

Contents

Preface — V

List of Contributing Authors — IX

Svetlin G. Georgiev

1 Projector analysis of dynamic systems on time scales — 1

Samir H. Saker

2 Muckenhoupt and Gehring weights on time scales — 77

Douglas R. Anderson and Masakazu Onitsuka

3 Ulam stability and instability of first-order linear 1- and 2-periodic dynamic equations on isolated time scales — 147

Douglas R. Anderson, Martin Bohner, and Guo-Cheng Wu

4 A logarithm on time scales and its uses — 175

R. Vivek, S. Sivasundaram, D. Vivek, and K. Kanagarajan

5 Qualitative analysis for hybrid fuzzy differential equations involving tempered Ξ -Hilfer fractional derivative on time scales — 197

S. Manikandan, S. Sivasundaram, K. Kanagarajan, and D. Vivek

6 The dynamical analysis of nonlinear Ambartsumian equation via tempered Ξ -Hilfer fractional derivative on time scales — 219

Svetlin G. Georgiev and İnci M. Erhan

7 Series solution method on time scales and its applications — 239

Zeynep Kaya, Billur Kaymakçalan, and Neslihan Nesliye Pelen

8 Generalized diamond alpha Bennett–Leindler-type dynamic inequalities — 259

Sibel Doğru Akgöl and Abdullah Özbekler

9 De La Vallée Poussin-type inequality for impulsive dynamic equations on time scales — 295

Najlaa Jaddoa, Rezan Sevinik-Adigüzel, and İnci M. Erhan

10 Divided and σ -divided differences on time scales — 305

Index — 325
