List of Publications	xxix
Chapter 1	1

Introduction

1.1	Background and Problem	1
1.2	Study Area	6
1.2.1	Indus River Basin (IRB)	6
1.2.2	Mangla Dam	7
1.3	Research Objectives	9
1.4	Conceptual Framework	10
1.5	Potentials Benefits of the Study	11
1.5.1	Benefits for the Field:	11
1.5.2	Benefits for Society:	12
1.6	Thesis Structure	12
Chapter 2		17

Reconstruction of Sediment Load Data in Rivers

2.1	Assessment of Soft Computing Techniques for the Prediction of Suspended Sediment Loads in Rivers	17
2.1.1	Introduction	18
2.1.2	Methodology	22
2.1.2.1	Sediment Rating Curve	22

2.1.2.1.1	Quasi-Maximum Likelihood Estimator of Ferguson Method	23
2.1.2.1.2	Smearing Coefficient	23
2.1.2.2	Local Linear Regression (LLR)	23
2.1.2.3	Artificial Neural Networks (ANN)	23
2.1.2.4	Wavelet Transform (WT)	24
2.1.2.5	Gamma Test (GT)	25
2.1.2.6	Data Normalization	26
2.1.2.7	Training and Testing of ANN and WANN Models	26
2.1.2.8	Limitations and Uncertainties in SSL Prediction	27
2.1.2.9	Model Performance Evaluation	28
2.1.3	Site Description	29
2.1.3.1	Gauging Stations	29
2.1.3.2	Statistical Analysis of Data	31
2.1.4	Model Application and Results	32
2.1.4.1	Selection of Optimal Input Combinations Based on Gamma Test (GT)	32
2.1.4.2	M-Test for the Selection of Training Data Length	33
2.1.4.3	The Standard Rating Curve (SRC) Approach	34
2.1.4.4	The Suspended Sediment Load (SSL) Estimation through Local Linear Regression Models	36
2.1.4.5	The Suspended Sediment Load (SSL) Estimation through ANN Models	38
2.1.4.6	The Suspended Sediment Load (SSL) Estimation through WANN Models	40
2.1.4.7	Comparison of Different Model's Performance	43
2.1.5	Conclusions	45
2.2	A Comparison of Different Soft Computing Techniques for the Estimation of Suspended Sediment Load in Rivers	49
2.2.1	Introduction	49
2.2.2	Methodology	51
2.2.2.1	Sediment Rating Curve (SRC)	51

2.2.2.2	Local Linear Regression (LLR)	52
2.2.2.3	Artificial Neural Networks (ANN)	52
2.2.2.4	Wavelet Transform (WT).....	52
2.2.2.5	Gamma Test (GT)	52
2.2.3	Site Description.....	53
2.2.4	Model Application and Results	54
2.2.4.1	GT to Determine the Optimal Input Combinations.....	54
2.2.4.2	Application of the Sediment Rating Curve (SRC) Approach	55
2.2.4.3	The SSL Estimation Using Local Linear Regression (LLR) Models	55
2.2.4.4	The SSL Estimation Using Artificial Neural Network (ANN) Models	56
2.2.4.5	The SSL Estimation using WANN Models	57
2.2.4.6	Comparison of Different Applied Models Performance	57
2.2.5	CONCLUSIONS.....	59
Chapter 3		61
	<i>Assessment of The Hydrological and Coupled Soft Computing Models, Based on Different Satellite Precipitation Datasets, To Simulate Streamflow and Sediment Load in A Mountainous Catchment</i>	
3.1	Introduction	62
3.2	Study Site	65
3.3	Data Description.....	66
3.3.1	Observed Data	66
3.3.2	Satellite-based Precipitation Datasets (SPDs).....	67
3.3.3	Spatial Data	68
3.4	Methodology	69
3.4.1	Bias Correction (BC).....	70
3.4.2	Hydrological Model	71
3.4.3	Artificial Neural Network (ANN).....	72
3.4.4	Random Forest (RF).....	72

3.4.5	Support Vector Regression (SVR)	73
3.4.6	Hybrid Models Development	73
3.4.7	Model Performance Evaluation	74
3.5	Result and Discussion.....	75
3.5.1	Comparing Observed Data with SPDs and their Bias Correction	75
3.5.2	Evaluation of SWAT Models	76
3.5.3	Evaluation of SWAT-ANN Models	79
3.5.4	Evaluation of SWAT-RF Models	80
3.5.5	Evaluation of SWAT-SVR Models	82
3.5.6	Models Comparison for different SPDs	83
3.5.7	Suspended Sediment Load Prediction	84
3.6	Conclusions	86
Chapter 4		89
	<i>Simulating the Impact of Climate Change with Different Reservoir Operating Strategies on Sedimentation of the Mangla Reservoir, Northern Pakistan</i>	
4.1	Introduction	90
4.2	Study Area	93
4.2.1	Description of the Study Area	93
4.2.2	Sources of Sediment in the Jhelum River Basin.....	96
4.2.3	Impact of Sediments on Turbines.....	96
4.3	Data Description.....	97
4.3.1	Reservoir Geometric Data	97
4.3.2	River Flow Data	98
4.3.3	Sediment Data	99
4.3.4	Reservoir Operational Levels	100
4.4	Methodology.....	102
4.4.1	Statistical Measures for Model Performance Evaluation	102

4.4.2	Missing and Future Sediment Prediction Techniques.....	103
4.4.2.1	Sediment Rating Curves (SRCs).....	103
4.4.2.2	Artificial Neural Network Model (ANN).....	103
4.4.3	Hydraulic Model Description.....	104
4.5	Results and Discussion.....	106
4.5.1	Sensitivity Analysis for Calibration and Validation of the Numerical Model.....	106
4.5.2	Impact of Future Reservoir Operating Scenarios.....	111
4.5.3	General Lessons Learnt from the Present Study.....	116
4.6	Conclusions.....	117
Chapter 5		121
	<i>Conclusions and Recommendations</i>	
5.1	Summary.....	121
5.2	Conclusions.....	121
5.3	Future Outlooks.....	124
References		127
