

1	Introduction	1
1.1	Preliminary Note	1
1.2	Importance and Quality of Balancing	2
1.3	Development of Balancing Technology and Balancing Machines	3
1.3.1	Unbalance Types	3
1.3.2	Balancing Machines	5
1.4	Standards and Guidelines	9
1.4.1	Historical Course	9
1.4.2	Current Situation	10
1.5	List of Current Standards	13
2	Physical Basics	15
2.1	Preliminary Note	16
2.2	Physical Quantities	16
2.3	Scalar and Vector	16
2.3.1	Addition	17
2.3.2	Multiplication	17
2.4	System of Units	19
2.4.1	Basic Quantities	19
2.4.2	Derived Quantities	19
2.5	Physical Laws	20
2.5.1	Newton's 2nd Law	20
2.5.2	Mass Attraction	21
2.6	Circular Motion	21
2.6.1	Plane Angle	21
2.6.2	Angular Frequency	22
2.6.3	Circular Speed	23
2.6.4	Angular Acceleration	24
2.6.5	Circular Acceleration	24
2.6.6	Torque	24

2.6.7	Moment of Inertia	25
2.6.8	Radial Acceleration	25
2.6.9	Centrifugal Force	26
2.7	Vibration	26
2.7.1	Single Mass Oscillator with Centrifugal Excitation	27
2.7.1.1	Subcritical Area	30
2.7.1.2	Resonance Area	31
2.7.1.3	Supercritical Area	31
2.7.2	Degrees of Freedom	32
2.7.3	Dynamic Stiffness	32
3	Terms and Explanations	35
3.1	Preliminary Note	35
3.2	Rotor Balancing	36
3.3	Balancing Task	36
3.4	Rotor	36
3.5	Unbalance	36
3.6	Unbalance Condition	37
3.7	Unbalance Behaviour	37
3.8	Unbalance Tolerances	37
3.9	Correction	37
3.10	Correction Plane	38
3.11	Shaft Axis	38
3.12	Rotor Behaviour	39
3.12.1	Rotors with Rigid Behaviour	39
3.12.2	Rotors with Flexible Behaviour	39
3.12.2.1	Rotors with Shaft Elastic Behaviour	39
3.12.2.2	Rotors with Component-Elastic Behaviour	39
3.12.2.3	Rotors with Settling Behaviour	39
3.13	Rotor Concept	40
4	Theory of Balancing	41
4.1	Preliminary Note	42
4.2	General	42
4.2.1	Unbalance State	43
4.2.2	Rotor Concept	44
4.2.3	Rotor Behaviour	44
4.2.3.1	General	44
4.2.3.2	Effects of Rotor Behaviour	45
4.2.3.3	Principle of Order	45
4.2.4	Unbalance Tolerances	46
4.2.5	Balancing Task	48

4.3	Unbalances and Correction	50
4.4	Unbalance of the Disc-Shaped Rotor	52
4.5	Unbalance of a General Rotor	54
4.5.1	Resultant Unbalance	56
4.5.2	Moment Unbalance	57
4.5.3	Couple Unbalance	59
4.5.4	Modal Unbalance	60
4.5.5	Equivalent Modal Unbalance	62
4.6	Overview of the Balancing Tasks	63
4.6.1	General	63
4.6.2	The Balanced Rotor	64
4.6.3	Single-Plane Balancing	64
4.6.4	Two-Plane Balancing	65
4.6.5	Multi-Plane Balancing	66
4.6.5.1	Example 1	66
4.6.5.2	Example 2	67
4.6.5.3	Example 3	68
4.6.5.4	Example 4	70
4.7	Conclusion of the New Perspective	71
4.7.1	Significance of Resonances	71
4.7.2	Significance of Flexural Resonances above the Service Speed	71
4.7.3	Treatment of Flexural Resonances above Service Speed	72
4.8	Handling Unbalance Tolerances	72
4.8.1	Concept	72
4.8.2	Procedure	74
4.8.2.1	Example 1	74
4.8.2.2	Example 2	74
4.8.2.3	Example 3	75
4.8.2.4	Example 4	75
5	Theory of the Rotor with Rigid Behaviour	77
5.1	Preliminary Remark	77
5.2	Rotor Behaviour	78
5.3	Unbalanced Condition	79
5.3.1	Static Unbalance	79
5.3.1.1	Example 1	81
5.3.1.2	Example 2	81
5.3.1.3	Example 3	82
5.3.1.4	Example 4	83
5.3.2	Resulting Unbalance	84

