Volume 1

Preface *xix*

1	Resource Recovery and Reuse for Sustainable Future	
	Introduction and Overview	1
	<i>Wenshan Guo, Huu Hao Ngo, Lijuan Deng, Rao Y. Surampalli, and Tian C. Zhang</i>	
1.1	Introduction	1
1.2	Background	2
1.2.1	Hierarchy of Resource Use	2
1.2.2	Analyzing the Needs for Resource and Energy Recovery and Reuse	2
1.2.2.1	Population Growth	2
1.2.2.2	Resource Scarcity	4
1.2.2.3	Environmental Impacts	4
1.2.2.4	Economical Aspect	4
1.3	Current Status of Resource Recovery and Reuse	5
1.3.1	Wastewater	5
1.3.1.1	Nutrient Recovery	6
1.3.1.2	Organic Carbon Recovery	6
1.3.1.3	Heat Recovery	7
1.3.2	Waste	7
1.4	Research Needs	9
1.4.1	Development of Novel Technologies	9
1.4.2	Social and Economic Feasibility of Resource Recovery and Reuse	9
1.4.3	Development of Internationally Coordinated Framework and Strategy	10
1.5	Book Overview	10
	References	17

2	Hydrothermal Liquefaction of Food Waste: A Potential Resource Recovery Strategy	21
	<i>Ranaprathap Katakojwala, Hari Shankar Kopperi, Althuri Avanthi, and S. Venkata Mohan</i>	
2.1	Introduction	21
2.1.1	Global Food Waste Production	22
2.1.2	Conventional Food Waste Management Practices	23
2.1.2.1	Land Filling	23
2.1.2.2	Fertilizer/Animal Feed	23
2.1.2.3	Incineration	23
2.1.2.4	Composting	24
2.1.3	Advanced Food Waste Management Methods	24
2.1.3.1	Acidogenesis	24
2.1.3.2	Solventogenesis	24
2.1.3.3	Biodiesel	25
2.1.3.4	Bioplastics	26
2.2	Significance of Hydrothermal Liquefaction of Food Waste	26
2.2.1	HTL Reactor Operation	27
2.2.2	Isothermal HTL and Fast HTL	30
2.2.3	HTL Products	30
2.2.4	Greenhouse Gas Emissions	31
2.3	Factors Influencing HTL During FW Treatment	32
2.3.1	Temperature	34
2.3.2	Reaction Time	35
2.3.3	Solid-to-Solvent Ratio	35
2.3.4	Composition of Food Waste	36
2.3.5	Catalyst Concentration	36
2.4	HTL of Food Waste: Case Studies	37
2.5	Conclusions and Future Scope	39
	Acknowledgement	40
	References	40
3	Coping with Change: (Re) Evolution of Waste Management in Local Authorities in England	47
	<i>Pauline Deutz and Anne Kildunne</i>	
3.1	Introduction	47
3.2	Sustainability Transitions Literature	48
3.3	Waste Management in England	51
3.4	Research Design and Methods	52
3.4.1	Research Design	53
3.4.2	Methods	53
3.4.3	Selection of Interviewees	54
3.4.4	Secondary Data	58

