

1	Introduction	1
1.1	Motivation	1
1.2	State of the Art	3
1.3	Structure	5
1.4	Achievements of this Work	7
1.5	List of own Publications on this Ph.D. Thesis	7
2	Theoretical Principles	9
2.1	Basics of Linear Elasticity	9
2.2	Nature of Polarized Light	12
2.2.1	Nature of Light	12
2.2.2	Types of Polarized Light	14
2.2.3	Stokes Parameters	14
2.3	Polarization of Light	18
2.3.1	General	18
2.3.2	Polarization by Scattering	19
2.3.3	Polarization by Reflection	21
2.4	Brewster's Angle	22
2.5	Passage of Light through Media	24
2.6	Basics of Photoelasticity	25
2.6.1	General	25
2.6.2	Artificial Birefringence	26
2.6.3	Stress-Optical Law	27
2.6.4	Plane and Circular Polariscopes	28
3	Glass and their Photoelastic Behaviour	33
3.1	General	33
3.2	Residual Stresses	37
3.3	Photoelastic Behaviour	40
3.4	Visual Perception of Anisotropy Effects	42

4	Photoelastic Methods for Measuring Anisotropy Effects	45
4.1	General	45
4.2	Scattered Light Method	45
4.3	RGB Photoelasticity	49
4.4	Half-Wavelength and Multi-Wavelength Photoelasticity	52
4.5	Phase-Shifting Methods	54
4.6	PSM for Skylight Observation	58
5	Photoelastic Measurements on Tempered Flat Glass	61
5.1	Validation Experiments	61
5.1.1	Accuracy and Precision	61
5.1.2	Temperature Dependency	64
5.2	Specimen	66
5.3	Influence from Geometry Parameters	67
5.3.1	Thickness	67
5.3.2	Size	68
5.3.3	Holes and Cut Outs	69
5.4	Influence from Glass-Specific Parameters	70
5.4.1	Type of Glass	70
5.4.2	Tempering Level	72
5.5	Influence from Furnace Parameter	73
5.5.1	Glass Position	73
5.5.2	Glass Orientation	73
6	Experimental Field Studies on Tempered Flat Glass	77
6.1	Design and Construction the Test Facility	77
6.2	Setup and Specimen	79
6.3	Influence from the Building Environment and Use	81
6.3.1	Background Lighting	81
6.3.2	Reflection Disturbances	82
6.4	Influence from Viewing	84
6.4.1	Viewing Angle	84
6.4.2	Viewing Position	85
6.4.3	Viewing Direction and Sun Position	87
6.5	Influence from Skylight Polarization	89
6.6	Visual Intensity of Anisotropy Effects	91
6.7	Correlation between Measurement and Observation	94
7	Methods for evaluating Anisotropy Effects in Glass	99
7.1	Evaluation Zone	99
7.2	Statistical Method - Quantile Value	100

7.3	Threshold Method - Isotropy value	103
7.4	Texture Analysis.....	104
7.5	Method and Combined Textural Feature CCP.....	106
8	Evaluation and Concept	109
8.1	Assessment of Evaluation Methods	109
8.2	Anisotropy Quality of Tempered Flat Glass.....	115
8.3	Evaluation Concept	120
8.3.1	General.....	120
8.3.2	Definition of the Quality Classes	120
8.3.3	Requirements for the Measurement	122
8.3.4	Procedure of the Evaluation Concept.....	122
8.4	Discussion	123
9	Summary and further Research	127
	References	133
A	Experiments Results	145
B	Field Study Test Results	147
