

Table of contents

Ferroelectrics and related substances

Subvolume A1: Oxides

Perovskite-type oxides and LiNbO_3 family

I Introduction [T. Mitsui, E. Nakamura]

IA	General remarks	1
IB	Definition of ferroelectrics and antiferroelectrics	1
IC	Remarks on some fundamental concepts and quantities	3
ID	Survey of history of ferroelectrics research	13
IE	Symbols and units	15
IF	Survey of contained data in subvolume A1	24
	Survey of contained data in subvolume A2	41
IG	Outline of subvolume B: Non-oxides	62

II Data

1	Perovskite-type oxides [M. Adachi, Y. Akishige, K. Deguchi, T. Ikeda, M. Okuyama, A. Sakai, E. Sawaguchi, T. Takenaka, T. Tsukamoto, T. Yagi]	67
1A	Simple perovskite-type oxides	67
1B	Complex perovskite-type oxides	243
1B-a	$(\text{A}_{1/2}^{1+}\text{A}_{1/2}^{3+})\text{MO}_3$ - type complex perovskite oxides	243
1B-b	$\text{A}^{2+}(\text{M}_{1/2}^{2+}\text{M}_{1/2}^{6+})\text{O}_3$ - type complex perovskite oxides	247
1B-c	$\text{A}^{2+}(\text{M}_{1/2}^{3+}\text{M}_{1/2}^{5+})\text{O}_3$ - type complex perovskite oxides	258
1B-d	$\text{A}^{2+}(\text{M}_{1/3}^{2+}\text{M}_{2/3}^{5+})\text{O}_3$ - type complex perovskite oxides	285
1B-e	$\text{A}^{2+}(\text{M}_{2/3}^{3+}\text{M}_{1/3}^{6+})\text{O}_3$ - type complex perovskite oxides	303
1B-f	$\text{A}(\text{M},\text{M}',\text{M}'')\text{O}_3$ - type complex perovskite oxides	307
1B-g	$(\text{A},\text{A}')(\text{M},\text{M}')\text{O}_3$ - type complex perovskite oxides	307
1C	Solid solutions with perovskite-type oxides as end members	311
1C-a	Solid solutions with simple perovskite-type oxides as end members	311
1C-b	Solid solutions with complex perovskite-type oxides as end members	395
1C-c	Ternary solid solutions, etc. with perovskite-type oxides as constituents	450
2	LiNbO_3 family [T. Hikita]	506
2A	Pure compounds	506
2B	Solid solutions	563