3.5	Results and Discussion	58
3.5.1	English Waste in the Context of the EU	58
3.5.2	Influences in the UK Context for LAs	64
3.5.3	Implementation of the 2000 Waste Strategy	66
3.5.3.1	LA Implementation of Waste Policy	67
3.5.3.2	Targets	70
3.5.3.3	Financial Instruments	70
3.5.3.4	Regional Governance	72
3.5.4	Local Authorities and the Public	72
3.5.5	Legacy of the Strategy	74
3.6	Conclusions	75
	Acknowledgements	77
	References	77
4	Hydrothermal Liquefaction of Lignocellulosic Biomass for Bioenergy Production	83
	<i>Huihui Chen, Gang Luo, and Shicheng Zhang</i>	
4.1	Introduction	83
4.2	Composition of Lignocellulosic Biomass and their Degradation in HTL Processes	85
4.2.1	Composition of Lignocellulosic Biomass	85
4.2.2	Brief Review on the Development of HTL Technology	85
4.2.3	Main Components Degradation of the Lignocellulosic Biomass During HTL	87
4.2.3.1	Cellulose and its Degradation in HTL Processes	87
4.2.3.2	Hemicellulose and its Degradation in HTC Process	88
4.2.3.3	Lignin and its Degradation in HTC Processes	88
4.3	Research Status in HTL of Lignocellulosic Biomass	90
4.3.1	Products Description	90
4.3.1.1	Bio-oil	90
4.3.1.2	Solid Residue	90
4.3.1.3	Other By-products	91
4.3.2	Operating Parameters for Bio-oil Production by HTL	91
4.3.2.1	Bio-oil	92
4.3.2.2	Temperature	93
4.3.2.3	Heating Rate	93
4.3.2.4	Residence Time	94
4.3.2.5	Pressure	94
4.3.2.6	Catalysts	95
4.3.2.7	Liquid-to-Solid Ratio	96
4.4	Limitations and Prospects for Bioenergy Production from Lignocellulosic Biomass by HTL	97
4.4.1	Poor Quality of Crude Bio-oil	97

4.4.2	Aqueous By-products Utilization	97
4.4.3	Prospects	98
4.5	Conclusion and Future Work	98
	References	99
5	Resource Recovery-Oriented Sanitation and Sustainable Human Excreta Management	109
	<i>Sudheer Salana, Tuhin Banerji, Aman Kumar, Ekta Singh, and Sunil Kumar</i>	
5.1	Introduction	109
5.2	Present Scenario	111
5.2.1	Ecological Sanitation	112
5.2.1.1	Rottebehaelter and Centrifugal Separation Sanitation	113
5.2.1.2	Biofilters, Vermicomposting Units, Bag Toilets	114
5.2.2	Failure, Success, and Lessons	115
5.3	Resource Recovery Options in Rural Areas	116
5.3.1	Nutrient Recovery from Urine	117
5.3.2	Anaerobic Digestion or Composting?	119
5.3.3	Community-Scale or Household Models?	121
5.4	Resource Recovery Sanitation in Urban Context	121
5.4.1	Energy Matters	121
5.4.2	Johkasou Systems	123
5.4.3	Possibilities of Industrial-Scale Units	124
5.5	Life Cycle Assessment of Sanitation Systems	125
5.6	Human Excreta and Sustainable Future	127
5.6.1	Economics of Resource Recovery Sanitation	127
5.6.2	Sanitation Access and Resource Recovery	128
5.7	Conclusion and Recommendations	130
	References	131
6	Resource Recovery and Recycling from Livestock Manure: Current Statue, Challenges, and Future Prospects for Sustainable Management	137
	<i>Tao Liu, Hongyu Chen, Junchao Zhao, Parimala Gnana Soundari, Xiuna Ren, Sanjeev Kumar Awasthi, Yumin Duan, Mukesh Kumar Awasthi, and Zengqiang Zhang</i>	
6.1	Introduction	137
6.2	Present Scenario and Global Perspective of Manure Generation and Recycling	139
6.2.1	Sanitization and Hygiene in Manure Management	139
6.2.1.1	Aerobic Composting	139
6.2.2	Importance and Significance of Resource Recovery	141

