

Table of Contents

How Hard Is It to Bribe the Judges? A Study of the Complexity of Bribery in Judgment Aggregation	1
<i>Dorothea Baumeister, Gábor Erdélyi, and Jörg Rothe</i>	
A Translation Based Approach to Probabilistic Conformant Planning . . .	16
<i>Ronen I. Brafman and Ran Taig</i>	
Committee Selection with a Weight Constraint Based on a Pairwise Dominance Relation	28
<i>Charles Delort, Olivier Spanjaard, and Paul Weng</i>	
A Natural Language Argumentation Interface for Explanation Generation in Markov Decision Processes	42
<i>Thomas Dodson, Nicholas Mattei, and Judy Goldsmith</i>	
A Bi-objective Optimization Model to Eliciting Decision Maker's Preferences for the PROMETHEE II Method	56
<i>Stefan Eppe, Yves De Smet, and Thomas Stützle</i>	
Strategy-Proof Mechanisms for Facility Location Games with Many Facilities	67
<i>Bruno Escoffier, Laurent Gourvès, Nguyen Kim Thang, Fanny Pascual, and Olivier Spanjaard</i>	
Making Decisions in Multi Partitioning	82
<i>Alain Guénoche</i>	
Efficiently Eliciting Preferences from a Group of Users	96
<i>Greg Hines and Kate Larson</i>	
Risk-Averse Production Planning	108
<i>Ban Kawas, Marco Laumanns, Eleni Pratsini, and Steve Prestwich</i>	
Minimal and Complete Explanations for Critical Multi-attribute Decisions	121
<i>Christophe Labreuche, Nicolas Maudet, and Wassila Ouerdane</i>	
Vote Elicitation with Probabilistic Preference Models: Empirical Estimation and Cost Tradeoffs	135
<i>Tyler Lu and Craig Boutilier</i>	

Efficient Approximation Algorithms for Multi-objective Constraint Optimization	150
<i>Radu Marinescu</i>	
Empirical Evaluation of Voting Rules with Strictly Ordered Preference Data	165
<i>Nicholas Mattei</i>	
A Reduction of the Complexity of Inconsistencies Test in the MACBETH 2-Additive Methodology	178
<i>Brice Mayag, Michel Grabisch, and Christophe Labreuche</i>	
On Minimizing Ordered Weighted Regrets in Multiobjective Markov Decision Processes	190
<i>Włodzimierz Ogryczak, Patrice Perny, and Paul Weng</i>	
Scaling Invariance and a Characterization of Linear Objective Functions	205
<i>Saša Pekeč</i>	
Learning the Parameters of a Multiple Criteria Sorting Method Based on a Majority Rule	219
<i>Agnès Leroy, Vincent Mousseau, and Marc Pirlot</i>	
Handling Preferences in the “Pre-conflicting” Phase of Decision Making Processes under Multiple Criteria	234
<i>Dmitry Podkopaev and Kaisa Miettinen</i>	
Bribery in Path-Disruption Games	247
<i>Anja Rey and Jörg Rothe</i>	
The Machine Learning and Traveling Repairman Problem	262
<i>Theja Tulabandhula, Cynthia Rudin, and Patrick Jaillet</i>	
Learning Complex Concepts Using Crowdsourcing: A Bayesian Approach	277
<i>Paolo Viappiani, Sandra Zilles, Howard J. Hamilton, and Craig Boutilier</i>	
Online Cake Cutting	292
<i>Toby Walsh</i>	
Influence Diagrams with Memory States: Representation and Algorithms	306
<i>Xiaojuan Wu, Akshat Kumar, and Shlomo Zilberstein</i>	

Game Theory and Human Behavior: Challenges in Security and Sustainability 320
 Rong Yang, Milind Tambe, Manish Jain, Jun-young Kwak, James Pita, and Zhengyu Yin

Constrained Multicriteria Sorting Method Applied to Portfolio Selection 331
 Jun Zheng, Olivier Cailloux, and Vincent Mousseau

Author Index 345
