Preface — V

List of contributing authors — XVII

Toyese Oyegoke, Fadimatu N. Dabai, Saidu M. Waziri, Adamu Uzairu and Baba Y. Jibril

1 Computational study of propene selectivity and yield in the dehydrogenation of propane via process simulation approach — 1

- 1.1 Introduction — 2
- 1.2 Materials and methods — 3
 - 1.2.1 Process modeling and simulations — 3
 - 1.2.2 Process optimization studies — 4
 - 1.2.3 Impact of feed purity on the dehydrogenation process — 5
- 1.3 Results and discussions — 5
 - 1.3.1 Modeling the propane dehydrogenation process — 5
 - 1.3.2 Process optimization studies — 9
 - 1.3.3 Impact of feed purity on the dehydrogenation process — 12
- 1.4 Conclusions — 13
- References — 14

John P. Canal

2 Computational chemistry in the undergraduate inorganic curriculum — 17

- 2.1 Introduction — 17
- 2.2 Computational chemistry module — 18
 - 2.2.1 Module Goals/Plan — 18
 - 2.2.2 Instructional Videos and Manual — 19
 - 2.2.3 Assignments — 22
- 2.3 Results and discussion — 26
- 2.4 Conclusions — 31
- References — 32

Francisca Claveria-Cádiz and Aleksey E. Kuznetsov

3 Computational design of the novel building blocks for the metal-organic frameworks based on the organic ligand protected Cu₄ cluster — 35

- 3.1 Introduction — 36
- 3.2 Computational details — 37
- 3.3 Results and discussion — 38
 - 3.3.1 Energetics and structural features — 38
 - 3.3.2 Frontier molecular orbitals and NPA charge — 42
 - 3.3.3 Molecular electrostatic potential (MEP) plots — 45
 - 3.3.4 GRP analysis — 46

3.4	Conclusions and perspectives — 47
	References — 48

Nadjah Belattar, Ratiba Mekkiou, Adel Krid and Abdelhamid Djekoun

4	Computational investigation of <i>Arbutus serratifolia</i> Salisb molecules as new potential SARS-CoV-2 inhibitors — 51
4.1	Introduction — 52
4.2	Part 1: Materials and methods — 53
4.2.1	Phytochemical study — 53
4.2.2	In-silico assessment — 69
4.2.3	Ligand optimization — 69
4.3	Results and discussions — 71
4.3.1	Drug likeness and ADMET calculations — 71
4.3.2	Docking study — 71
4.4	Conclusions — 79
	References — 79

Rudo Zhou, Pamhidzai Dzomba and Luke Gwatidzo

5	Formulation of a herbal topical cream against <i>Tinea capitis</i> using flavonoids glycosides from <i>Dicerocaryum senecioides</i> and <i>Diospyros mespiliformis</i> — 81
5.1	Introduction — 81
5.2	Materials and methodology — 82
5.2.1	47 Chemicals and reagents — 82
5.2.2	Plant material — 83
5.2.3	Preparation of cream formulations — 83
5.2.4	Preliminary stability tests — 83
5.2.5	Accelerated stability test — 84
5.2.6	Long term stability tests — 84
5.2.7	<i>In vitro</i> antifungal assay — 85
5.2.8	Microbiological assessment — 85
5.2.9	Clinical trials — 85
5.2.10	Data analysis — 86
5.3	Results — 86
5.3.1	Stability tests results — 86
5.3.2	In vitro antifungal assay — 86
5.3.3	Microbial assessment — 86
5.3.4	Clinical trials results — 86
5.4	Discussion — 87
5.5	Conclusion — 95
	References — 95

Yetunde Bunmi Oyeyiola and Beatrice Olutoyin Opeolu

6 Immediate effects of atrazine application on soil organic carbon and selected macronutrients and amelioration by sawdust biochar pretreatment — 99

