

Index

Page locators in **bold** indicate tables. Page locators in *italics* indicate figures. This index uses letter-by-letter alphabetization.

a

- abfraction 311–312, *311*
- ABH *see* angina bullosa hemorrhagica
- abrasion 312
- abscesses
 - dental 274, 315–316, *315*
 - differential diagnosis 29, 289–290, 366
 - intraepithelial microabscesses 108, 188, 325
 - lip abscess 134–135, *134*
 - orofacial pain 85–86, 85
 - periapical abscess 289–290, 317–318, *317*
 - periodontal abscess 318
- acantholysis 198, 201
- acantholytic neoplastic epithelial cells 236
- acanthosis nigricans 324
- ACE *see* angiotensin-converting enzyme
- acetylcholinesterase inhibitors 120
- acrodermatitis enteropathica 263
- ACTH *see* adrenocorticotrophic hormone
- actinic cheilitis
 - differential diagnosis 42, 266–267, 323
 - normal variations 346
 - ulcerations 172
- actinic dermatitis 212
- actinic prurigo 12, 46–47, 134, 265, 362
- Actinomyces* spp. 26, 87
- actinomycosis 186, 212
- actinomycosis sinus 274
- acute leukemia 174–175, *174*
- acute lymphoblastic leukemia (ALL) 168
- acute pseudomembranous candidiasis 218–219, *218*
- age of patient 353–354, 353
- malodor 63
- saliva disturbances 121
- acute sialadenitis 288–289, 288
- acute sinusitis 91–92, *91*
- Adamantiades-Behcet syndrome 170, 189, 362
- Addison disease 20–21, 20
- adenocystic carcinoma 290
- adenoid carcinoma 236
- adenoma, pleomorphic 289–290, 289
- differential diagnosis 141–142, 288, 336
- adenoviruses 121
- adrenocorticotrophic hormone (ACTH) 21
- AF *see* atrial fibrillation
- AFP *see* atypical facial pain
- age of patient 349–367
 - asymptomatic lump on lateral tongue 365–367, 365
 - black discoloration of teeth 357–358, 357
 - characterization and clinical appearance 349–350, 349
 - common causes and conditions by age group **350–353**
 - diffuse erythema on palatal mucosa and burning sensation 364–365, 364
 - erythematous gingivae 363–364, 363
 - multiple oral lesions 361–362, *361*
 - normal variations 338
 - painful gingivae 360–361, 360
 - painful ulceration on lower lip 356–357, 356
 - red spot on dorsal tongue 354–355, 354
 - swelling and pain on face neck 358–359, 358
 - white deposits on buccal mucosae 353–354, 353
- ageusia 147–148
- airway 6
- albinism 213
- alcoholic ketoacidosis 55
- alcohol-induced pancreatitis 119–120, *119*
- alcohol use
 - bleeding 16
 - gingivae 249
 - malodor 54
 - palate 286
 - tongue 326
- aldosterone 21
- alkaline phosphatase 256
- alkoponyuria 306
- ALL *see* acute lymphoblastic leukemia
- Allbright syndrome 202
- allergic cheilitis 265–266, 265
- differential diagnosis 23–24, 133, 262

