

# Contents

**Preface — V**

**List of contributing authors — XIII**

Samuel Tetteh

**1 The Cambridge structural database (CSD): important resources for teaching concepts in structural chemistry and intermolecular interactions — 1**

- 1.1 Introduction — 1
- 1.2 Methodology — 3
  - 1.2.1 ConQuest Program — 3
  - 1.2.2 Mercury Program — 4
- 1.3 Results and discussion — 4
- 1.4 Conclusions — 12
- References — 13

Reagan Lehlogonolo Mohlala and Elena Mabel Coyanis

**2 The vital use of isocyanide-based multicomponent reactions (MCR) in chemical synthesis — 15**

- 2.1 Introduction to multicomponent reactions — 15
- 2.2 Strecker reaction (S-3CR) — 17
- 2.3 Hantzsch reaction (H-3CR) — 18
- 2.4 Biginelli reaction (B-3CR) — 19
- 2.5 Mannich three component reaction (M-3CR) — 21
- 2.6 Passerini reaction (P-3CR) — 21
  - 2.6.1 Substrate scope in the Passerini reactions — 22
  - 2.6.2 Chirality in Passerini reactions — 26
- 2.7 Ugi reaction: U-4CR and U-3CR — 27
  - 2.7.1 Ugi-four component reaction (U-4CR) — 27
  - 2.7.2 Ugi-three component reaction (U-3CR) — 29
- 2.8 van Leusen reaction (V-3CR) — 32
- 2.9 The application of dimethyl acetylenedicarboxylate in organic synthesis — 33
  - 2.9.1 DMAD and isocyanides in multicomponent reactions — 34
  - 2.9.2 DMAD in Michael reactions — 41
  - 2.9.3 DMAD in cycloaddition reactions — 44
- 2.10 Conclusions — 45
- References — 46

Abdul Nashirudeen Mumuni, John McLean and Gordon Waiter

### **3 Spectral peak areas do not vary according to spectral averaging scheme used in functional MRS experiments at 3 T with interleaved visual stimulation — 53**

- 3.1 Introduction — **54**
- 3.2 Methodology — **55**
  - 3.2.1 Study volunteers — **55**
  - 3.2.2 Presentation of visual stimulus — **55**
  - 3.2.3 Functional MRI — **56**
  - 3.2.4 Functional MRS — **57**
  - 3.2.5 Spectral analysis — **59**
  - 3.2.6 Quantification of the BOLD effects on the spectra — **59**
  - 3.2.7 Statistical analysis — **60**
- 3.3 Results — **60**
  - 3.3.1 Single stimulation experiments — **60**
  - 3.3.2 Interleaved stimulation experiments — **62**
- 3.4 Discussion — **64**
- 3.5 Conclusions — **66**
- References — **67**

Adeleke Adeniyi, Mayowa Ibidokun and Ojo Oluwole

### **4 A comparative assessment of potentially harmful metals in the Lagos Lagoon and Ogun river catchment — 69**

- 4.1 Introduction — **70**
- 4.2 Materials and methods — **70**
  - 4.2.1 Materials and reagents — **70**
  - 4.2.2 Study area — **71**
  - 4.2.3 Sampling and sample preparation — **71**
- 4.3 Results and discussion — **73**
- 4.4 Conclusions — **76**
- References — **77**

Enrico Daniel R. Legaspi, Ma. Stefany Daennielle G. Sitchon, Sonia D. Jacinto, Blessie A. Basilia, and Imee Su Martinez

### **5 XRD and cytotoxicity assay of submitted nanomaterial industrial samples in the Philippines — 79**

- 5.1 Introduction — **80**
- 5.2 Methods — **81**
  - 5.2.1 X-ray diffraction — **81**
  - 5.2.2 MTT cytotoxicity assay — **81**
- 5.3 Discussion — **81**

5.3.1	Analysis of X-ray diffraction patterns for select nanoparticle samples —	81
5.3.2	MTT cytotoxicity assay —	86
5.4	Conclusions —	89
	References —	90

Agnes Pholosi, Saheed O. Sanni, Samson O. Akpotu and Vusumzi E. Pakade

<b>6</b>	<b>Pine bark crosslinked to cyclodextrin for the adsorption of 2-nitrophenol from an aqueous solution —</b>	<b>93</b>
6.1	Introduction —	93
6.2	Experimental —	95
6.2.1	Materials —	95
6.2.2	Procedures —	95
6.3	Results and discussion —	96
6.3.1	Adsorbent characterization —	96
6.3.2	Adsorption studies —	98
6.4	Conclusions —	105
	References —	106

Daniel O. Omokpariola, Patrick L. Omokpariola, Patrice A. C. Okoye, Victor U. Okechukwu, Joseph S. Akolawole and Ogochukwu Ifeagwu

