

Table of Contents

Acknowledgement	5
Kurzfassung	6
Abstract	8
Table of Contents	1-5
List of Figures	1-10
List of Tables.....	1-17
Abbreviations	1-21
1 Introduction and Structure of the Disserta-tion	1-1
2 Theoretical Background	2-5
2.1 Most relevant Key Performance Indicators (KPIs) 2-5	
2.2 Airline Business Models and Aircraft Categories 2- 7	
2.3 Research Focus.....	2-11
2.3.1 Research Gap.....	2-12
2.3.2 The Uniqueness of this Dissertation Among other Initiatives	2-13
3 Frameworks and Methodologies	3-14
3.1 Segment 1: Define Disruption Levels and Evaluation Criteria.....	3-16
3.1.1 Evaluation Criteria.....	3-17

3.1.2	Levels of Technological Disruptions in the Aviation Industry	3-21
3.1.3	Technological Trends in Aircraft Propulsion systems	3-23
3.1.4	Summary of Technological Disruptions in Aircraft Propulsion Systems.....	3-42
3.1.5	Level 4 Disruptions	3-43
3.2	Segment 2: Concepts.....	3-46
3.2.1	Inspirational Demonstrator	3-47
3.2.2	Requirements Analysis	3-50
3.2.3	Classification of Concepts.....	3-54
3.3	Segment 3: Route Calculation Model.....	3-56
4	Ecological and DOC Evaluation	4-62
4.1	Assumptions	4-62
4.1.1	Structural Assumptions	4-62
4.1.2	Power Train Assumptions.....	4-64
4.1.3	Airline Operation Related Assumptions .	4-65
4.1.4	Strategic Assumptions	4-66
4.2	Power and Energy Requirements	4-67
4.3	Emission Calculation	4-70
4.4	Efficiencies, Specific Power and Specific Energies	4-72
4.5	DOC Analysis.....	4-77
4.5.1	Depreciation	4-78

4.5.2	Crew	4-81
4.5.3	Fees	4-81
4.5.4	Maintenance	4-82
4.5.5	Interest and Insurance	4-88
4.5.6	Fuel.....	4-88
4.5.7	DOC Distribution for Var-0.....	4-90
4.6	Pre-categorized Lower Sustainability, Higher Feasibility Concepts.....	4-91
4.6.1	Concept TE P: 1xTurbofan (HEFA-Kerosene Blend), 3x Turbofan (Kerosene)	4-91
4.6.2	Concept DD P: 1x Turbofan (HEFA), 3x Turbofan (Kerosene)	4-96
4.6.3	Concept FS P: 2x Electric Engines (Powered by a Kerosene Fired Turboshift), 2x Turbofan (Kerosene)	4-100
4.6.4	Concept RH P: 2 x Electric Engines (Powered by an LPG Fired Turboshift), 2x Turbofan (Kerosene)	4-107
4.6.5	Concept JS P: Hydrogen Combustion with a 50/50 Biofuel/Kerosene Blend for the Journey ...	4-113
4.7	Pre-categorized Moderate Sustainability, Moderate Feasibility Concepts	4-118
4.7.1	Concept TE R: 4x Turbofan (HEFA-Kerosene Blend)	4-118

4.7.2	Concept DD R: 1x Battery-Electric, 1x Turbofan (HEFA), 2x Turbofan (Kerosene)	4-122
4.7.3	Concept FS R: 2 x H ₂ HTPEM Fuel Cell Powered Electric Engines, 2x Turbofan (Kerosene)....	4-130
4.7.4	Concept RH R: 4x Electric Engines Powered by an LPG Turboshaft	4-137
4.7.5	Concept JS R: Hydrogen Combustion with a 50/50 Biofuel/Kerosene Blend Reserve	4-144
4.8	Pre-categorized High Sustainability, High Feasibility Concepts	4-149
4.8.1	Concept FH O: 4x Turbofan (Pure HEFA)	4-149
4.8.2	Concept DD O: 2x Battery-Electric engines, 2x Turbofan (HEFA)	4-152
4.8.3	Concept FS O: 4 x Electric Engines (Powered by HTPEM Fuel Cells)	4-158
4.8.4	Concept JS O: 4 x Turbofans with Hydrogen Combustion	4-165
4.8.5	Concept AE O: All Electric Lithium Air Battery Powered Concept	4-169
4.9	Discussion and Evaluation of Results	4-174
4.9.1	Sustainability Evaluation.....	4-174
4.9.2	DOC Evaluation	4-183
4.9.3	Disruption Levels in Retrospective	4-191

4.9.4	Opportunity Costs due to Forfeited Belly Cargo Capacity.....	4-199
4.9.5	The Evaluation Model in Retrospective	4-204
4.9.6	Addressing Uncertainties through a Sensitivity Analysis.....	4-206
5	Summary and Outlook	5-211
5.1	Hypothesis Validation and Negation.....	5-216
5.2	Final Comments.....	5-218
5.3	Recommendations for Future Work	5-222
6	Table of References.....	224
	Appendix I - Route Calculation Model	235
	Energy Requirement	235
	Taxi Out	235
	Take Off	235
	Climb	237
	Cruise.....	240
	Descend	242
	Alternate and Holding	244
	Sum of Energy and Power Requirements	245
	Mass Calculation	245
	Appendix II Symbols for Graphical Representations.....	247
	Raw Aircraft (Cabin +Cargo Bay):	247
	HTPEM Fuel Cell Powered Engine	247

Battery Electric Powered Electric Motor	248
Generator Powered Electric Motor	248
Full Kerosene powered Engine (left), Kerosene Blend Powered Engine (right).....	248
Hydrogen (combustion) Powered Engine	249
Biofuel (HEFA) powered Engine.....	249
Turboshaft– Generator Combo	249
SOFC – Gas Turbine – Generator Combo	250
Appendix III Theoretical and Practical Utilization of the Developed Framework (see section3).....	251
Theoretical Utilization	251
Practical Utilization.....	252
Key Users	253
