Foreword — V

Preface — VII

1 Introduction — 3

2 Physical quantities — 14

- 2.1 Quantity, unit, quantity value — 14
- 2.2 Systems of quantities — 15
- 2.3 Symbols for physical quantities — 17
- 2.4 Calculating with quantity values — 18

3 Units — 19

- 3.1 Systems of units — 19
- 3.2 The international system of units (SI) — 19
- 3.3 Definition of the base units — 21
- 3.4 Derived units — 25
- 3.5 Prefix names and prefix symbols — 28
- 3.6 Units in the SI that are not SI units — 30
- 3.7 Units of logarithmic ratio quantities — 31
- 3.8 Calculating with units — 35
- 3.9 Exact physical constants — 37

4 Notation of numbers — 39

5 Mathematical symbols — 41

- 5.1 General symbols — 41
- 5.2 Letter symbols — 43
- 5.3 Trigonometric and hyperbolic functions — 44
- 5.4 Periodically time-dependent quantities — 45
- 5.5 Vector- and tensor calculus — 46
- 5.6 Matrix calculus — 47
- 5.7 Complex quantities — 47
- 5.8 Symbols for set theory — 48
- 5.9 Mathematical logic — 49

6 Symbols of physical quantities — 50

- 6.1 Space and time — 51

6.2	Mechanics —	53
6.3	Statistical physics —	55
6.4	Thermodynamics —	57
6.5	Electricity and magnetism —	59
6.6	Radiation and light —	61
6.7	Acoustics —	63
6.8	Quantum mechanics —	64
6.9	Atomic and nuclear physics —	66
6.10	Solid state physics —	68
6.11	Molecular spectroscopy —	72
6.12	Chemical physics —	74
6.13	Plasma physics —	76
6.14	Characteristic numbers —	78
7	Elements, nuclides and particles —	81
8	Quantum States —	88
8.1	General rules —	88
8.2	Atomic spectroscopy —	88
8.3	Molecular spectroscopy —	89
8.4	Nuclear spectroscopy —	89
8.5	Spectroscopic transitions —	90
8.6	Nomenclature in nuclear physics —	91
A	Conversions to US Customary Units —	94
	Bibliography —	97
	Index —	99