	5.3.2.1	Example 1	84
	5.3.2.2	Example 2	85
	5.3.3	Moment Unbalance	86
	5.3.3.1	Example	87
	5.3.4	Dynamic Unbalance	88
5.4		Display of the Unbalance Condition	90
	5.4.1	Unbalances	90
	5.4.2	Position of the Axis of Inertia	92
	5.4.3	Overview	94
6		Theory of the Rotor with Flexible Behaviour	97
6.1		Preliminary Note	98
6.2		Settling Behaviour	98
6.3		Component-Elastic Rotor Behaviour	99
6.4		Shaft Elastic Rotor Behaviour	100
	6.4.1	Idealised Rotor with Shaft-Elastic Behaviour	102
	6.4.2	Influence of Bearing Stiffness	102
	6.4.3	Flexural Resonance Speeds at Standstill	106
	6.4.4	General Rotor with Shaft-Elastic Behaviour	106
	6.4.5	Unbalance Effects on the Rotor with Shaft-Elastic Behaviour	106
	6.4.5.1	Modal Unbalances	107
	6.4.5.2	Equivalent Modal Unbalances	108
	6.4.6	Balancing a Rotor with Shaft-Elastic Behaviour	108
	6.4.6.1	First Flexural Mode	110
	6.4.6.2	Second Flexural Mode	110
	6.4.6.3	Third Flexural Mode	112
	6.4.7	Choice of Correction Planes	112
	6.4.7.1	Variety of Rotors	112
	6.4.7.2	Example 1	114
	6.4.7.3	Example 2	115
	6.4.7.4	Example 3	116
	6.4.7.5	Example 4	117
	6.4.7.6	Example 5	118
	6.4.7.7	Example 6	119
	6.4.7.8	Example 7	120
7		Tolerances for Rotors with Rigid Behaviour	121
7.1		Preliminary Note	122
7.2		Basics	122
	7.2.1	Tolerance Planes	123
	7.2.2	Correction Planes	125
	7.2.3	Limitation of the Permissible Residual Unbalance	126

7.3	Similarity Considerations.	126
7.3.1	Rotor Mass and Permissible Residual Unbalance	126
7.3.2	Service Speed and Permissible Residual Unbalance	127
7.3.2.1	Special Cases	128
7.4	Determining the Permissible Residual Unbalance.	128
7.4.1	General	128
7.4.2	Balancing Grades G	129
7.4.2.1	Classification	129
7.4.2.2	Special Cases	133
7.4.2.3	Permissible Residual Unbalance	133
7.4.3	Experimental Determination.	134
7.4.4	Limits from Specific Targets.	134
7.4.4.1	Limitation by Bearing Forces.	134
7.4.4.2	Limitation Through Vibrations.	136
7.4.5	Proven Experience	136
7.4.5.1	Almost Identical Rotor Size.	136
7.4.5.2	Similar Rotor Size	136
7.5	Allocation to Tolerance Planes.	137
7.5.1	Rotors with a Single Tolerance Plane.	137
7.5.1.1	Practical Review.	137
7.5.1.2	Acceptance	137
7.5.2	Rotors with Two Tolerance Planes	138
7.5.2.1	Restrictions on Inboard Rotors.	139
7.5.2.2	Restrictions on Outboard Rotors	139
7.6	Assignment of the Unbalance Tolerance to the Correction Planes.	141
7.6.1	Single-Plane Case	141
7.6.2	Two-Plane Case	141
7.7	Assembled Rotors	142
7.8	Unbalance Readings for the Balancing Process.	143
7.8.1	Example	143
7.9	Checking the Residual Unbalance	144
7.9.1	Acceptance Criteria.	145
7.9.2	Unbalance Readings in Tolerance.	145
7.9.3	Unbalance Readings Outside Tolerance	146
7.9.4	Region of Uncertainty.	146
7.9.5	Particularities when Measuring Unbalances.	146
7.9.6	Checking on a Balancing Machine.	147
7.9.7	Checking Without a Balancing Machine	147

8	Tolerances for Rotors with Flexible Behaviour	149
8.1	Preliminary Note	150
8.2	General	150
8.2.1	Balancing Target	151
8.2.2	Balancing Procedures	151
8.3	Tolerance Criteria	152
8.3.1	Vibrations	152
8.3.1.1	Vibrations According to ISO 21940-12	153
8.3.1.2	Problems with Vibrations	154
8.3.1.3	Conclusion	155
8.3.2	Unbalances	156
8.3.2.1	Total Permissible Unbalance	156
8.3.2.2	Tolerance Planes	156
8.3.2.3	Distribution of the Total Permissible Unbalance	157
8.3.2.4	Modal Influence on the Permissible Unbalances	157
8.4	Unbalance Tolerances for Procedures A to I	159
8.4.1	Tolerances of Low-Speed Balancing Procedures	159
8.4.1.1	Procedure A: Single-Plane Balancing	159
8.4.1.2	Procedure B: Two-Plane Balancing	160
8.4.1.3	Procedure C: Balancing Individual Components Before Assembly	162
8.4.1.4	Procedure D: Balancing After Limiting the Starting Unbalance	162
8.4.1.5	Procedure E: Sequential Balancing During Assembly	163
8.4.1.6	Procedure F: Balancing in Optimal Planes	163
8.4.2	Tolerances of High-Speed Balancing Procedures	163
8.4.2.1	Procedure G: Multiple-Speed Balancing	163
8.4.2.2	Procedure H: Balancing at Service Speed	163
8.4.2.3	Procedure I: Balancing at a Fixed Speed	163
8.5	Unbalance Tolerances for Procedure G	164
8.5.1	Unbalance Tolerances According to ISO 21940-12	164
8.5.2	Unbalance Tolerances According to DIN ISO 21940-12, Beiblatt 1	165
8.5.2.1	Distribution to Several Unbalances	165
8.5.2.1.1	Even Distribution	166
8.5.2.1.2	Weighted Distribution	168
8.6	Tolerances for the Balancing Process	168
8.7	Assessment of the Unbalance State Achieved	170
8.7.1	Assessment by Vibrations	170

