

Contents

1	Introduction	1
2	Introduction to Materials and Substance Systems	3
2.1	Single Crystals	3
2.1.1	Chemical Deviation From Stoichiometry	4
2.1.2	Structural Defects	5
2.2	Ceramics	11
2.3	Material Systems	13
2.3.1	Example System $\text{CaO-Al}_2\text{O}_3\text{-SiO}_2$	14
2.4	Material Properties	19
2.4.1	Mechanical Properties	19
2.4.2	Thermal Properties	20
	References	21
3	Inorganic Non-metallic Raw Materials	23
3.1	Natural Stone	25
3.1.1	Composition and Microstructure of Natural Stones	26
3.1.2	Physical-Technical Properties	27
3.1.3	Exploitation and Use of Natural Stone	31
3.2	Sand and Gravel	32
3.2.1	Formation and Types of Deposits	33
3.2.2	Mineral Composition and Chemical Properties	33
3.2.3	Granulometric Properties	35
3.2.4	Extraction and Processing	35
3.2.5	Use of Sands and Gravels in Industry	36
3.3	Clay Raw Materials	37
3.3.1	Structure and Classification of Clay Minerals	37
3.3.2	Refractory Clays	40
3.3.3	Coarse Ceramic Clays	41
3.3.4	Special Clays: Kaolin	41
3.3.5	Special Clays: Bentonite	42
3.4	Quartz and SiO_2 Raw Materials	43
3.4.1	The SiO_2 System	44
3.4.2	Real Structure of Quartz	45

3.4.3	Geological Formation of Quartz Raw Materials	47
3.4.4	Industrial Use	49
3.5	Feldspar	50
3.5.1	Structure of Feldspar Minerals	51
3.5.2	Feldspar Raw Materials	53
3.5.3	Geological Conditions of Formation and Feldspar Deposits	54
3.6	Mica Minerals	55
3.7	Carbonates	57
3.7.1	Unburnt Carbonate Rocks	58
3.7.2	Burnt Lime, Sintered Dolomite and Sintered Magnesite	59
3.7.3	Limestone for Cement Production	60
3.7.4	Deposits of Carbonate Rocks	61
3.8	Sulphates	61
3.9	Zeolites	63
3.9.1	Structure	63
3.9.2	Properties and Applications	64
3.9.3	Natural Occurrence and Synthesis	64
3.10	Mineral Fillers	65
3.11	Gemstones	67
3.11.1	Classification and Formation of Precious Stones	67
3.11.2	Gemstone Properties and Methods of Determination	69
3.11.3	Gemstone Processing	71
3.12	Evaporites	72
3.13	Other Industrial Minerals	73
3.13.1	Fluorite	74
3.13.2	Barite	74
3.13.3	Graphite	74
3.13.4	Wollastonite	75
3.13.5	Zircon/Baddeleyite	75
3.13.6	Garnet Group	75
3.13.7	Olivine	76
3.13.8	Apatite	76
	References	77
4	Ceramic Materials	79
4.1	Fine Ceramic Silicate Materials	81
4.1.1	Raw Materials for Silicate Fine Ceramics	81
4.1.2	Rheological Behaviour of Clay-Water Mixtures	82
4.1.3	Shaping of Ceramic Bodies	84
4.1.4	The Ceramic Firing Process	85
4.1.5	Fine Ceramic Silicate Materials	86

4.2	Coarse-Ceramic Silicate Materials	93
4.3	Glazes	95
	References	95
5	Glass	97
5.1	The Glass State	98
5.2	Structure of Glasses	100
5.3	Glass Materials and Glass Production	103
5.4	Glass Properties	106
5.5	Glass Ceramics	110
	References	112
6	Building Materials and Binders	113
6.1	Building Materials	113
6.2	Binders	113
6.2.1	Gypsum-Based Binders	114
6.2.2	Limestone-Based Binders	115
6.2.3	Hydration of Cement	121
	References	122
7	Refractory Materials	125
7.1	Refractory Fabric Systems	125
7.1.1	The Crystalline Normal Pressure Modifications of SiO_2	125
7.1.2	The Binary System $\text{SiO}_2\text{-Al}_2\text{O}_3$	127
7.1.3	The Binary System CaO-MgO	128
7.2	Classification of Refractory Materials	128
7.2.1	Terminology	128
7.2.2	Fireclay Bricks	130
7.2.3	Silica Bricks	132
7.2.4	Basic Refractory Materials	136
7.3	Test Methods of Refractory Materials	137
7.3.1	Abrasion Resistance	137
7.3.2	Alkali Oxide Bursting	137
7.3.3	Refractoriness Under Load	138
7.3.4	Thermal Expansion Under Load	138
7.3.5	Elasticity Modulus – E Modulus	139
7.3.6	Gas Permeability	139
7.3.7	Hot Bending Strength/Hot Compressive Strength	139
7.3.8	Porosity and Pore Size Distribution	139
7.3.9	Thermal Shock Resistance	140
7.3.10	Thermal Expansion	141
7.3.11	Thermal Conductivity	141