6.2.2.1	Nitrogen and Phosphorus Recovery from Livestock Manure	141
6.2.2.2	Heavy Metal Recovery from Livestock Manure	142
6.3	Resource Recovery Technologies and Logistics for Handling, Transport, and Distribution of Manures	142
6.3.1	Nutrient Recovery from Manure	142
6.3.2	Bioenergy Production by Anaerobic Digestion/Co-digestion	147
6.3.3	Composting/Co-composting	147
6.3.4	Centralized and De-centralized Models?	148
6.4	Energy Matters and Economic Feasibility	149
6.4.1	Energy Production	149
6.4.2	Mineral Reutilization	150
6.4.2.1	Ammonia Stripping	150
6.4.2.2	Struvite Crystallization	150
6.4.2.3	Mineral Concentrates	150
6.5	Resource Recovery Sanitation in Developed and Developing Countries	151
6.5.1	Operational Guidelines for Septage Treatment and Disposal	153
6.5.1.1	Storage	154
6.5.1.2	Pasteurization	154
6.5.1.3	Chemical Treatments	154
6.5.1.4	Anaerobic Treatments	154
6.5.1.5	Composting	155
6.5.2	Testing the Possibilities of Commercial-Scale Resource Recovery	155
6.6	Life Cycle Assessment of Sustainable Manure Management Systems	156
6.7	Innovation in Sustainable Manure Management Systems and Recycling	157
6.7.1	Economics of Resource Recovery from Manure and Sanitation	157
6.7.2	Business Models for a Circular Economy	158
6.7.3	Enabling Environment Sanitation and Financing for Resource Recovery	159
6.8	Challenges and Limitation	160
6.9	Conclusion and Future Prospects	160
	Acknowledgements	161
	References	161
7	Utilization of Microalgae and Thraustochytrids for the Production of Biofuel and Nutraceutical Products	167
	<i>Ying Liu and Jay J. Cheng</i>	
7.1	Introduction	167

7.1.1	Microalgae	167
7.1.2	Thraustochytrids	167
7.1.3	Biodiesel and Biobased Jet Fuel	168
7.1.4	Docosaheptaenoic Acid (DHA) and Eicosapentaenoic Acid (EPA)	168
7.2	Microalgae for Biodiesel and Jet Fuel Production	169
7.2.1	Selection of Microalgae	169
7.2.2	Processes of Microalgae to Biofuel	170
7.2.2.1	Microalgae Cultivation	170
7.2.2.2	Microalgae Harvesting	172
7.2.2.3	Extraction of Oil from Microalgae	174
7.2.2.4	Biodiesel Production from Microalgal Oil	175
7.2.2.5	Jet Fuel Production from Microalgal Oil	176
7.3	Thraustochytrids for Biodiesel Production	177
7.4	Challenges of Microalgae and Thraustochytrids to Biofuel	178
7.5	Microalgae and Thraustochytrids for DHA and EPA Productions	179
7.6	Future Perspectives	183
7.6.1	Integrated Microalgae/Thraustochytrids Cultivation and Harvesting System	183
7.6.2	Genetically Modified Microalgae/Thraustochytrids for High Oil and Easy Extraction of Lipids	184
7.6.3	Integrated Microalgae/Thraustochytrids System for Biofuel and DHA/EPA Production	186
	References	186
8	Pertinent Issues of Algal Energy and Bio-Product Development A Biorefinery Perspective	199
	<i>Goldy De Bhowmick and Ajit K. Sarmah</i>	
8.1	Introduction	199
8.2	Current Status of Algal Energy and Bio-product Formation	200
8.3	Analysis of Conversion Methods	202
8.3.1	Dynamics of Algal Biomass Composition	202
8.3.2	Conversion Routes	203
8.3.3	Product Yield and Market Value	204
8.4	Competent Applications of Algae	205
8.5	Biorefinery and Integrated Approaches	207
8.6	Technological Issues: Pros and Cons	208
8.7	Life Cycle Assessment	210
8.8	Techno-Economic Analysis (TEA)	211
8.9	Futuristic Options	212
	References	213