	8.7.1.1	Assessment in a High-Speed Balancing Machine	171
	8.7.1.2	Assessment in the Test Field	171
	8.7.1.3	Assessment in Service Condition.	171
	8.7.2	Assessment by Unbalances.	172
	8.7.2.1	Assessment in a Low-Speed Balancing Machine	172
	8.7.2.2	Assessment in a High-Speed Balancing System	173
	8.7.2.3	Assessment in the Test Field	173
	8.7.2.4	Assessment in Service	174
8.8		Susceptibility and Sensitivity of Machines to Unbalance	174
	8.8.1	Classification of the Susceptibility of Machines.	175
	8.8.2	Modal Sensitivity Ranges	175
	8.8.3	Limit Curves	176
	8.8.3.1	Example 1.	178
	8.8.3.2	Example 2.	178
	8.8.3.3	Special Case Acceleration	179
	8.8.3.4	Example	180
	8.8.4	Experimental Determination of the Modal Sensitivity	180
	8.8.4.1	Example 1.	180
	8.8.4.2	Example 2.	182
9		Procedures for Balancing Rotors with Rigid Behaviour	183
	9.1	Preliminary Note	184
	9.2	Bodies Without Own Bearing Journals	184
	9.2.1	General	184
	9.2.2	Unbalances Due to Assembly	184
	9.2.3	Index Balancing	187
	9.2.3.1	Single Plane with Unbalances	187
	9.2.3.2	Single Plane with Fit-Related Errors	189
	9.2.3.3	Generalisation	191
	9.2.4	Further Use of the Index Balancing Method	191
	9.2.5	Auxiliary Shafts, Adapters	192
	9.3	Assemblies	192
	9.3.1	General	192
	9.3.2	Procedure	192
	9.3.2.1	Example 1.	193
	9.3.2.2	Example 2.	193
	9.3.3	Interchangeability of Parts	194
	9.3.4	Correction of the Assembly Error.	194
	9.3.5	Dummies (Substitute Masses)	195

9.4	Rotors with Parallel Keys	195
9.4.1	General	195
9.4.2	Shaft with Complete Key	195
9.4.3	Shaft with Half Key	196
9.4.4	Influence on the Unbalance Condition	196
9.4.5	Bias for a Parallel Key	197
9.4.6	Constructive Measures	197
10	Procedures for Balancing Rotors with Flexible Behaviour	199
10.1	Preliminary Note	200
10.2	General	200
10.3	Rotor Configurations	201
10.3.1	Basic Elements Of Shaft-Elastic Rotors	201
10.3.2	Balancing Principles	201
10.3.3	Rotor with Discs	202
10.3.3.1	A Single Disc	203
10.3.3.2	Two Discs	203
10.3.3.3	More than Two Discs	204
10.3.4	Rigid Sections	206
10.3.5	Rolls	207
10.3.6	Integral Rotor	207
10.3.7	Combinations	208
10.3.8	Repairs	208
10.4	Balancing Procedures	209
10.4.1	Procedure A: Single-Plane Balancing	209
10.4.2	Procedure B: Two-Plane Balancing	209
10.4.3	Procedure C: Balancing Individual Components Before Assembly	210
10.4.4	Procedure D: Balancing After Limiting The Initial Unbalance	210
10.4.5	Procedure E: Sequential Balancing During Assembly	210
10.4.5.1	Problem with Transfer Unbalances	211
10.4.5.2	Solution	212
10.4.5.3	Problem Assembly	213
10.4.6	Procedure F: Balancing in Optimal Planes	213
10.4.7	Procedure G: Balancing at Multiple Speeds	214
10.4.7.1	2 + N procedure and N + 2 Procedure	214
10.4.7.2	Correction Ratio	215
10.4.7.3	Recommendation	216
10.4.7.4	Computer Support	217
10.4.7.5	Beiblatt 1 to DIN ISO 21940-12	218
10.4.8	Procedure H: Balancing at Service Speed	218

10.4.9	Procedure I: Balancing at a Fixed Speed	220
10.4.10	Settling Behaviour Procedure	220
11	Description of the Balancing Task	221