- allergic reactions
 - differential diagnosis 101
 - red lesions 104–105, 104
 - swellings (diffuse/lumps) 137
 - see also* hypersensitivity reactions
 - allergic stomatitis 197, 364
 - allyl mercaptan 61
 - allyl methyl sulfide 61
 - Alpert syndrome 140
 - alveolar mucosa 22–23, 22
 - alveolar osteitis 52–53, 52
 - Alzheimer's disease 185
 - amalgam reactions 232
 - amalgam tattoo 22–23, 22
 - amelanotic melanoma 142
 - amelogenesis imperfecta 305, 306, 313
 - amilodipine 245
 - amyloidosis 110, 209
 - amyotrophic lateral sclerosis 122–123, 122
 - anemia
 - aphtha/aphthous stomatitis 231
 - bleeding 5, 15
 - blue and/or black lesions 28
 - brown lesions 42
 - differential diagnosis 342
 - Fanconi anemia 71–72, 71, 175
 - hypochromic anemia 220
 - orofacial pain 89, 93
 - pernicious anemia 101, 106
 - sickle cell anemia 286
 - sideropenic anemia 14, 106, 165, 325
 - tongue 327
 - ulcerations 174–175
 - yellow lesions 220
 - see also* iron deficiency anemia
 - anesthesia 220–221, 220
 - aneurysmal cyst 30
 - angina bullosa hemorrhagica (ABH)
 - bleeding 8, 9
 - differential diagnosis 186
 - vesiculobullous lesions 191–192, 191
 - angioedema 132–133, 132, 136–137, 136
 - normal variations 344
 - yellow lesions 221
 - angiotensin-converting enzyme (ACE) inhibitors 136–137, 136, 157
 - angular cheilitis 262–263, 262
 - differential diagnosis 323
 - normal variations 346
 - ankylosis 312
 - anorexia nervosa 16, 62
 - antibiotics
 - brown lesions 39
 - orofacial pain 86, 92
 - vesiculobullous lesions 193–194, 193
 - yellow lesions 214
 - anticoagulants 197
 - anticonvulsants 246
 - anti-diabetics 9
 - anti-emetics 39
 - anti-fungals 154
 - anti-malarials 38
 - antimetabolites 258
 - anti-neutrophil cytoplasmic antibodies 60
 - antiphospholipid syndrome 111
 - antipsychotics 120
 - antiretroviral drugs 185
 - antral mucormycosis 212
 - ANG *see* necrotizing gingivitis/stomatitis
 - APECED syndrome 374
 - aphtha/aphthous stomatitis
 - age of patient 349–350, 356–357, 356
 - buccal mucosa 230–231, 230
 - characterization and clinical appearance 169
 - differential diagnosis 113, 182, 215, 285, 323, 366
 - herpetiform aphthae 185
 - orofacial pain 88–89, 88
 - ulcerations 169–170, 169
 - aplasia 287
 - apoptosis
 - red lesions 114
 - reticular lichen planus 232
 - taste deficits 150
 - ulcerations 168
 - Asboe-Hansen sign 380
 - Ascher syndrome 301
 - aspirin 18
 - asthma 101
 - ataxia telangiectasia 5
 - atrial fibrillation (AF) 197
 - atrophic glossitis 150, 323, 327–328, 327
 - atrophy 80
 - attrition 310–312, 310–311
 - atypical facial pain (AFP) 85, 95
 - atypical odontalgia 91
 - Auspitz sign 386
 - autoimmune polyendocrine syndrome (PAS II) 21
 - autoimmune polyglandular syndrome 199
- b**
- bad breath *see* malodor
 - ball-point pen test 377
 - basal cell adenocarcinoma 290
 - basal cell carcinoma 212–213, 212
 - basement membrane zone (BMZ) 188, 364
 - Bellini ducts 128
 - Bell's palsy 78–79, 78
 - differential diagnosis 378
 - vesiculobullous lesions 185
 - benign lymphoepithelial lesion 272–273, 272
 - benign migratory glossitis *see* geographic tongue
 - benign mucous membrane pemphigoid 363–364, 363
 - betel nut chewing 118
 - bifid tongue 346–347
 - bipolar disorders 161
 - Birbeck granules/bodies 258
 - birth marks 220–221
 - bismuth containing drugs 217
 - bisphosphonate-induced osteonecrosis 186
 - black hairy tongue 25–26, 25
 - differential diagnosis 63
 - smoking 206
 - black tooth stain 357–358, 357
 - bleaching test 369
 - bleeding 3–18
 - asymptomatic red palatal spots 15–16, 15
 - broken bulla on upper lip 11–12, 11
 - characterization and clinical appearance 3, 3
 - common causes and conditions 4
 - gingivae 244–245, 244
 - gingival bleeding 14–15, 14
 - halitosis and spontaneous bleeding from gums 108–109, 108