9	Resource Utilization of Sludge and Its Potential Environmental Applications for Wastewater	217
	<i>Dong Wei, Bin Du, and Qin Wei</i>	
9.1	Introduction	217
9.2	Types of Sludge in Wastewater Treatment Process	218
9.2.1	Activated Sludge	218
9.2.2	Granular Sludge	219
9.2.2.1	Anaerobic Granular Sludge	219
9.2.2.2	Aerobic Granular Sludge	220
9.3	Sludge-Based Activated Carbon for Wastewater Treatment	222
9.3.1	Production Method	222
9.3.1.1	ZnCl ₂	223
9.3.1.2	H ₃ PO ₄	223
9.3.2	Treatment of Dye Wastewater	224
9.3.2.1	MG Sorption onto Sludge-Based ACs	224
9.3.2.2	Mineral Acid Modification of AGS-Derived AC for MG Sorption	225
9.3.3	Treatment of Heavy Metal-Contained Wastewater	226
9.3.3.1	Heavy Metal Sorption onto Sludge-Based AC	226
9.3.3.2	Cu(II) Sorption onto AGS-AC in the Presence of HA and FA	227
9.4	Granular Sludge Biosorbent Applied for Wastewater Treatment	229
9.4.1	Treatment of Dye Wastewater	229
9.4.1.1	Role of EPS in Aerobic Granular Sludge for MB Sorption	229
9.4.1.2	Biosorption of Dye Wastewater and Photocatalytic Regeneration of AGS	230
9.4.2	Treatment of Heavy Metal-Contained Wastewater	232
9.4.2.1	Zn(II) Sorption onto AGS	232
9.4.2.2	Cu(II) Sorption onto AGS	232
9.4.2.3	Ni(II) Sorption onto AGS/AnGS	233
9.4.2.4	Magnetic Modification of AnGS for Pb(II) and Cu(II) Removal	234
9.4.3	Treatment of Multicomponent Contaminants	235
9.5	Applications of EPS Extracted from Sludge for Wastewater Treatment	236
9.5.1	Bioflocculant	236
9.5.2	Biosorbent for the Removal of Various Pollutants	237
9.6	Conclusion	238
	References	238

10	Thermal-Chemical Treatment of Sewage Sludge Toward Enhanced Energy and Resource Recovery	247
	<i>Mian Hu, Dabin Guo, Yingqun Ma, and Yu Liu</i>	
10.1	Introduction	247
10.2	Sewage Sludge and Its Impact on Environmental Sustainability	248
10.3	Characterization of Sewage Sludge	250
10.4	Thermal-Chemical Treatment of Sewage Sludge	250
10.4.1	Incineration	250
10.4.1.1	Typical Incineration Processes	250
10.4.1.2	Performance–Cost–Benefit Analysis of Incineration Technology	253
10.4.2	Pyrolysis	253
10.4.2.1	Typical Pyrolysis Processes	253
10.4.2.2	Performance–Cost–Benefit Analysis of Pyrolysis Technology	255
10.4.3	Gasification	255
10.4.3.1	Typical Gasification Processes	255
10.4.3.2	Performance–Cost–Benefit Analysis of Gasification Technology	257
10.4.4	Liquefaction	257
10.4.4.1	Typical Liquefaction Processes	257
10.4.4.2	Performance–Cost–Benefit Analysis of Liquefaction Technology	258
10.5	Recovery of Energy and Resource from Sewage Sludge	258
10.5.1	Combustible Gas	258
10.5.2	Bio-oils	259
10.5.3	Biochar	260
10.5.4	Ashes to Value-Added Materials	261
10.5.5	Nutrient Recovery	261
10.5.6	Heavy Metals Removal and Recovery	263
10.6	Technology Limitations and Challenges	264
10.6.1	Deactivation of Catalyst	264
10.6.2	Tar Formation	264
10.6.3	NO _x and SO _x Emission	265
10.6.4	High Moisture Content	265
10.7	Conclusions and Perspectives	266
	References	267

