The TCG 7.8 H2 – Further Development Steps to Realize a CO ₂ Free-Powertrain for NRMM	1
<i>Georg Töpfer, Heiner Bülte, Benedikt Nork, and Carsten Funke</i>	
The Development of a 6-Cylinder Hydrogen Engine for the Off-Highway Market.	13
<i>Bouzid Seba and Ulrich Weiss</i>	
Investigation of An Ammonia Diesel Dual-Fuel Combustion Process on a Heavy-Duty Single Cylinder Research Engine for the Development of Suitable Simulation Tools for Maritime Applications	24
<i>Till Mante, Sascha Prehn, Martin Theile, Lars Seidel, Laura Mestre, Bert Buchholz, and Fabian Mauss</i>	
H2 ICE DI Multicylinder Engine Tests for Thermodynamics and Component Development	40
<i>Simon Schneider, Christian Trabold, Thomas Friedrich, Florian Mayer, Fabian Weller, and Roman Stiehl</i>	
Assessment of a Direct-Injection, Spark-Ignited, Hydrogen-Fuelled Heavy-Duty Engine.	53
<i>John Hughes, David Bennet, Angela Loiudice, Nicholas Coles, Trevor Downes, Agam Saroop, Richard Penning, Lukáš Valenta, Peter Rabanser, Jonathan Davis, Jackson Harvey-Bush, Alvaro Concepcion Calero, Richard Osborne, Penny Atkins, Roger Allcorn, and Nigel Fox</i>	
The Compact Catalytical Heater (CCH): Thermal Management for HD EU-VII/EPA-27 with Low Impact on Existing EATS Architectures	76
<i>Manuel Presti, Oswald Holz, Mathias Keck, and Dennis Sailer</i>	
Liebherr's Approach to Hydrogen Fuel Injection Systems.	95
<i>Richard Pirkel, Mario D'Onofrio, Lydia Kapusta, and Dennis Herrmann</i>	
Hydrogen Dosing Systems for Large Engines: Challenges and Potentials of Three Different Approaches	112
<i>Enrico Bärow, Michael Willmann, Andreas Kühner, and Rick Boom</i>	

Hydrogen Storage Technologies	123
<i>Mathias Keck, Dirk Bessey, Frank Buehler, and Manuel Eugen Faiß</i>	
Well-to-Wheel CO ₂ -Analysis of Different Powertrain Systems on Representative Heavy-Duty Mission Profiles	131
<i>Nicolas Hummel, Tim Herold, and Christian Beidl</i>	
Hydrogen in the Gas Network – Challenges and Solutions for High Performance Engines for Power Generation.	143
<i>Clément Leroux, Robert Böwing, Bernadet Hochfilzer, Alexander Zuschnig, and Manuel Behr</i>	
Safe and Sustainable Testing of Hydrogen Powertrains	158
<i>Nicolas Weyland</i>	
Hybrid PEM Fuel Cell Systems	167
<i>Sönke Gößling, Matthias Bahr, and Felix Smyrek</i>	
Fuel Cell System Development for Heavy Duty Application	172
<i>Stephan Schnorpfel, Arne Kotowski, Hauke Sötje, and Guido Hartmann</i>	
Autorenverzeichnis	185
