Preface *vii*

- 1 Enzymatic C—C Bond Formation by Aldol Reactions 1**
 - Aldolases 1
 - Class I Aldolases 1
 - Bioorganic Class I Aldolase Reactions 3
 - Class II Aldolases 9
 - Class II Aldolase Mimics 11
 - References 13
- 2 Fatty Acid- and Polyketide-Synthases – Claisen-Type C—C Bond Formation 15**
 - Biomimetic Decarboxylative C—C Bond Formation 20
 - References 23
- 3 Carbenium-Ion-Driven C—C Bond Formations – Terpenes 25**
 - Enzyme-like Cyclisations Involving Carbenium Ions 30
 - References 41
- 4 Oxidations Catalysed by Heme Complexes 43**
 - Monooxygenases 43
 - Cytochromes P450 45
 - Synthetic P450 Enzyme Models 51
 - Chloroperoxidase (CPO) 57
 - Synthetic Enzyme Mimics of Chloroperoxidase (CPO) 60
 - NO Synthase (NOS) 63
 - References 67

5	Oxidations Catalysed by Non-heme Complexes and Other Co-factors	69
	Methane Monooxygenase	69
	Active Site Analogues of Methane Monooxygenase	71
	Enzyme Mimics of Cu Monooxygenases	75
	Flavin-dependent Monooxygenases	78
	Enzyme Mimics of Baeyer–Villiger Monooxygenases	83
	References	95
6	C–H Activation	97
	References	110
7	Dioxygenases	111
	Metal Complexes Displaying Dioxygenase-like Reactivity	127
	References	134
8	Oxidoreductases	137
	Cytochrome c Oxidase	148
	References	150
9	Synthetic Systems That Mimic Certain Aspects of Oxidoreductases	153
	References	173
	Index	175
