Superconductors

Transition temperatures and characterization of elements, alloys and compounds

Subvolume e: Tl ... Zr

Introduction (R. FLÜKIGER)	XIV
1 Subject matter	XIV
2 General remarks on the contents of subvolumes III/21a ... 21e	XIV
3 Selection, arrangement and sequence of the specific data in the tables	XIV
4 List of symbols and abbreviations	XXII
5 Alphabetical list of frequently used structure types	XXVIII
Tl (Thallium) (H.L. LUO, T. WOLF)	1
Tl element, bulk	1
– transition temperatures only	1
– specific heat data	1
– critical field data	2
– other physical properties	2
Tl element under pressure	3
Tl films, deposited at > 77 K	5
Tl films, deposited at ≤ 77 K	5
Tl films with overlayers, adsorbates etc.	7
TlX, dilute alloys	9
Tl, implanted	13
Tl based alloys and compounds	13
Tl–Ag ... Tl–Zn	13
Tm (Thulium) (T. WOLF)	24
Tm element	24
Tm based alloys and compounds	24
U (Uranium) (F. HULLIGER, T. WOLF)	25
U element, bulk	25
– transition temperatures only	25
– specific heat data	25
– critical field data	26
– other physical properties	27
U element under pressure	30
U element, film	31
U based alloys and compounds	31
U–As	31
U ₆ Co	32
U–Co	33
U–Cr	34
U ₆ Fe	35
U–Fe ... U–Zr	37

V (Vanadium) (T. WOLF, J.Q. Xu)	46
V element, bulk	46
– transition temperatures only	46
– specific heat data	46
– critical field data and critical currents	47
– other physical properties	51
V element under pressure	53
V films, deposited at > 77 K	53
– transition temperatures only	53
– critical field data and critical currents	54
– other physical properties	55
V films, deposited at ≤ 77 K	56
V powders	57
V granular films	57
V/X junctions	58
V/X multilayers and superlattices	58
V wires	59
VX, dilute alloys	60
V, implanted	61
V based alloys and compounds	61
V–Al (cubic W phase)	61
V ₃ Al (Cr ₃ Si phase), bulk	62
V ₃ Al (Cr ₃ Si phase), films	63
V–Al–X (Cr ₃ Si phase, X = As ... Au), pseudobinaries	64
V ₃ Al _{1-x} Ga _x (Cr ₃ Si phase)	65
V ₃ Al _{1-x} Ge _x (Cr ₃ Si phase)	65
V–Al–X (Cr ₃ Si phase, X = Nb ... Sn), pseudobinaries	67
V–Al–X, ternaries	68
V–As	69
V–Au (cubic W phase)	69
V ₃ Au (Cr ₃ Si phase)	69
– transition temperatures only	69
– specific heat data	70
– critical field data	71
– other physical properties	71
V–Au–X (Cr ₃ Si phase), pseudobinaries	72
V–B	73
V–Be	73
V–Bi	73
V–C	74
V–Cd	75
V–Ce	76
V–Co (cubic W phase)	76
V ₃ Co (Cr ₃ Si phase)	76
V ₃ Co _{1-x} X _x (Cr ₃ Si phase), pseudobinaries	76
V–Cr	77
V–Cu	78
V–D	79
V–Dy	79
V–Er	79
V–Eu	79

V-Fe	79
V-Ga (various phases), bulk	80
V-Ga (various phases), films	82
V ₃ Ga (Cr ₃ Si phase), bulk	82
- transition temperatures only	82
- specific heat data	88
- critical field data and critical currents	89
- other physical properties	91
V ₃ Ga (Cr ₃ Si phase), under pressure	93
V ₃ Ga (Cr ₃ Si phase), films	93
V ₃ Ga _{1-x} X _x (Cr ₃ Si phase), pseudobinaries, bulk	95
- transition temperatures only	95
- specific heat data	102
- critical field data and critical currents	102
- other physical properties	103
V ₃ Ga _{1-x} X _x (Cr ₃ Si phase), pseudobinaries: under pressure	104
V ₃ Ga _{1-x} X _x (Cr ₃ Si phase), pseudobinaries: films	104
V ₃ Ga (Cr ₃ Si phase), wires and tapes	105
- In Situ technique	105
- vapor technique	106
- melt dipping technique	106
- P/M technique	108
- bronze diffusion technique	109
V-Ga (other phases)	117
V-Gd	117
V-Ge (various phases)	117
V ₃ Ge (Cr ₃ Si phase), bulk	118
- transition temperatures only	118
- specific heat data	120
- critical field data	120
- other physical properties	120
V ₃ Ge (Cr ₃ Si phase), under pressure	121
V ₃ Ge (Cr ₃ Si phase), films	121
V ₃ Ge (Cr ₃ Si phase), wires	122
V ₃ Ge _{1-x} X _x (Cr ₃ Si phase), pseudobinaries, bulk	123
- transition temperatures only	123
- specific heat data	127
- other physical properties	127
V ₃ Ge _{1-x} X _x (Cr ₃ Si phase), pseudobinaries: under pressure	129
V ₃ Ge _{1-x} X _x (Cr ₃ Si phase), pseudobinaries: films	129
V-Ge (other phases)	129
V-H	130
V-H-X	130
V-Hf	132
V ₂ Hf (Cu ₂ Mg phase)	132
- transition temperatures only	132
- specific heat data	133
- critical field data	133
- other physical properties	134
V ₂ Hf (Cu ₂ Mg phase), under pressure	135