11	Improving Bioenergy Recovery from Anaerobic Digestion of Sewage Sludge	275
	<i>Qilin Wang, Jing Wei, Huan Liu, Dongbo Wang, Long D. Nghiem, and Zhiyao Wang</i>	
11.1	Introduction	275
11.2	Characteristics of Sewage Sludge	276
11.2.1	Primary Sludge	276
11.2.2	Waste Activated Sludge	276
11.3	Anaerobic Digestion for Bioenergy Recovery	279
11.3.1	Theory of Anaerobic Digestion	279
11.3.2	Bioenergy Recovery by Anaerobic Digestion	279
11.4	Technologies for Enhancing Methane Production from Sludge	280
11.4.1	Physical Pretreatment	280
11.4.1.1	Thermal Hydrolysis Pretreatment	280
11.4.1.2	Mechanical Pretreatment	281
11.4.1.3	Ultrasonic Pretreatment	282
11.4.1.4	Microwave Pretreatment	282
11.4.1.5	Focused Pulsed Pretreatment	282
11.4.2	Chemical Pretreatment or Dosage	283
11.4.2.1	Ozonation Pretreatment	283
11.4.2.2	Alkaline Pretreatment	283
11.4.2.3	Free Nitrous Acid Pretreatment	283
11.4.2.4	Free Ammonia Pretreatment	283
11.4.3	Biological Pretreatment	284
11.5	Technologies for Enhancing Hydrogen Production from Sludge	284
11.5.1	Physical Pretreatment	284
11.5.1.1	Thermal Pretreatment	284
11.5.1.2	Freezing/Thawing Pretreatment	288
11.5.1.3	Sterilization Pretreatment	288
11.5.1.4	Microwave Pretreatment	288
11.5.1.5	Ultrasonic Pretreatment	288
11.5.1.6	Gamma Irradiation Pretreatment	288
11.5.2	Chemical Pretreatment	289
11.5.2.1	Acid Pretreatment	289
11.5.2.2	Alkaline Pretreatment	289
11.5.2.3	Free Ammonia and Free Nitrous Acid Pretreatment	289
11.5.2.4	Ozone Pretreatment	289
11.5.2.5	Wet Oxidation Pretreatment	289
11.5.2.6	Calcium Peroxide Pretreatment	290

11.5.2.7	Triclocarban Pretreatment	290
11.5.3	Biological Pretreatment	290
11.6	Evaluation and Comparison of Technologies	290
11.7	Summary and Future Outlook	294
	References	294

12 Recovery of Phosphorus from Wastewater and Sludge 305

Ruo-hong Li, Lin Lin, and Xiao-yan Li

12.1	Introduction	305
12.1.1	P Recovery Technologies	306
12.1.1.1	Wet-Chemical Approach	306
12.1.1.2	Thermal Treatment	307
12.1.1.3	Chemical Precipitation	307
12.1.2	P Recovery Based on CEPS	307
12.1.3	P Recovery Based on Chemically Enhanced Membrane Bioreactors	308
12.2	Chemical Coagulation and Flocculation for Enhanced P Removal from Wastewater	309
12.2.1	Experimental Methods	309
12.2.2	Results and Discussion	310
12.3	Acidogenic Fermentation for P Release and Recovery from Sludge	312
12.3.1	Experimental Methods	312
12.3.2	Results and Discussion	312
12.3.2.1	Influence of Fe Dosage on Acidogenic Sludge Fermentation	312
12.3.2.2	Influence of Al Dosage on Acidogenic Sludge Fermentation	315
12.3.2.3	Recovery of Organic Carbon and P from the Semicontinuous Fermentation of CEPS Sludge	316
12.3.3	Summary	317
12.4	A Membrane Bioreactor with Fe Dosing and Sludge Fermentation for Enhanced P Removal and Recovery	317
12.4.1	Experimental Work	317
12.4.2	Results and Discussion	319
12.4.2.1	P Removal from Wastewater by Chemical Flocculation and MBR	319
12.4.2.2	Sludge Fermentation and P Recovery	321
12.4.2.3	Comparison of Acidification and Acidogenesis	325
12.4.3	Summary	326
12.5	Mechanisms of P Removal and Recovery from Wastewater Using an Fe-dosing Bioreactor and Co-fermentation	326
12.5.1	Experimental Work	326