- hemorrhagic bullae 8, 9
 - red spots since childhood 4, 4–5
 - soft hemorrhagic gingival lump 7–8, 7
 - spontaneous gingival bleeding 17–18, 17
 - strawberry-like soft mass on tongue 13–14, 13
 - traumatic injury 6–7, 6
 - white hemorrhagic lesion 10–11, 10
 - bleomycin 44
 - blepharoptosis 76–77, 76
 - blindness 96
 - blood tests *see* laboratory/blood tests
 - blue and/or black lesions 19–34
 - asymptomatic black alveolar mucosal spot 22–23, 22
 - asymptomatic soft swelling on inner lip 29–30, 29
 - black dorsal tongue coating 25–26, 25
 - buccal mucosa and palatal discoloration 20–21, 20
 - characterization and clinical appearance 19, 19
 - clinical tests, signs, and phenomena 375–376, 375
 - common causes and conditions 20
 - floor of the mouth 239–240, 239
 - lip discoloration 27–28, 27
 - long-term bluish-red lesion on tongue 33–34, 33
 - normal variations 338–339, 338
 - painful dark brown lip scabs 23–24, 23
 - painless swelling on lip 26–27, 26
 - swelling on ventral tongue 32–33, 32
 - tongue discoloration 30–31, 30
 - blue rubber bleb syndrome (BRBS) 34, 111
 - BMS *see* burning mouth syndrome
 - BMZ *see* basement membrane zone
 - body odor 57–58, 57
 - bone changes 220
 - bone hypovascularity 73
 - bone lesions 257, 280, 335
 - botulinum toxin 293, 377
 - bowel obstruction 41
 - Bowenoid papulosis 112
 - Bowen's disease 112
 - branchial cysts 135–136, 277, 291
 - BRBS *see* blue rubber bleb syndrome
 - broken bullae 11, 190, 192
 - broken cusp 85
 - bronchodilators 9, 72, 218, 292
 - brown hairy tongue
 - clinical tests, signs, and phenomena 381
 - differential diagnosis 50
 - taste deficits 151–152, 151
 - brown lesions 35–50
 - asymptomatic lesion on lip 42–43, 42
 - asymptomatic lesion on palate 45–46, 45
 - characterization and clinical appearance 35, 35
 - common causes and conditions 36
 - dark oval lesion behind ear 48–49, 48
 - diffuse discoloration on neck 35, 43–44, 43
 - discoloration of dorsal tongue 49–50, 49
 - extensive lesion on lip 46–47, 46
 - gingival discoloration 39–40, 39
 - multiple, scattered oral lesions 36–37, 36
 - patchy discoloration of lips 41–42, 41
 - buccal exostoses 253–254, 253
 - buccal fat 210
 - buccal fibrosis 345
 - buccal mucosa 225–232
 - age of patient 353–354, 353
 - asymptomatic rough white lesions 231–232, 231
 - asymptomatic white lesions on both mucosae 226–227, 226
 - blue and/or black lesions 20–21, 20
 - brown lesions 36–37, 36
 - characterization and clinical appearance 225, 225
 - common causes and conditions 226
 - desquamative yellow-white plaques 227–228, 227
 - diagnostic flow charts 387–388
 - normal variations 334–335, 334, 344–345, 344
 - painful erythematous lump/nodule 230–231, 230
 - soft lump/pedunculated nodule 229–230, 229
 - swellings (diffuse/lumps) 143–144, 143
 - ulcerations 165–168, 165, 167
 - white lesions 205, 205
 - buccal raphe 336
 - bullous dermatosis 369
 - bullous lichen planus 192
 - bullous pemphigoid 190–191, 190
 - bleeding 12
 - differential diagnosis 189, 363–364, 380
 - burning mouth syndrome (BMS)
 - 92–93, 92
 - differential diagnosis 101
 - burning sensation
 - age of patient 357, 364
 - clinical tests, signs, and phenomena 379
 - lips 263–264, 263
 - malodor 58
 - palate 282
 - tongue 322, 325
 - ulcerations 176
 - white lesions 196, 199, 202
 - yellow lesions 218
 - burns *see* chemical burns; thermal burns
 - Buschke-Ollendorff syndrome 275
- C**
- C1 esterase inhibitor 133
 - cachexia 61–62
 - café au lait skin lesions 43, 276
 - calcified acne 27
 - calcified lymph nodes 27
 - calcified thrombus 27, 34, 239–240
 - calcinosis cutis 27
 - calciphylaxis 200
 - calcium channel blockers 246
 - cancrum oris/noma 361
 - Candida* spp.
 - age of patient 353–354, 353, 365
 - angular cheilitis 262–263, 264
 - buccal mucosa 227
 - clinical tests, signs, and phenomena 374
 - malodor 62
 - palate 283
 - red lesions 106–107, 108

