

Inhaltsverzeichnis – Band II

Aerodynamics

- Digitalization in wind tunnels increases efficiency and quality
in development and validation 3
Jan D. Jacob
- Wind Tunnel Testing Methodology for Autonomous Vehicle Optical
Sensors in Adverse Weather Conditions 13
*Wing Yi Pao, Long Li, Joshua Howorth, Martin Agelin-Chaab,
Langis Roy, Julian Knutzen, Alexis Baltazar y Jimenez, and Klaus Muenker*

Cyber Security

- Virtual IDS as new means for Cyber Security in-vehicle protection 43
Dr.-Ing. Lara Popova, and Markus Maier
- Automotive Cybersecurity: The gap between theoretical risks and real
attacks on your vehicle 48
*Théo Tamisier, Anna Eildermann, Bernhard Kurz, Robin Liebe,
and Sebastian Spindler*
- Automotive cybersecurity and its importance for the development of
future vehicles 58
Thomas Thurner and Gerhard Di Mattio

Data Science

- Digital Twin Concepts for Autonomous and Electric Vehicle Testing 73
Thomas Goetzl, Sven Kopacz, and Henrik Liebau
- From the road to the datacenter fast and smart data recording to speed
up ADAS/AD development. 81
Frank Kraemer
- Data Mining as an essential Tool for Data Driven Vehicle Development. 88
Jan Wegener, Sebastiaan van Putten, Jens Neubeck, and Andreas Wagner

Development Methods

Developing Systems with Technical Cleanliness Requirements – Constraints and New Approaches	111
<i>Dr. Markus Rochowicz</i>	

Mobility Solutions (Poster)

HElmar-LiMo 2040: Sustainable Urban Living and Mobility Concept	125
<i>Hugo Gabele, Torben Ossendorf, Fabian Schmid, and Martin Ziegler</i>	
Implementation of What-if Scenarios in Coupled Vehicle and Traffic Co-simulation of Urban Areas	135
<i>M. Kulig, K. Schreiner, J. Brodersen, C. Stadler, M. Obstbaum, and M. Keckeisen</i>	
Can New Business Models Make Charging Stations More Successful?	148
<i>Rudolf Schnee, Nathalie Kroichvili, Daniela Chrenko, and Reiner Kriesten</i>	
Deep Learning and Geo-Fencing Based Free Parking Spot Detection Using a Camera Mounted on a Truck.	162
<i>Lei YE, Ebin Zacharias, Hans Christian Reuss, and Kun Gao</i>	

New Technologies (Poster)

Multiscale Simulations of Carbon-Based Composites for the Design of Sustainable Automotive Parts	187
<i>Kostantinos Margaronis, Vasileios Merevis, Rahul Banerjee, Ioannis Kalogeris, Philippe Mauri, Arijit Mallick, StefanosPyrialakos, Vissarion Papadopoulos, Martin Obstbaum, and Victor Faessler</i>	
Precise Rotationally Symmetrical Speed Sensor with Detection of Direction of Rotation	202
<i>Klemens Gintner</i>	

Powertrain Efficiency

The Electromechanically Deactivating Valve Train—From Concept to Mass Production in a Modular Engine Family.	213
<i>Frank Himsel, Thomas Werblinski, and Wolfgang Christgen</i>	

Powertrain Systems (Poster)

Highly Dynamic Battery Management Test System with Real-time Electrochemical Impedance Simulation.	227
<i>Michael Schwalm, Tatjana Dabrowski, and Franz Dengler</i>	
Modular Drive and Design Technologies for Small Commercial Vehicles in Batch Production	240
<i>Jürgen Erhardt</i>	
Investigation and DoE Optimization of Rotor Carriers for a Axial Flux Machine	246
<i>M. Fuchslocher, T. Albrecht, S. Henzler, M. Bargende, A. C. Culzer, and M. Soeprapto</i>	

Smart Engineering

A Data Mining Process Model to Support the Development of Energy Systems of Electric Vehicles.	263
<i>Stefan Hörting, Katharina Bause, and Albert Albers</i>	

Zero-Impact-Emissions

A Comparative Study of CDA vs LIVC on 11L Diesel Engine and Stock After Treatment System	281
<i>Nicola Andrisani and Giuseppe Sammito</i>	
Using Virtualization for Possible Trade-offs Between EU7 Start Budget Criteria and Drivability	286
<i>Lukas Behr, Mauro Cao, and Johannes Brenner</i>	
Zero-impact Emissions From a Gasoline Car with Advanced Emission Controls and E-fuels	302
<i>Joachim Demuyne and Dirk Bosteels</i>	
Numerical Investigation on the Mechanism of Tumble Caused Cycle-to-Cycle Variation of High-Tumble Spark-Ignition Engine	314
<i>Ye Feng, Niklas Mirsch, Michael Grill, André Casal Kulzer, Marco Günther, and Stefan Pischinger</i>	

3D-CFD Full Engine Simulation of Post-Oxidation by Means of Secondary Air Injection	330
<i>Mario Pipolo, Andr�� Casal Kulzer, Marco Chiodi, Madan Kumar, and Yasuo Moriyoshi</i>	
Autorenverzeichnis	353