- 6.1 Introduction — **100**
- 6.2 Materials and methods — **102**
 - 6.2.1 Description of the experimental soil — **102**
 - 6.2.2 Biochar preparation — **102**
 - 6.2.3 Treatments, design, and experimental set up — **103**
 - 6.2.4 Data collection — **104**
 - 6.2.5 Data analysis — **105**
- 6.3 Results — **105**
 - 6.3.1 The pH and nutrient characteristics of the biochar produced and tested — **105**
 - 6.3.2 Immediate effects of atrazine and biochar pretreatment on soil organic carbon — **106**
 - 6.3.3 Immediate effects of atrazine and biochar pretreatment on soil pH — **107**
 - 6.3.4 Immediate effects of atrazine and biochar pretreatment on soil available P — **108**
 - 6.3.5 Immediate effects of atrazine and biochar pretreatment on exchangeable bases in the soil — **109**
 - 6.3.6 Immediate effects of atrazine and biochar pretreatment on dry biomass weight of maize seedlings — **110**
 - 6.3.7 Regression analysis indicating contributions of selected biochar nutrient properties to organic carbon and macronutrient contents in the atrazine-treated soil — **110**
- 6.4 Discussion — **115**
- 6.5 Conclusions — **117**
- References — **118**

Benton Otieno, Mervyn Khune, John Kabuba and Peter Osifo

7 Process configuration of combined ozonolysis and anaerobic digestion for wastewater treatment — 121

- Abbreviations — **122**
- 7.1 Introduction — **122**
- 7.2 Methodology — **123**
 - 7.2.1 Materials — **123**
 - 7.2.2 Distillery wastewater and waste activated sludge — **124**
 - 7.2.3 Ozonolysis pre-treatment process for WAS and DWW — **124**
 - 7.2.4 Anaerobic digestion of WAS and DWW — **125**
 - 7.2.5 Ozonolysis post-treatment of anaerobically digested DWW — **126**
 - 7.2.6 Physical and chemical analysis — **126**
- 7.3 Results and discussion — **126**

7.3.1	Characteristics of WAS and DWW before and after ozonolysis pre-treatment —	126
7.3.2	Effect of ozone pre-treatment on anaerobic digestion of WAS —	127
7.3.3	Effect of ozone pre-treatment on anaerobic digestion of DWW —	128
7.3.4	Ozonolysis of anaerobically digested DWW (post-treatment) —	130
7.4	Conclusions —	133
	References —	134

Patrick Leonard Omokpariola, Patrice A. C. Okoye, Victor U. Okechukwu and Daniel Omeodisemi Omokpariola

8 Concentration levels and risk assessment of organochlorine and organophosphate pesticide residue in selected cereals and legumes sold in Anambra State, south-eastern Nigeria — 137

8.1	Introduction —	138
8.2	Materials and methods —	139
8.2.1	Sample collection and preparation —	139
8.2.2	Chemicals —	140
8.2.3	Extraction of pesticide residues from samples —	140
8.2.4	Clean-up —	140
8.2.5	Analysis of organochlorine and organophosphate pesticides —	140
8.2.6	Quality control —	141
8.2.7	Statistical analysis —	141
8.2.8	Pesticide toxicity Index —	141
8.2.9	Health and exposure risk assessment —	142
8.3	Results and discussion —	143
8.3.1	Mean Concentration of organochlorine and organophosphate pesticides residues —	143
8.3.2	Pesticide toxicity index —	148
8.3.3	Health risk assessment —	150
8.4	Conclusions —	153
	References —	154

Babasanmi Oluwole Abioye, Aderonke Adetutu Okoya and Abimbola Bankole Akinyele

9 Adsorption of trichloroacetic acid from drinking water using polyethylene terephthalate waste carbon and periwinkle shells-based chitosan — 159

9.1	Introduction —	160
9.2	Material and methods —	161
9.2.1	Collection of materials —	161
9.2.2	Preparation of caustic alkali from cocoa husk ash —	161
9.2.3	Chemical activation of the carbon —	162
9.2.4	Preparation of chitosan from Periwinkle shell —	163

9.2.5	Determination of chitosan yield —	163
9.2.6	Determination of moisture content of chitosan —	164
9.2.7	Determination of ash content of chitosan —	164
9.2.8	Modification of PET activated carbon —	164
9.2.9	Characterization of activated PET and chitosan modified activated PET carbon —	165
9.2.10	Trichloroacetic acid analysis —	165
9.2.11	Batch adsorption experiment —	166
9.2.12	Water sampling for TCA analysis —	166
9.2.13	Recovery experiment for photometry determination of TCA standard —	166
9.2.14	Reusability potential of the adsorbent —	167
9.3	Results and discussion —	167
9.3.1	Cocoa husk ash —	167
9.3.2	Caustic alkali from cocoa husk ash —	167
9.3.3	Physicochemical properties of polyethylene terephthalate activated carbon (PETAC) —	168
9.3.4	Physico-chemical properties of chitosan from periwinkle shell —	168
9.3.5	Characterization of PET activated carbon and chitosan modified activated carbon with SEM-EDX before adsorption —	168
9.3.6	Functional groups of polyethylene terephthalate activated carbon (PETAC) and polyethylene terephthalate modified activated carbon (PETMAC) —	170
9.3.7	Characterization of water samples —	170
9.3.8	Recovery experiment for TCA photometric determination —	170
9.3.9	Parametric studies on the TCA removal from aqueous solution —	170
9.3.10	Adsorption of TCA from raw water and conventionally treated water —	174
9.3.11	Characterization of PETAC and PETMAC with SEM-EDX after adsorption —	175
9.3.12	Adsorption equilibrium isotherm —	177
9.3.13	Reusability potential of the adsorbent —	177
9.4	Conclusions —	178
	References —	178