- Candida* spp (*cont'd*)
 taste deficits 150, 152, 154
 tongue 326
 white lesions 196–199, 196, 203
 yellow lesions 214, 214, 218–219, 218
- candidemia 218
- carbon dioxide laser therapy 264
- carcinoma *see individual types/locations*
- caries
 differential diagnosis 310
 rampant caries 313–314, 313
 taste deficits 158
- carotinemia 217
- cauterization 11, 89, 356–357
- cavernous hemangiomas 137
- cavernous sinus thrombosis 87–88
- cellulitis 135
- cerebrospinal fluid rhinorrhea 75
- chancre 113, 178, 215, 285
- chapped lips 266–267, 266
- Chédiak-Higashi syndrome (CHS) 374
- cheek blowing test 383
- cheilitis *see individual types*
- cheilitis simplex 266–267, 266
- chemical burns 113–114, 113
 ulcerations 165
 vesiculobullous lesions 183–184, 183
- chemo-radiotherapy
 malodor 61–62
 muscle deficits 72–73, 72, 80–81, 80
 saliva disturbances 124–125, 124
 swellings (diffuse/lumps) 135–136, 135
 taste deficits 149–150, 149
 white lesions 198
- chemotherapy
 brown lesions 44
 chemotherapy-induced early mucositis 116–117, 116
 histiocytosis X 258
- CHF *see congestive heart failure*
- chicken pox 182, 190
- child abuse 6
- chlorhexidine mouthwash 25, 155–156, 155
- chloroquine 217
- cholesterol crystals 34
- chromogenic bacteria 25–26, 358
- chronic gingivitis 56, 380
- chronic kidney disease (CKD) 55–56
- chronic lymphocytic leukemia (CLL) 15, 16
- chronic muco-cutaneous syndrome 199
- chronic osteomyelitis 104
- chronic renal failure (CRF) 199–200
- chronic sclerosing sialadenitis 273
- chronic sialadenitis 288
- chronic sinusitis 64–65, 64
- chronic ulcerative stomatitis 232
- CHS *see* Chédiak-Higashi syndrome
- cicatrical pemphigoid 188–189, 188
 bleeding 12
 differential diagnosis 190
- cinnamon-induced stomatitis 104–105, 104
 differential diagnosis 197, 373–374
 saliva disturbances 118
- circumvallate papillae 342–343, 342
- cirrhosis 5, 17, 33, 110–111, 177, 294
- cisplatin 137
- civatte bodies 108, 204
- CKD *see* chronic kidney disease
- cleft lip/palate 268–269, 268, 305
- cleidocranial dysplasia/dysostosis 305
- clinical tests, signs, and phenomena 369–386
 commonly used examples 369, 369, 370–371
 facial palsy 369, 378–379, 378
 Frey syndrome 376–377, 376
 halitosis and hairy tongue 381–382, 381
 hemangioma 375–376, 375
 lichen planus 384–385, 384
 oroantral communication 382–383, 382
 pemphigus 379–380, 379
 pseudomembranous candidiasis 373–374, 373
 psoriasis 385–386, 385
 xerostomia 371–372, 371
see also laboratory/blood tests
- CLL *see* chronic lymphocytic leukemia
- clotting disorders 12, 18
- coagulative necrosis 114
- coffee 123
- coffee bean-like histiocytes 258
- colchicine 217, 245, 356
- cold sores 134–135
- cold virus 64
- collagen type I alpha 1 chain (COL1A1) 5
- complement deficiency 15
- concrecence 299, 303, 303
- condyloma acuminata 140, 141, 177, 342, 339–340
- condyloma lata 178, 204, 208
- congenital epulis 329
- congenital erythropoietic porphyria 313
- congenital facial paralysis 378–379, 378
- congenital lip hypoplasia 268
- congenital middle-line sinus 268
- congenital neutropenia 257