12.5.2	P Speciation in the Aerobic MBR and Anaerobic Fermenters	327
12.5.3	Fe Speciation in the Aerobic MBR and Anaerobic Fermenters	329
12.5.4	P Extraction and Release from Sludge During Acidogenic Fermentation	330
12.5.4.1	Acidogenic Fermentation	330
12.5.4.2	Microbial Iron Reduction	331
12.5.4.3	Solubility of the Fe—P Complex	331
12.6	Conclusions	333
	References	333

13 Magnetic Iron-Based Oxide Materials for Selective Removal and Recovery of Phosphorus 339

Irene Man Chi Lo, Baile Wu, and Jun Wan

13.1	Introduction	339
13.1.1	Phosphorus Sources, Speciation, and Properties in Water	339
13.1.2	Phosphorus Pollution and Eutrophication	340
13.1.3	Phosphorus Removal and Recovery Technologies	340
13.1.4	Selective Removal and Recovery of Phosphorus from Water by Using Adsorption	341
13.1.4.1	Phosphate Adsorption Processes and Mechanisms	341
13.1.4.2	Current Adsorbents for Phosphate Removal	341
13.1.4.3	Selective Removal and Recovery of Phosphate from Water by Magnetic Iron Based-Oxide Materials	342
13.2	Development and Material Synthesis	343
13.2.1	Synthesis of Fe ₃ O ₄ Nanoparticles	343
13.2.1.1	Fe ₃ O ₄ Nanoparticles Synthesized by the Solvothermal Method	343
13.2.1.2	Fe ₃ O ₄ Nanoparticles Synthesized by the Coprecipitation Method	343
13.2.2	Synthesis of SiO ₂ @Fe ₃ O ₄ , ZrO ₂ @SiO ₂ @Fe ₃ O ₄ and ZrO ₂ @Fe ₃ O ₄ Nanoparticles	343
13.2.2.1	Synthesis of SiO ₂ @Fe ₃ O ₄ Nanoparticles	343
13.2.2.2	Synthesis of ZrO ₂ @SiO ₂ @Fe ₃ O ₄ Nanoparticles	344
13.2.2.3	Synthesis of ZrO ₂ @Fe ₃ O ₄ Nanoparticles	344
13.2.3	Synthesis of La(OH) ₃ /Fe ₃ O ₄ Nanocomposites	344
13.2.4	Synthesis of Fe ⁰ /Fe ₃ O ₄ Composites	344
13.3	Material Characteristics	345
13.3.1	Characterization Methods for Magnetic Iron-Based Oxide Materials	345
13.3.2	Characteristics of Fe ₃ O ₄ , SiO ₂ @Fe ₃ O ₄ , ZrO ₂ @SiO ₂ @Fe ₃ O ₄ , and ZrO ₂ @Fe ₃ O ₄ Nanoparticles	345