Saheed O. Sanni, Samson O. Akpotu, Agnes Pholosi and Vusumzi E. Pakade

10 Comparative study of the photocatalytic degradation of tetracycline under visible light irradiation using $\text{Bi}_{24}\text{O}_{31}\text{Br}_{11}$ -anchored carbonaceous and silicates catalyst support — 181

10.1	Introduction —	182
10.2	Materials and methods —	183
10.2.1	Preparation of activated carbon from zinc chloride, and phosphoric acid (ACZ, and ACH) from carbonized material (CM) —	183
10.2.2	Preparation of MCM-41 and SBA-15 —	183
10.2.3	Preparation of BOB photocatalysts —	184

10.2.4	Materials characterization —	184
10.3	Result and discussion —	185
10.3.1	Structural, morphological, and optical characteristics —	185
10.3.2	Charge transfer properties —	188
10.3.3	Photocatalytic activity —	188
10.4	Conclusions —	189
	References —	190

Siphumelele T. Mkhondwane and Viswanadha Srirama Rajasekhar Pullabhotla

11 Synergistic effect in bimetallic gold catalysts: recent trends and prospects — 193

11.1	Introduction —	193
11.2	Synthesis of Au bimetallic catalysts —	194
11.2.1	Controlling the particle size and composition —	195
11.2.2	Controlling the morphology of the catalyst —	196
11.2.3	The role of the support material —	201
11.3	Catalysts characterization —	201
11.4	Applications —	207
11.4.1	Oxidation of hydrocarbons —	207
11.4.2	Fuel cell processes —	209
11.4.3	Oxidation of biomass derived products —	210
11.4.4	Photocatalytic oxidation —	212
11.5	Conclusion and outlook —	213
	References —	214

Ntandokazi Mabungela, Ntaote David Shooto, Fanyana Mtunzi and Eliazer Bobby Naidoo

12 Simultaneous removal of methylene blue, copper Cu(II), and cadmium Cd(II) from synthetic wastewater using fennel-based adsorbents — 223

12.1	Introduction —	223
12.2	Resources and procedures —	224
12.2.1	Resources —	224
12.2.2	Method used to produce the adsorbents —	225
12.2.3	Methods of adsorption preparation —	225
12.2.4	Point zero charge process —	226
12.2.5	Reusability procedure —	226
12.2.6	Adsorption data management —	226
12.3	Characterization of the adsorbents —	227
12.4	Results and discussion —	227
12.4.1	Ultraviolet-Visible spectroscopy results —	227
12.4.2	X-ray crystallography results —	228

12.4.3	Scanning electron microscope and energy dispersive X-ray analysis results — 228
12.4.4	Fourier transform infrared spectroscopy results — 229
12.4.5	Point zero charge (pH(pzc)) — 230
12.4.6	Effect of concentration — 231
12.4.7	Isotherm studies — 232
12.4.8	Effect of time — 232
12.4.9	Kinetic model studies — 234
12.4.10	Effect of temperature — 234
12.4.11	Thermodynamics studies — 234
12.4.12	Effect of pH — 234
12.4.13	Proposed mechanism reaction — 236
12.4.14	Reusability studies — 236
12.4.15	Comparison studies of the $q_{e_{max}}$ of the current adsorbents with previous studies — 238
12.5	Post adsorption results — 238
12.5.1	FTIR results after adsorption — 238
12.6	Conclusions — 239
	References — 240

13 The investigation of the physical properties of an electrical porcelain insulator manufactured from locally sourced materials — 243