<b>7</b>	<b>Concentration evaluation and risk assessment of pesticide residues in selected vegetables sold in major markets of Port Harcourt South-South Nigeria —</b>	<b>109</b>
7.1	Introduction —	110
7.2	Methodology —	111
7.2.1	Sample collection and preparation —	111
7.2.2	Chemicals —	111
7.2.3	Extraction of pesticide residues from samples —	112
7.2.4	Clean-up —	112
7.2.5	Analysis of organochlorine and organophosphate pesticides —	112
7.2.6	Quality control —	113
7.2.7	Statistical analysis —	113
7.2.8	Risk assessment —	113
7.2.8.2	Carcinogenic assessment —	114
7.3	Results and discussion —	115
7.3.1	Concentration of organochlorine and organophosphate pesticides in vegetables —	115
7.3.2	Noncarcinogenic assessment —	119
7.3.3	Carcinogenic risk assessment —	119
7.4	Conclusions —	124
	References —	124

Rafia Azmat, Rohi Bano, Sumeira Moin, Tahseen Ahmed, Ailyan Saleem and Waseem Ahmed

**8      Detection of iodine in aqueous extract of plants through modified Mohr's method — 127**

- 8.1      Introduction — **127**
- 8.2      Materials and methods — **129**
- 8.2.1    Collection of Ipomoea pes-caprae from three coastal sites — **129**
- 8.2.2    Preparation of plant samples for analysis of bioactive iodine — **129**
- 8.2.3    Standard curve of KI — **129**
- 8.2.4    Chemical analysis of iodine — **130**
- 8.2.5    Separation of iodine — **130**
- 8.2.6    Determining LOD and LOQ — **130**
- 8.3      Results and discussion — **130**
- 8.4      Conclusions — **135**
- References — **135**

Uche E. Ekpunobi, Fabian M. Onyekwere, Rosemary U. Arinze, Daniel N. Enenche, Daniel O. Omokpariola and Victor U. Okechukwu

**9      Appraisal and health risk assessment of potential toxic element in fruits and vegetables from three markets in Anambra state, Nigeria — 137**

- 9.1      Introduction — **137**
- 9.2      Materials and methods — **138**
- 9.2.1    Study area — **138**
- 9.2.2    Sample collection — **139**
- 9.2.3    Digestion of soil samples — **139**
- 9.2.4    Digestion of fruits and vegetables samples — **139**
- 9.2.5    Health risk assessment — **139**
- 9.2.6    Statistical analysis — **140**
- 9.3      Results and discussion — **140**
- 9.3.1    Concentrations of potential toxic elements in soil — **140**
- 9.3.2    Concentrations of potential toxic elements (mg/kg) in fruits and vegetables in Atani market — **142**
- 9.3.3    Concentrations of potential toxic elements (mg/kg) in fruits and vegetables in Omor market — **143**
- 9.3.4    Concentrations of potential toxic element (mg/kg) in fruits and vegetables in Eke Awka market — **143**
- 9.3.5    Implication of potential toxic element concentration in plants — **145**
- 9.3.6    Health risk assessment — **147**
- 9.4      Conclusions — **150**
- Supplementary Material — **150**
- References — **150**

Liliana Mammino

- 10      Complexes of a model trimeric acylphloroglucinol with a  $\text{Cu}^{2+}$  ion: a DFT study — 153**
- 10.1      Introduction — 153
  - 10.2      Computational details — 156
  - 10.3      Results — 157
  - 10.3.1    Selection and geometry of the calculated complexes — 157
  - 10.3.2    Energetics of the calculated complexes — 160
  - 10.3.3    Properties of the ion in the complexes — 163
  - 10.3.4    How closely the ion approaches the molecule — 164
  - 10.3.5    Effects of complexation on the intramolecular hydrogen bonds — 165
  - 10.3.6    Other molecular properties of the complexes — 166
  - 10.3.7    Discussion and conclusions — 168
  - References — 169

Davor Margetić

- 11      Mechanochemistry as a green method in organic chemistry and its applications — 171**
- 11.1      Introduction — 171
  - 11.2      Mechanochemistry — 172
  - 11.3      Synthetic applications — 173
  - 11.4      Future prospects — 180
  - 11.5      Conclusions — 180
  - References — 181

Liliana Mammino

- 12      Maximizing advantages and minimizing misinterpretation risks when using analogies in the presentation of chemistry concepts: a design challenge — 183**
- 12.1      Introduction — 184
  - 12.1.1    Analogies as an expression, emphasising and clarification tool — 184
  - 12.1.2    Analogies in education and in chemistry education — 186
  - 12.2      Analogies in chemistry teaching: examples and reflections — 189
  - 12.2.1    Models, visualization and analogies — 189
  - 12.2.2    When an analogy fails its purpose — 191
  - 12.2.3    Designing analogies in the classroom — 192
  - 12.3      Discussion — 202
  - 12.4      Conclusions — 205
  - References — 206

Index — 209
