

Inhalt

Italo Calvino	<i>Abenteuer eines Skifahrers</i>	7
Antje Rávik Strubel	<i>Die Angst kommt vor dem Fall</i>	17
Christian Morgenstern	<i>Der Seufzer</i>	29
Ernest Hemingway	<i>Schnee überm Land</i>	30
Zora del Buono	<i>Punk</i>	38
Ulrich Becher	<i>Der Mann, der über die Silvretta kam</i>	45
Tim Krohn	<i>Melancholie</i>	52
Arthur Conan Doyle	<i>Ein Alpenpass auf Skiern</i>	60
Martin Suter	<i>Skiferien in der Business Class</i>	67
Rosetta Loy	<i>Fieber im Schnee</i>	75
Karl Ove Knausgård	<i>Mit Vater auf der Loipe</i>	84
Hermann Hesse	<i>Wintertage in Graubünden</i>	89
Ella Maillart	<i>Allein unterwegs im Himmelsgebirge</i>	92
Michael Köhlmeier	<i>Der Sieger</i>	97
Conrad Ferdinand Meyer	<i>Die Schlittschuhe</i>	101

John Irving	<i>Ein Wochenende in Aspen</i>	104
Erich Kästner	<i>England gegen Kanada</i>	118
Lili Grün	<i>Sein schlechter Ruf</i>	123
Hansjörg Schneider	<i>Alles fährt Ski</i>	127
Herbert Rosendorfer	<i>Volkssport</i>	131
Johann Wolfgang Goethe	<i>Ein sehr harter Winter</i>	136
Sylvia Plath	<i>Die Schussfahrt</i>	137
Jack London	<i>Ein Wettlauf um eine Million</i>	152
John Updike	<i>Die Rettung</i>	186
Otto Jägersberg	<i>Blau Extra</i>	200
	<i>Blanc de Blancs</i>	206
Tobias Wolff	<i>Pulver</i>	213
Niko Stoifberg	<i>Der Verflossene</i>	220
Teresa Präauer	<i>Hang loose</i>	228
	<i>Ich sehne mich nach</i>	
	<i>Après-Ski</i>	231
	Nachweis	237

Content overview

1 Tables

American unit conversions	16
Degrees Fahrenheit in Celsius	22
Inch fractions	23
Coefficient of linear expansion	24
Shrinkage allowances	25
Specific thermal capacity	26
Pouring Temperatures	27
Density of technical ferrous alloys	28
Density of liquid metals	29
Bulk Densities of various substances	30

2 Energy, environment, occupational safety

Occupational safety	34
Classification and labelling elements	38
Heat recovery	48
Controlling in the foundry	50
Energy efficiency	58
Exhaust air treatment	82

3 Pattern and mould making

Selected standards	90
Classification of patterns	91
Technical terminology	92
Grades	94
Shrinkage allowances	97
Draughts	99
Contactless measuring technology	101
Electrochemical machining	106

4 Manufacturing methods

Casting process simulation	110
Additive manufacturing methods	127
Moulding and coremaking process	135
Feeding technique	142
Investment casting	153
Lost Foam	175
Gravity die casting	185
Surface treatment and coating	195

5 Die casting	
Process characteristics	206
Properties of die casting alloys	208
Dimensional accuracy of the die cast parts	224
Process parameters	227
Process parameters Hot chamber process	238
Sprue nozzels for zinc die casting	243
Die casting molding parts, temperature profiles and mold standing times	244
Demoulding die cast parts	255
Heating and cooling the moulds	260
Mould spraying	266
Vacuum process	268
Special die casting processes	276

6	Moulding Materials	
	Moulding base materials	284
	Binder systems	294
	Inorganic binders	298
	Inorganic core binder systems for iron casting	302
	Organic binders	314
	Bentonite bonded moulding material	317
	Cooling bentonite bonded moulding materials	334
	Volume, Mass, Density, Bulk Density	358
	Lustrous carbon former	360
	Moulding material testing	363
	High-temperature deformation behaviour	372
	Coating	379
	Regeneration in the operational circulation process	383
	Regeneration of sodium silicate bound moulding materials	384
	Reclamation technologies for sand system	389
7	Melting	
	Energy consumption	396
	Pouring and measurement	403
	Charge make-up and treatment	405
	Residual substance analysis	414
	Refractory material	416
	Melting metals	447
8	materials	
	Selected standards	452
	World production	458
	Cast iron fundamentals	459
	Cast iron – Heat treatment	474
	Overview cast iron grades	478
	Cast iron with lamellar graphite	480
	Cast iron with nodular graphite	484
	Cast iron with vermicular graphite	489
	Austempered cast iron	496
	Austenitic cast iron	500
	Wear Resistant cast iron	505
	Special cast iron	508

Malleable cast iron	510
Superalloys	512
Aluminium cast materials	519
Aluminium cast materials – influence of addition elements	532
Aluminium cast materials – hot cracking tendency	536
Aluminium casting alloys – Melting treatment.....	541
Aluminium casting alloys – Microstructures	543
Aluminium cast materials – piston alloys	546
Aluminium cast materials – HIP treatment	552
Magnesium	554

9 Material and Cast part testing

Destructive material testing

Tensile test	578
Hardness test	598
Mobile hardness testing	616
Notched-Bar impact test	624
Fracture mechanics test	629
Dynamic strength test	633

Non-Destructive testing

Visual testing	639
X-ray/CT	640
CT metrology	643
Acoustic testing methods	649
Ultrasonic testing	654
Eddy-current test	657
Penetrant test	659
Magnetic particle test	661
3D Digitalisation	663

10 Metallography

Selected standards	670
Occupational safety and environmental protection	672
Introduction	673
Specimen preparation	674
Structural contrasting	679
Structural examination	688
Microstructure tomography	716
