
 - 4.2.2.2 Epidermal glands — 61
 - 4.2.3 Musculature — 67
 - 4.2.3.1 Circular muscles — 67

6.9	Excretory system — 133	7.4	Histological structure, cytology, and functional significance of organ systems — 196
6.10	Regeneration — 134	7.4.1	Epidermis — 197
6.11	Reproductive system — 136	7.4.1.1	Distal epidermal cells — 197
6.11.1	Oogenesis — 136	7.4.1.2	Proximal epidermal cells — 197
6.11.2	Spermatogenesis — 139	7.4.1.3	Vacuolated epidermal cells — 199
6.12	Fertilization and embryogenesis — 140	7.4.1.4	Further types of epidermal cells — 203
6.13	Larval morphology — 142	7.4.1.5	Oligo- and unilayered epidermis and chitinous structures — 203
6.13.1	Introduction — 142	7.4.1.6	Vestibular organs — 205
6.13.2	Integument — 143	7.4.1.7	Multicellular epidermal glands and solitary secretory cells — 207
6.13.3	Digestive system — 144	7.4.1.8	Bioluminescent organs — 211
6.13.4	Excretory system — 145	7.4.2	Sense organs — 212
6.13.5	Musculature — 145	7.4.2.1	Retrocerebral organ — 212
6.13.6	Nervous system — 146	7.4.2.2	Eyes — 213
6.13.7	Apical organ — 146	7.4.2.3	Ciliary fence and tuft organs — 216
6.13.8	Frontal organ — 146	7.4.2.4	Corona ciliata — 219
6.13.9	Metamorphosis — 147	7.4.3	Nervous system — 221
6.14	Paleontology — 148	7.4.3.1	Brain and circumesophageal chain of cephalic ganglia — 223
6.15	Phylogeny — 149	7.4.3.2	Ventral nerve center — 227
6.16	Biogeography and ecology — 150	7.4.3.3	Intra- and basiepidermal neuronal plexus — 229
6.16.1	Biogeography — 150	7.4.4	Muscular apparatus and locomotion — 231
6.16.2	Ecology — 151	7.4.4.1	Gut-associated muscles — 233
6.17	Systematics — 152	7.4.4.2	Cephalic locomotory muscles — 233
	Literature — 157	7.4.4.3	Trunk and tail locomotory muscles — 235
		7.4.4.4	Neuromuscular systems — 240
		7.4.4.5	Considerations about muscle evolution within the Chaetognatha — 241
Carsten H.G. Müller, Steffen Harzsch and Yvan Perez		7.4.5	Digestive system — 242
7	Chaetognatha — 163	7.4.5.1	Oral cavity and esophagus — 242
7.1	Introduction — 163	7.4.5.2	Intestine and rectum — 242
7.1.1	Generalities — 163	7.4.5.3	Vacuolated intestine — 245
7.1.2	Paleontological evidence — 165	7.4.6	Body cavities — 245
7.1.3	Gross morphology and anatomy — 166	7.4.6.1	Primary body cavity—hemal system — 245
7.1.4	Affinities of Chaetognatha within Bilateria — 170	7.4.6.2	Secondary body cavities—trimeric coelomic organisation — 247
7.2	Systematics and taxonomy — 173	7.4.6.3	Status and phylogenetic significance of chaetognath coeloms and associated metanephridial organs — 249
7.2.1	Traditional hypotheses based on morphology — 173	7.4.7	Reproductive system — 251
7.2.2	Evidence from recent molecular phylogenies — 175	7.4.7.1	Testis and seminal vesicle — 253
7.2.3	Ecophenotypic plasticity — 177	7.4.7.2	Ovary and oviducal complex — 255
7.2.4	Species diagnosis, DNA bar coding, and population genetics — 178	7.5	Reproduction and ontogeny — 256
7.2.5	List of valid species by family and genus — 179	7.5.1	Mating, fertilization, and egg laying — 256
7.3	Ecology and distribution patterns — 185	7.5.2	Germline, cleavage, gastrulation, and coelomogenesis — 261
7.3.1	Species composition and distribution in the major ocean basins — 185		
7.3.1.1	Planktonic species — 189		
7.3.1.2	Benthic species — 192		
7.3.1.3	Endemism and rarely recorded species — 193		
7.3.2	Diel and ontogenetic vertical migrations — 194		

7.5.3	Hatching and growth —	265
7.5.4	Neurogenesis —	265
	Literature —	267
Kenneth M. Halanych, Michael G. Tassia and Johanna T. Cannon		
8	Pterobranchia —	283
8.1	Introduction —	283
8.2	Morphology —	283
8.2.1	General anatomy —	283
8.2.2	Integument —	286
8.2.3	Body cavities —	287
8.2.4	Musculature —	287
8.2.5	Nervous system and sensory structures —	287
8.2.6	Digestive system —	288
8.2.7	Gas exchange system —	288
8.2.8	Excretory and circulatory systems —	289
8.3	Reproduction and development —	289
8.3.1	Reproductive system —	289
8.3.2	Development —	290
8.4	Distribution and ecology —	292
8.5	Phylogeny —	292
8.6	Diversity —	293
	Literature —	296

Michael G. Tassia, Johanna T. Cannon and Kenneth M. Halanych

9 Enteropneusta — 299

9.1 Introduction — **299**

9.2 Morphology — **299**

9.2.1 General anatomy — **299**

9.2.2 Integument — **303**

9.2.3 Body cavities — **304**

9.2.4 Musculature — **305**

9.2.5 Nervous system and sensory structures — **307**

9.2.6 Digestive and Branchial systems — **309**

9.2.6.1 Digestive system — **309**

9.2.6.2 Branchial system — **310**

9.2.7 Excretory and circulatory systems — **311**

9.3 Reproduction and development — **312**

9.3.1 Reproductive system — **312**

9.3.2 Development — **312**

9.4 Distribution and ecology — **315**

9.5 Phylogeny — **315**

9.6 Diversity — **316**

Literature — **321**

Index — 327
