

Table of Contents

1	Foreword	1		
1.1	About the authors	1		
1.2	Acknowledgements	1		
1.3	How to use this atlas	2		
1.4	Changing the approach to the clinical measurement of spasticity.....	3		
2	Introduction	7		
2.1	Introduction to diagnostic nerve blocks	7		
2.2	History of motor blocks and recommendations in France	11		
2.3	The need for a multidisciplinary collaborative Atlas	13		
2.4	Patient-centered collaborative care in neuro-orthopedics	14		
2.5	The role of the anesthesiologist in interdisciplinary spasticity care	17		
2.6	Spastic positions of the limbs	17		
3	Ultrasound principles	27		
3.1	Ultrasound transducer orientation	27		
3.2	The nerve, artery, vein spatial relationship	29		
3.3	Surface landmarks for the nerve branches are variable	32		
3.4	Individual anatomy is variable. Landmarks are key	33		
3.5	Surgical neurectomy	34		
3.6	Three-dimensional ultrasound nerve imaging	35		
3.7	Evaluating muscle changes with ultrasound in spasticity: use of the Modified Heckmatt Scale	37		
3.8	Tracking a nerve proximal to distal: median nerve from pronator teres to the intrinsic muscles	40		
3.9	Tracking the injection fluid	42		
3.10	Stimulator setup	44		
3.11	Ergonomics in ultrasound-guided diagnostic nerve blocks for spasticity	45		
4	Nerve-targeted procedures	53		
4.1	Chemoneurolysis with phenol and ethanol	53		
4.2	Cryoneurolysis – a new percutaneous minimally invasive therapy for the treatment of the spastic limb	60		
4.3	The ViVe algorithm. Using diagnostic nerve blocks to manage new-onset, post-stroke hemiplegic shoulder pain	65		
4.4	Neurectomy for the spastic upper limb	67		
5	Nerve-targeted procedures for the upper limb	73		
5.1	The adducted internally rotated shoulder	73		
5.2	Pectoralis muscles and neurovascular structures	74		
5.3	Lateral pectoral nerve: pectoralis major muscle	76		
5.4	Medial pectoral nerve: pectoralis minor muscle	78		
5.5	Thoracodorsal nerve: latissimus dorsi muscle	80		
5.6	The spastic flexed elbow	82		
5.7	Musculocutaneous nerve: biceps brachii muscle	86		
5.8	Musculocutaneous nerve: brachialis muscle ...	88		
5.9	Radial nerve: brachioradialis muscle	90		
5.10	The wrist and fingers: anatomical guide and the new use of phenol nerve block in the distal upper extremity	92		
5.11	Anatomy of the motor branches of the upper limb muscles mostly involved in spasticity	99		
5.12	Assessment of the spastic hand using diagnostic nerve blocks	103		
5.13	Median nerve: pronator teres muscle	104		
5.14	Median nerve: flexor carpi radialis muscle	106		
5.15	Median nerve: flexor digitorum superficialis muscle	108		
5.16	Median nerve: anterior interosseous nerve to flexor digitorum profundus muscle	110		
5.17	Median Nerve: anterior interosseous nerve to flexor pollicis longus muscle	112		
5.18	Median nerve: anterior interosseous nerve to pronator quadratus muscle	114		
5.19	Median to Intrinsic: lumbricals 1–2, abductor pollicis brevis, flexor pollicis brevis, opponens pollicis	116		
5.20	Ulnar nerve: flexor carpi ulnaris muscle	118		
5.21	Ulnar nerve: flexor digitorum profundus muscle	120		
5.22	Ulnar nerve: intrinsic muscles of deep ulnar branch – part 1	122		
5.23	Ulnar nerve: intrinsic muscles of deep ulnar branch – part 2	124		

Table of Contents

5.24	Radial nerve: extensor carpi radialis longus and brevis muscles	126
5.25	Radial nerve: extensor carpi ulnaris muscle	128
5.26	Radial nerve: extensor digitorum muscle	130
6	Nerve-targeted procedures for the lower limb	132
6.1	The obturator nerve	132
6.2	Obturator nerve: anterior division to adductor longus muscle	134
6.3	Obturator nerve: anterior division to adductor brevis muscle	136
6.4	Obturator nerve: anterior division to gracilis muscle	138
6.5	Obturator nerve: anterior division to pectineus muscle	140
6.6	Obturator nerve: posterior division to adductor magnus muscle	142
6.7	The femoral nerve	144
6.8	Femoral nerve: rectus femoris muscle	146
6.9	The sciatic nerve	148
6.10	Sciatic nerve: biceps femoris muscle	150
6.11	Sciatic nerve: semimembranosus muscle	152
6.12	Sciatic nerve: semitendinosus muscle	154
6.13	The role of diagnostic nerve blocks for management of spastic foot	156
6.14	Ultrasound of the tibial nerve	158
6.15	Surgical anatomy of the tibial nerve	159
6.16	Trunk and branches of the tibial nerve	160
6.17	Tibial nerve: gastrocnemius muscle	162
6.18	Tibial nerve: soleus muscle	164
6.19	Tibial nerve: tibialis posterior muscle	166
6.20	Tibial nerve: flexor digitorum longus muscle	168
6.21	Tibial nerve to intrinsic: the medial and lateral plantar nerves	170
	Index	172
