About the editors — VII

Preface — IX

Acknowledgments — XI

List of contributing authors — XV

Poonam Bansal, Anil K. Sharma, Raman Kumar, Preeti Chanalia,
and Bhupesh Gupta

Chapter 1

Serine proteases: classification, catalytic mechanism, types, and industrial applications — 1

Priti, Poonam Bansal, Sonali Sangwan, and Shweta Dhanda

Chapter 2

Serine proteases and respiratory disorders — 17

Raman Kumar, Poonam Bansal, and Praveen Kumar

Chapter 3

Role of serine proteases in cancer progression and metastasis — 33

Raman Kumar, Poonam Bansal, and Praveen Kumar

Chapter 4

Role of serine proteases in lung diseases: a view from acute and chronic lung infection complications — 51

Semim Akhtar Ahmed, Anuj Kumar Borah, and Jagat C. Borah

Chapter 5

Inhibition of the serine exopeptidase DPP-IV as a means of mitigation of diabetic nephropathy — 65

Preeti Chanalia, Poonam Bansal, and Dimpi Gandhi

Chapter 6

Serine proteases in arthritis — 83

Kapil Singh Narayan, Reenu Kashyap, Raman Kumar, Anil K. Sharma, Anil Panwar, and Varruchi Sharma

Chapter 7

Serine protease HtrA: a promising therapeutic target to develop antimicrobial therapy — 101

Shweta Dhanda, Kiran Bala, Priti, Anil K. Sharma, Anil Panwar, and Varruchi Sharma

Chapter 8

Potential targeted therapy for SARS-CoV-2: host serine proteases — 109

Shweta Dhanda, Kiran Bala, Anil K. Sharma, Anil Panwar, and Varruchi Sharma

Chapter 9

Role of serine proteases in fertility — 129

Sonali Sangwan, Shikha Yashveer, Mahiti Gupta, Priti, Himani Punia, Jayanti Tokas, and Bhupesh Gupta

Chapter 10

Serine protease inhibitors and its therapeutics — 141

Index — 153
