

Contents

Contributing authors — IX

Part I: Fundamentals

Luísa C. Schetinger, Marcele L. Nörnberg, Patrícia A. Caetano, Leila Q. Zepka

Chapter 1

A timeline on microalgal biotechnology — 3

Melih Onay

Chapter 2

Scope of the microalgae market: a demand and supply perspective — 19

Rosangela Rodrigues Dias, Adriane Terezinha Schneider,

Mariane Bittencourt Fagundes

Chapter 3

Challenges and opportunities for microalgae biotechnology development — 41

Emmanuel Manirafasha, Theoneste Ndikubwimana, Hanqing Fu, Mao Lin,

Liangliang Zhang, Keju Jing

Chapter 4

Major bottlenecks in industrial microalgae-based facilities — 55

Calvin Lo, Rene H. Wijffels, Iulian Boboescu, A. Kazbar, Michel H. M. Eppink

Chapter 5

Multimethod and multiproduct microalgae biorefineries: industrial scale feasibility: eutectic solvents as a novel extraction system for microalgae biorefinery — 67

Samara C. Silva, Madalena M. Dias, M. Filomena Barreiro

Chapter 6

What is next in microalgae research — 81

Diva S. Andrade, Tiago Pellini, Karla C. T. T. Rodrigues, Danilo A. Silvestre,

Heder Asdrubal Montañez Valencia, Jerusa S. Andrade,

Freddy Zambrano Gavilanes, Tiago S. Telles

Chapter 7

Microalgae supply chains — 107

Part II: Process integration applied to microalgae-based systems

Ihana A. Severo, Diego de O. Corrêa, Wellington Balmant, Juan C. Ordonez, André B. Mariano, José V. C. Vargas

Chapter 8

Energy and heat integration applied to microalgae-based systems — 133

Jalelys Liceth Leones-Cerpa, Eduardo Luis Sánchez-Tuirán, Karina A. Ojeda-Delgado

Chapter 9

Mass integration applied to microalgae-based systems — 147

Alberto Reis, Tiago F. Lopes

Chapter 10

Water integration applied to microalgae-based systems — 165

Akhil Rautela, Shweta Rawat, Indrajeet Yadav, Agendra Gangwar, Sanjay Kumar

Chapter 11

Process integration opportunities applied to microalgae biomass production — 183

Part III: Process intensification applied to microalgae-based processes

Carlos Eduardo Guzmán-Martínez, Juan Manuel Vera-Morales, Efraín Quiroz-Pérez, Araceli Guadalupe Romero-Izquierdo, Claudia Gutiérrez-Antonio

Chapter 12

Process intensification applied to bioreactor design — 213

Priya Yadav, Parag R. Gogate

Chapter 13

Process intensification approaches applied to the downstream processing of microalgae production — 241

Part IV: Process integration and process intensification strategies applied to microalgae-based products

Florin Barla, Massimiliano Lega, Sandeep Kumar

Chapter 14

Process integration opportunities applied to microalgae biomass production — 271

Júlio Cesar de Carvalho, Denisse Tatiana Molina Aulestia, Juliana Cardoso, Hissashi Iwamoto, Maria Clara Manzoki, Carlos R. Soccol

Chapter 15

Process integration opportunities applied to microalgae specialty chemicals production — 299

Jingyan Hu, Weiqi Fu

Chapter 16

Process intensification opportunities applied to the production of microalgae specialty chemicals — 325

Jonathan S. Harris, Anh N. Phan

Chapter 17

Process integration opportunities applied to microalgae biofuels production — 349

Aparna Gautam, Sushil Kumar, Dipesh S. Patle

Chapter 18

Process intensification opportunities in the production of microalgal biofuels — 377

Rafaela Basso Sartori, Eduardo Jacob-Lopes

Chapter 19

Process integration approaches applied to carbon dioxide capture and use from microalgae — 409

Olatunde Akinbuja, Kamelia Boodhoo, Sharon Velasquez Orta

Chapter 20

Algae-based bioelectrochemical systems — 425

VIII — Contents

Mariany Costa Deprá, Leila Queiroz Zepka, Eduardo Jacob-Lopes

Chapter 21

Process integration and process intensification approaches as enhancers of industrial sustainability in microalgae-based systems — 441

Ahmad Farhad Talebi, Sara Kabirnatj, Elham Soleimani

Chapter 22

Patents related to process integration and process intensification applied to microalgae-based systems — 455

Mehak Kaur, Hishita Peshwani, Mayurika Goel

Chapter 23

A brief mapping of patents in microalgae-based systems — 479

Index — 507