 dens evaginatus 300–301, 300
 dental abscess 315–316, 315
 dental and periodontal diseases 312–319
 diagnostic flow charts 402–403
 dilaceration 301–302, 301
 erosions 308–309, 308, 312–313
 fluorosis 306–307, 306
 fusion 299–300, 299
 number, size, and shape anomalies 298–305
 oral cutaneous fistula 318–319, 318
 orofacial pain 84–85, 84
 periapical abscess 317–318, 317
 rampant caries 313–314, 313
 resorption 312, 314–315, 314
 staining 206, 357–358, 357
 structural tooth disorders 305–312
 supplemental teeth 304–305, 304
 tooth avulsion 53
 teeth imprints 343–344, 343
 telangiectasias 4, 5, 177, 202
 temperomandibular joint (TMJ) disorder 90–91, 90
 differential diagnosis 69, 96
 temporal arteritis 95–96, 95
 TEN *see* toxic epidermal necrolysis
 tensor veli palatine 337
 tetanus 69
 tetracyclines
 malodor 61
 staining 306, 313, 314
 thalassemia beta anemia 219–220, 219
 theophylline supplements 154
 thermal burns
 burn scarring 70–71, 70
 differential diagnosis 206
 ulcerations 165, 166–167, 166
 vesiculobullous lesions 184–185

- thrombocytopenia
 bleeding 15–16, 15
 differential diagnosis 186
- thrombocytopenic purpura 192, 364
- thymoma 59
- thyroglossal duct sinus 274
- thyroid-stimulating hormone (TSH) 21
- TMJ *see* temporomandibular joint
- tobacco keratosis 205–206, 206
- tongue 321–329
 age of patient 349, 354–355, 354, 365–367, 365
 characterization and clinical appearance 321, 321
 common causes and conditions 322
 desquamative yellow-white plaques 228
 diagnostic flow charts 404–405
 erythematous depapillated lesion and burning sensation 325–326, 325
 erythematous depapillated tongue, smooth and shiny 327–328, 327
 grooved tongue and burning sensation 322–323, 322
 lump on lateral margin 328–329, 328
 normal variations 333, 338–340, 338–339, 342–344, 342–343, 346–347, 346
 patchy lesions over whole surface 324–325, 324
 swellings (diffuse/lumps) 136–137, 136
 taste deficits 154–155, 154
 ulcerations 169–174, 169, 171, 173, 177–178, 177
 white lesions 205, 205
 yellow lesions 215, 215, 217, 217
- tongue coating 176
- tongue discoloration 30–31, 30
- tongue hematoma 3, 3
- tongue paralysis 75–76, 75, 79–80, 79
- tonsillitis 120–121, 120
 taste deficits 159–160, 159
- tooth avulsion 53
- torqueguesia *see* metallic taste
- torus mandibularis 252–253, 252
 differential diagnosis 336
- torus palatinus 280–281, 280
- toxic epidermal necrolysis (TEN) 362
- transient papillitis 328
- traumatic fibroma 131, 141–142, 141
 differential diagnosis 29, 290
- traumatic fistula 319
- traumatic hematoma 30–31, 30
- traumatic injury
 age of patient 349
 bleeding 6–7, 6, 17–18, 17
 floor of the mouth 233
 jaws 253
 palate 286
 red lesions 110–111, 110
 swellings (diffuse/lumps) 133, 137–138, 137
 teeth 302
 trismus 74–75, 74
 ulcerations 163, 165–166, 165
- traumatic ulceration 215, 215
 differential diagnosis 344, 366
- Treponema* spp. 57, 62, 178
- trigeminal neuralgia 94–95, 94
 differential diagnosis 85, 86, 122
- trismus 221
 age of patient 359
 burn scarring 70–71, 70
 characterization and clinical appearance 67
 Fanconi anemia/oral carcinoma surgery 71–72, 71
 head injury 74–75, 74
 odontogenic infection 68–69, 68
 radio-chemotherapy 72–73, 72
- TSH *see* thyroid-stimulating hormone
- tuberculate supernumerary teeth 304
- tuberculosis
 calcifications 240
 differential diagnosis 215, 247, 248, 272
 risk factors 249
 yellow lesions 212
- tuberculous osteomyelitis 186
- tuberculous ulcer 285
- tuberous sclerosis 139
- Turner syndrome 278

