

1. Insect histology	9
1.1 <i>Histological techniques</i>	9
1.2 <i>Sample materials in entomology</i>	10
1.3 <i>Killing of insects</i>	11
1.4 <i>Processing of histological samples</i>	15
2. Fixation	17
2.1 <i>Introduction.....</i>	17
2.2 <i>Execution of tissue fixation.....</i>	19
2.3 <i>Fixation mechanisms and factors influencing fixation success.....</i>	22
2.3.1 <i>Fixation mechanisms</i>	22
2.3.2 <i>Factors influencing fixation</i>	23
2.4 <i>Fixatives</i>	24
2.4.1 <i>Single substance fixatives</i>	24
2.4.2 <i>Fixation mixtures</i>	32
2.5 <i>Sample oriented fixation strategies.....</i>	39
2.5.1 <i>Fixation of whole insect imagines and pupae</i>	39
2.5.2 <i>Fixation of insect eggs and larvae</i>	40
2.5.3 <i>Fixation of single insect organs</i>	42
2.5.4 <i>Fixation of cytological smears</i>	42
2.6 <i>Method oriented fixation strategies</i>	43
2.6.1 <i>Fixation for histochemistry</i>	43
2.6.2 <i>Fixation for immunohistochemistry</i>	44
2.6.3 <i>Fixation for molecular analysis</i>	45
2.7 <i>Removal of fixation precipitates</i>	48
2.8 <i>Removal of the fixative.....</i>	49
3. Dissection	51
3.1 <i>Equipment.....</i>	51
3.2 <i>Execution of dissection</i>	52
4. Softening of sclerotized cuticle	57
4.1 <i>Insect cuticle</i>	57

4.2	<i>Softening by acids and chelators</i>	59
4.2.1	Decalcification by acids	60
4.2.2	Softening by chelators	61
4.3	<i>Special softening methods</i>	61
4.3.1	Method for pupae, larvae and imagines	61
4.3.2	Softening with KOH	62
4.3.3	Softening with chitinase	63
4.3.4	Softening of paraffin-embedded samples	63
4.4	<i>General notes</i>	64
5.	Embedding	65
5.1	<i>Dehydration</i>	65
5.1.1	Dehydrators	66
5.1.2	Dehydration procedure	66
5.2	<i>Intermedia</i>	69
5.3	<i>Embedding moulds and sample orientation</i>	71
5.4	<i>Pre-embedding in agar</i>	75
5.5	<i>Embedding media</i>	77
5.6	<i>Embedding in paraffin</i>	77
5.6.1	Paraffin wax	77
5.6.2	Performing paraffin embedding	79
5.7	<i>Embedding in acrylates</i>	82
5.7.1	Embedding in Technovit 9100	82
5.7.2	Embedding in Technovit 8100	85
5.7.3	Embedding in Unicryl	90
5.7.4	Embedding in LR white	92
5.7.5	Butyl- and methyl methacrylates	94
5.7.6	Methacrylate paraffin mixtures	99
5.8	<i>Epoxy resin embedding</i>	101
5.8.1	Embedding in Araldite	102
5.8.2	Embedding in Epon	104
5.8.3	Embedding in Glycid ether 100	105
5.8.4	Embedding in Spurr-medium	107
5.8.5	Embedding in Durcupan R (Fluka)	108
5.8.6	Embedding in Durcupan (ACM)	109
6.	Sectioning techniques	113
6.1	<i>Microtome</i>	113
6.1.1	Sledge microtome	114
6.1.2	Rotary microtome	114

6.2	<i>Microtome knives</i>	116
6.2.1	Disposable blades	117
6.2.2	Glass knives.....	117
6.2.3	Diamond knives.....	121
6.2.4	Knife angles.....	121
6.3	<i>Microtomy – the use of the microtome</i>	127
6.3.1	Production of paraffin sections	127
6.3.2	Production of plastic sections	129
6.3.3	Other sectioning techniques.....	139
6.4	<i>Preparation of microscope slides</i>	139
6.4.1	Cleaning of microscope slides.....	140
6.4.2	Coatings for microscope slides	140
7.	Treatment of sections before staining	143
7.1	<i>Pre-treatment for paraffin sections</i>	143
7.2	<i>Pre-treatment for acrylic sections</i>	144
7.3	<i>Pre-treatment for epoxy resin sections</i>	145
7.4	<i>Fixation of smears on microscopic slides</i>	147
7.5	<i>Post-fixation of paraffin sections</i>	148
7.6	<i>Removal of fixation precipitates from sections</i>	148
8.	Staining methods	151
8.1	<i>Introduction</i>	151
8.1.1	Dyes.....	152
8.1.2	Theory of staining processes.....	154
8.1.3	Definitions in staining theory and practice.....	156
8.1.4	General instructions to the methods.....	158
8.2	<i>Staining methods for paraffin sections</i>	159
8.2.1	Overview staining methods.....	160
8.2.2	Special methods for staining connective tissue.....	162
8.2.3	Special methods for staining fibres	170
8.2.4	Special methods for staining nerve tissue	174
8.3	<i>Histochemistry on paraffin sections</i>	176
8.3.1	Carbohydrates.....	176
8.3.2	Iron	180
8.3.3	Nucleic acids	182
8.3.4	Lipids.....	183
8.4	<i>Staining methods for acrylate sections</i>	184
8.4.1	Staining methods for butyl- and methyl methacrylate	185
8.4.2	Staining methods for hydroxyethyl methacrylate.....	188

8.5	<i>Staining methods for epoxy resin sections</i>	189
8.5.1	Staining methods.....	189
8.6	<i>Cytological assessment</i>	202
8.6.1	Staining methods in cytology	202
8.7	<i>Microbiological assessment</i>	206
8.7.1	Staining methods in microbiology	206
9.	Treatment of sections after staining	217
9.1	<i>Non-aqueous mounting media</i>	217
9.2	<i>Aqueous mounting media</i>	218
9.2.1	Mounting media for fluorescence microscopy	220
9.2.2	Extending shelf life of the preparations.....	220
9.3	<i>Mounting of microscopic preparations</i>	221
9.3.1	Mounting with non-aqueous mounting media.....	221
9.3.2	Mounting with aqueous mounting media	222
9.4	<i>Removal of cover glasses</i>	223
10.	Recipes	225
11.	Figures and tables	227
11.1	<i>Figures</i>	227
11.2	<i>Tables</i>	228
12.	References	231
