Automated Grid Compatibility Tests, As Well as Status and Perspective for Further Future Grid Stability Requirements for Fixed and Mobile Charging Device after 2022 in A-CH-CZ	1
<i>Reinhard Nenning</i>	
Community Based e-charging Infrastructure—A Solution for Rural Areas?	11
<i>Jessica Rövekamp</i>	
Challenges in Grid Integration of Electric Vehicles in Urban and Rural Areas.	26
<i>Jakob Gemassmer, Carolin Daam, and Ricardo Reibsch</i>	
Harmonics in Industrial Grids as a Result of Charging Infrastructure in Employee Parking Lots.	38
<i>Julia Gartner, Zexuan Xu, Jonas Wussow, and Bernd Engel</i>	
Efficient Charging of Electric Vehicles by Intelligent Load Management	53
<i>Ursel Willrett</i>	
Resilient Supply Chains and Robust Strategies for the Transformation of the Automotive Industry	64
<i>Benjamin Frieske und Sylvia Stieler</i>	
Design to CO ₂ for a Sustainable Product Lifecycle	82
<i>Martin Rothbart, Christoph Sams, Thomas Schmid, and Dr. Rittmar von Helmolt</i>	
Future Electric Filling Station—20 × 750 KW Power with Intelligent Load and Tariff Management.	90
<i>Sebastian Ewert, Hendrik Wiethoff, Michael Wagner, Udo Heller, and Dr. Jan Schmidt</i>	
Intelligent Charging Load Management in Combination with Local Energy Systems for Residential, Commercial and Industrial Buildings	105
<i>Dirk Pietruschka, Fabian Förch, Daniel Lust, and Pawan Kumar Elangovan</i>	
Cost Optimization of a Vehicle Fleet Using V2G	121
<i>Lucas Mödder, Johannes Moritz Maiterth, Rene Savelsberg, and Jakob Andert</i>	

Bidirectional Charging Management—A Highly Interconnected System 137
Xaver Pfab, Dr. Stephan Hell, Wolfgang Duschl, and Frank Burghardt

Regulatory Challenges for the Provision of Ancillary Services
from Electric Vehicles 151
Jürgen Neubarth, Erdem Uzun, and Andreas Lesny

Project Bidirectional Charging Management—Insights and Evaluation
of the Field Trial 165
*Adrian Ostermann, Theodor Haug, Veronika Engwerth, Vincenz Regener,
and Helena Hahne*