13.1	Introduction — 244
13.2	Materials — 245
13.2.1	Characterization — 245
13.2.2	Method — 245
13.2.3	Water absorption — 246
13.2.4	Linear shrinkage — 247
13.2.5	Apparent porosity — 247
13.2.6	Bulk density — 247
13.3	Result and discussion — 248
13.3.1	X-ray fluorescence and X-ray diffraction analysis of the clay — 248
13.3.2	Apparent porosity — 249
13.3.3	Water absorption — 250
13.3.4	Linear shrinkage — 251
13.3.5	Bulk density — 251
13.4	Conclusion — 252
	References — 253

Jean Momeni and Bathelemy Ngameni

14 A new sphingoid derivative from *Acacia hockii* De Wild (Fabaceae) with antimicrobial and insecticidal properties — 255

- 14.1 Introduction — 256
- 14.2 Material and methods — 257
 - 14.2.1 General experimental procedure — 257
 - 14.2.2 Plant material — 257
 - 14.2.3 Extraction and isolation — 257
 - 14.2.4 Evaluation of the antimicrobial activity — 258
 - 14.2.5 Insecticidal test of the hexane, acetone, methanol extracts and compound 1 — 259
- 14.3 Results and discussion — 259
 - 14.3.1 Identification of compound 1 — 259
 - 14.3.2 Result of the insecticide test on *C. maculatus* — 262
 - 14.3.3 Results of the antimicrobial test — 263
- 14.4 Conclusion — 267
- References — 267

15 Protection of wood against bio-attack and research of new effective and environmental friendly fungicides — 269

- 15.1 Introduction — 270
- 15.2 Materials and methods — 271
- 15.3 Preparation of soluble soap — 272
- 15.4 Production of metallic soap [copper (II) soap] — 272
- 15.5 Synthesis of urea complexes from metallic soap — 272
- 15.6 Synthesis of thiourea complexes from metallic soap — 273
- 15.7 Physicochemical parameters of the synthesized compounds — 273
 - 15.7.1 Melting point — 273
 - 15.7.2 Moisture content — 274
 - 15.7.3 Determination of ash content — 274
 - 15.7.4 Determination of sulphated ash contents — 274
 - 15.7.5 Solubility test — 275
 - 15.7.6 Colour — 275
 - 15.7.7 Absorption spectral analysis — 275
 - 15.7.8 Infrared spectroscopy analysis — 275
 - 15.7.9 Scanning electron microscope coupled with energy-dispersive X-ray spectroscopy (SEM/EDS) — 275
- 15.8 Antifungal assay — 276

15.9	Results and discussions —	277
15.9.1	Physical properties of synthesized compounds —	277
15.10	UV-visible spectra of synthesized compounds —	278
15.11	Infra-red spectra of synthesized compounds —	278
15.11.1	Energy-dispersive X-ray analysis (EDX) with Scanning electron microscope (SEM) —	279
15.12	Anti fungi assay —	283
15.13	Conclusions —	283
	References —	284

Cheriyen Ebenezer and Rajadurai Vijay Solomon

16 Exploring the solvation of water molecules around radioactive elements in nuclear waste water treatment — 287

16.1	Introduction —	287
16.2	Computational details —	289
16.3	Results and discussion —	289
16.3.1	Coordination environment —	289
16.3.2	Interactions between water molecules and metals/metal oxides —	291
16.3.3	Strength of interactions among water molecules and metal/metal oxides —	293
16.4	Conclusions —	296
	References —	297

Nitish Sookool and Marie Chan Sun

17 Changing our outlook towards vulnerable women for societal resilience — 301

17.1	Introduction —	301
17.2	Methods —	303
17.2.1	Study design overview —	303
17.2.2	Inclusion and exclusion criteria —	303
17.2.3	Consent and confidentiality —	303
17.2.4	Topic guide for interview —	303
17.2.5	Data analysis —	304
17.3	Results —	304
17.3.1	Theme 1: drug injection scenario —	305
17.3.2	Theme 2: sex work interplay —	308
17.3.3	Theme 3: sexual behaviour screenplay —	309
17.3.4	Additional data —	310
17.4	Discussion —	310
17.4.1	Background and setting —	310
17.4.2	Injection practices of WIDUs —	311

17.4.3	Sexual behaviours of WIDUs —	311
17.4.4	Participants' insight —	311
17.4.5	Strengths and limitations —	312
17.4.6	Recommendations —	312
17.5	Conclusions —	312
	References —	313

Index —	317