- vascular malformations 13–14, 13
- verruca vulgaris 140
- verrucous carcinoma 144–145, 144
 bleeding 10–11, 10
 differential diagnosis 236
 prognosis 208
- verrucous leukoplakia 366

vesiculobullous lesions 179–194
 angina bullosa hemorrhagica 191–192, 191
 bullous pemphigoid 190–191, 190
 characterization and clinical appearance 179, 179
 cicatricial pemphigoid 188–189, 188
 common causes and conditions **179**
 contact stomatitis 183–184, 183
 drug-induced bullous disease 193–194, 193
 hand, foot and mouth disease 181–182, 181
 hemorrhagic bulla on anterior gingivae 185–186, 185
 pemphigus vulgaris 187–188, 187
 primary herpetic stomatitis 180–181, 180
 secondary herpetic stomatitis 184–185, 184
 vitamin A excess 267
 vitamin B12 deficiency 100–101, 100
 differential diagnosis 111–112, 217, 364
 malodor 57
 normal variations 344
 orofacial pain 89, 93
 taste deficits 150–151, 150, 154
 tongue erythematous lesions 326–327
 vitamin C deficiency
 bleeding 17
 blue and/or black lesions 28
 malodor 57
 vitamin D deficiency 18
 VZV *see* varicella-zoster virus

W

warfarin 17
 Warthin's tumor 273
 Wegener granulomatosis 13–14, 188
 white lesions 195–208
 age of patient 353–354, 353, 365–367, 365
 asymptomatic lesions on both buccal mucosae 226–227, 226

asymptomatic rough lesions on buccal mucosae 231–232, 231
 asymptomatic white plaques at commissures 198–199, 198
 characterization and clinical appearance 195, 195
 clinical tests, signs, and phenomena 373–374, 373, 385–386, 385
 common causes and conditions **195**
 desquamative yellow-white plaques 227–228, 227
 diffuse white lesion on palate 284–285, 284
 diffuse whitish plaques, xerostomia and burning sensation 202–203, 202
 extensive white plaque-like lesions and burning sensation 199–200, 199
 gingivae 241
 multiple varied lesion types 203–204, 203
 multiple whitish sloughs 197–198, 197
 removable white plaques and burning sensation 196–197, 196
 superficial lesions of floor of the mouth 234–235, 234
 superficial plaque on lower lip 205–206, 206
 thick lateral plaques on tongue and buccal mucosae 205, 205
 thick white plaque on buccal sulcus and hard palate 201–202, 201
 two white plaques on floor of mouth, palpable lymph nodes 207–208, 207
 white sponge nevus 284

X

xanthomas 275, 334
 xeroderma pigmentosum 202, 213
 xerostomia
 characterization and clinical appearance 115
 clinical tests, signs, and phenomena 371–372, 371

common causes and conditions **116**
 diabetes and drug-induced 126–127, 126
 malodor 55–56, 58, 62, 63
 Sjogren syndrome 128–129, 128
 smoking-induced 123–124, 123
 solifenacin-induced 127–128, 127
 taste deficits 153, 158
 trismus 73
 white lesions 202, 206

Y

yellow fever virus 153
 yellow hairy tongue 217, 217
 yellow lesions 209–221
 asymptomatic yellow patch at surgery site 210, 210
 characterization and clinical appearance 209, 209
 common causes and conditions **209**
 discoloration of face around upper lip 220–221, 220
 discoloration of oral mucosa 219–220, 219
 hard nodule on floor of the mouth 238–239, 238
 indurate palatal lesion 211–212, 211
 keratinaceous crust and desquamation of lower lip 216, 216
 multiple nodulo-ulcerated facial lesions 212–213, 212
 neck 274–275, 274
 normal variations 334–335, 334
 painful lesion on lateral margin of tongue 215, 215
 pseudomembranous plaques on commissures 214, 214
 scattered lesions with burning sensation and metallic taste 218–219, 218
 yellow tongue 217, 217

Z

Zimmermann-Laband syndrome (ZLS) 243
 zinc deficiency 154, 262, 264