13.3.3	Characteristics of Fe_3O_4 and $\text{La}(\text{OH})_3/\text{Fe}_3\text{O}_4$ Nanocomposites	348
13.3.4	Characteristics of $\text{Fe}^0/\text{Fe}_3\text{O}_4$ Composites	350
13.4	Batch Adsorption Kinetics, Isotherms, and Affecting Factors	351
13.4.1	Phosphorus Removal by $\text{ZrO}_2@\text{SiO}_2@\text{Fe}_3\text{O}_4$ and $\text{ZrO}_2@\text{Fe}_3\text{O}_4$ Nanoparticles	351
13.4.1.1	Phosphate Adsorption Kinetics of $\text{ZrO}_2@\text{SiO}_2@\text{Fe}_3\text{O}_4$ and $\text{ZrO}_2@\text{Fe}_3\text{O}_4$ Nanoparticles	351
13.4.1.2	Phosphate Adsorption Isotherms of $\text{ZrO}_2@\text{SiO}_2@\text{Fe}_3\text{O}_4$ and $\text{ZrO}_2@\text{Fe}_3\text{O}_4$ Nanoparticles	351
13.4.1.3	Effects of pH and Zeta Potential Analysis	352
13.4.2	Phosphorus Removal by $\text{La}(\text{OH})_3/\text{Fe}_3\text{O}_4$ Nanocomposites	353
13.4.2.1	Phosphate Adsorption Kinetics of $\text{La}(\text{OH})_3/\text{Fe}_3\text{O}_4$ Nanocomposites	353
13.4.2.2	Phosphate Adsorption Isotherms of $\text{La}(\text{OH})_3/\text{Fe}_3\text{O}_4$ Nanocomposites	353
13.4.2.3	Effect of pH, Ionic Strength, and Zeta Potential Analysis	353
13.4.3	Phosphorus Removal by $\text{Fe}^0/\text{Fe}_3\text{O}_4/\text{Fe}^{2+}$ System	355
13.5	Selective Removal and Recovery	357
13.5.1	Selective Phosphorus Removal and Recovery by $\text{ZrO}_2@\text{SiO}_2@\text{Fe}_3\text{O}_4$ and $\text{ZrO}_2@\text{Fe}_3\text{O}_4$ Nanoparticles and Their Reusability	357
13.5.1.1	Selective Phosphate Adsorption of $\text{ZrO}_2@\text{SiO}_2@\text{Fe}_3\text{O}_4$ and $\text{ZrO}_2@\text{Fe}_3\text{O}_4$ Nanoparticles	357
13.5.1.2	Phosphate Recovery and Reusability of $\text{ZrO}_2@\text{Fe}_3\text{O}_4$ Nanoparticles	357
13.5.2	Selective Phosphorus Removal and Recovery by $\text{La}(\text{OH})_3/\text{Fe}_3\text{O}_4$ Nanocomposites	358
13.5.2.1	Selective Phosphate Adsorption of $\text{La}(\text{OH})_3/\text{Fe}_3\text{O}_4$ Nanocomposites	358
13.5.2.2	Phosphate Recovery and Reusability of $\text{La}(\text{OH})_3/\text{Fe}_3\text{O}_4$ Nanocomposites	360
13.5.3	Selective Phosphorus Removal and Recovery by $\text{Fe}^0/\text{Fe}_3\text{O}_4/\text{Fe}^{2+}$ System	360
13.5.3.1	Selective Phosphate Removal of $\text{Fe}^0/\text{Fe}_3\text{O}_4/\text{Fe}^{2+}$ System	360
13.5.3.2	Phosphate Recovery and Reusability of $\text{Fe}^0/\text{Fe}_3\text{O}_4$ Composite	361
13.6	Comparison with Other Adsorbents	362
13.6.1	Phosphorus Removal Capacity	362
13.6.2	Phosphorus Removal Kinetics	363
13.6.3	Adsorbents Reusability and Phosphorus Recovery	364

13.7	Potential Environmental Applications and Perspectives	365
	References	366

Volume 2

Preface *xvii*

14	Forward Osmosis for Nutrients Recovery from Wastewater	373
15	Removal and Recovery of Nutrients Using Low-Cost Adsorbents from Single-Component and Multicomponent Adsorption Systems	397
16	Use and Development of Biochar-Based Materials for Effective Capture and Reuse of Phosphorus	437
17	Recovery of Gold and Other Precious Metals by Biosorption	463
18	Bioelectrochemical System in Wastewater Treatment: Resource Recovery from Municipal and Industrial Wastewaters	489
19	Trends in Using Electron Beam for Treating Textile and Dyeing Wastewater	525
20	Approaches Toward Resource Recovery from Breeding Wastewater	559
21	Resources Recovery and Reuse from Liquid and Solid Wastes Generated from Electrolytic Manganese Production	601
22	Recovery of Thermal Energy from Wastewater by Heat Pump Technology	635
23	Hydrocyclone-Separation Technologies for Resource Recovery and Reuse	663
24	Methane Recovery from Landfills	699
25	Resource Recovery from Electronic Waste	723
	Index	755
