Part I	<hr/>	ix
Foreword		xii
Acknowledgments		xii
Index of abbreviations		xiv
Statistics glossary		xvi
Part II	<hr/>	xix
How to use this handbook		xxi
Part III	<hr/>	1
1 Acute kidney injury (AKI)	<hr/>	3
Atrial natriuretic peptide		4
Hydroxyethyl starch (1)		8
Hydroxyethyl starch (2)		14
Sodium bicarbonate		19
AKI in cardiac surgery		25
2 Acute respiratory failure (ARF) – Acute respiratory distress syndrome (ARDS)	<hr/>	29
Higher versus lower PEEP		30
Recruitment manoeuvres		34
Inhaled nitric oxide		39
Aerosolized prostacyclin		43
Pharmacological therapies for ARDS		46
Corticosteroids in ARDS		50
ECMO		54
3 Acute respiratory failure – Non-ARDS	<hr/>	57
Corticosteroids for pneumonia		58
Corticosteroids to prevent and treat post extubation stridor		64
Corticosteroids to prevent extubation failure		70
Protocolized versus non-protocolized weaning		75
NPPV for weaning		82
Heated humidification versus HME		88
Pleural effusions drainage		93
4 Cardiovascular dynamics	<hr/>	99
Atrial fibrillation		100
Therapeutic hypothermia		104
Vasopressin for vasodilatory shock		109
Pre-emptive haemodynamic intervention		114

Contents

5 Ethics	121
Organ donation	122
6 General	127
Stress ulcer prophylaxis	128
Critical illness polyneuropathy and polymyopathy	134
Thromboprophylaxis	139
Music therapy	143
7 Health technology	151
Chest radiography	152
Oesophageal doppler monitoring	157
Computerised decision support systems	165
8 Infection	169
Peripheral venous catheters	170
Procalcitonin	174
Continuous beta-lactam antibiotics	179
Ventilator-associated pneumonia	183
Selective decontamination of the digestive tract	187
Antibiotic prophylaxis for pancreatic necrosis	191
9 Neuro-intensive care	195
Haemostatic drugs for TBI	196
Routine ICP monitoring	199
Cooling post stroke	202
10 Nutrition and metabolism	207
Early enteral nutrition	208
Nutrition in pancreatitis	212
Enteral versus parenteral nutrition in pancreatitis	216
Glucose-insulin-potassium infusion	223
11 Outcomes	227
Off-hours admission and mortality	228
Risk of readmission to ICU	232
Quality of life after ICU	236
Long-term mortality after ICU	241
Health insurance in the USA	245
12 Paediatric intensive care	251
Continuous negative extrathoracic pressure	252
Heliox for croup	255
Bacterial meningitis	258
Nutritional support for critically ill children	263
Other relevant reviews	265

Contents

13 Sepsis	267
Early versus late broad spectrum antibiotics	268
Combination antibiotics	270
De-escalation of antibiotics	275
Albumin for fluid resuscitation	278
Corticosteroids for severe sepsis & septic shock	283
Granulocyte & granulocyte-macrophage colony stimulating factor	292
14 Trauma and emergency medicine	297
Chest-compression-only CPR for out of hospital arrest	298
Part IV	303
Appendix A: Review titles	305
Appendix B: Corresponding authors	308
Appendix C: The experts	314
Appendix D: The Systematic Review Group Board	317
Appendix E: Additional references from the text	319