$V_2Hf_{1-x}X_x$ (Cu_2Mg phase), pseudobinaries	135
– transition temperatures only	135
– specific heat data	136
– critical field data and critical currents	136
– other physical properties	138
$V_2Hf_{1-x}X_x$ (Cu_2Mg phase), pseudobinaries: under pressure	140
V–Ho	140
V–In	141
V–Ir	141
V_3Ir (Cr_3Si phase)	141
– transition temperatures only	141
– specific heat data	142
– critical field data	142
– other physical properties	142
V–La	143
V–Lu	143
V–Mn	143
V–Mo	143
V–N	144
VN_x (NaCl phase), bulk	145
VN_x (NaCl phase), under pressure	146
VN_x (NaCl phase), films	146
V–Nb	147
V–Nb–X, ternaries	148
V–Nb–X–Y, quaternaries	151
V–Nd	152
V–Ni	152
V–O	153
V–Os	153
V–P	154
V–Pb	154
V–Pd	154
V–Pm	155
V–Pr	155
V–Pt	155
V_3Pt (Cr_3Si phase)	155
– transition temperatures only	155
– specific heat data	156
– critical field data	156
– other physical properties	157
$V_3Pt_{1-x}X_x$, pseudobinaries	158
V–Re	158
V–Rh	159
V–Ru	159
V–Sb	160
V–Sc	161
V–Si	162

V ₃ Si (Cr ₃ Si phase), bulk	163
– transition temperatures only	163
– specific heat data	170
– critical field data and critical currents	173
– other physical properties	176
V ₃ Si (Cr ₃ Si phase), under pressure	183
V ₃ Si (Cr ₃ Si phase), films	185
– transition temperatures only	185
– specific heat data	187
– critical field data and critical currents	189
– other physical properties	189
V/Si (Cr ₃ Si phase) multilayers	194
V ₃ Si (Cr ₃ Si phase), films: junctions	195
V ₃ Si _{1-x} X _x (Cr ₃ Si phase), pseudobinaries, bulk	196
– transition temperatures only	196
– specific heat data	203
– critical field data and critical currents	204
– other physical properties	205
V ₃ Si _{1-x} X _x (Cr ₃ Si phase), under pressure	209
V ₃ Si _{1-x} X _x (Cr ₃ Si phase), pseudobinaries: films	210
V ₃ Si _{1-x} X _x Y _y (Cr ₃ Si phase), quaternaries	211
V ₃ Si (Cr ₃ Si phase), wires	212
– In Situ technique	212
– melt dipping technique	212
– diffusion technique	213
– bronze diffusion technique	213
V–Sm	214
V–Sn	214
V ₃ Sn (Cr ₃ Si phase)	215
V ₃ Sn _{1-x} X _x (Cr ₃ Si phase), pseudobinaries	215
V–Sn–X, ternaries	216
V–Ta (cubic W phase)	217
V–Ta–X (cubic W phase), ternaries	218
V ₂ Ta (Cu ₂ Mg phase)	218
V–Ta–X, ternaries	219
V–Tb	219
V–Tc	219
V–Ti, bulk	220
V ₃ Ti _{1-x} X _x , ternaries	221
V–Ti, films	223
V–Ti	223
V–Tm	223
V–U	223
V–W	224
V–Y	224
V–Yb	224
V–Zn	224

V ₂ Zr (Cu ₂ Mg phase), bulk	224
– transition temperatures only	224
– specific heat data	225
– critical field data and critical currents	226
– other physical properties	226
V ₂ Zr (Cu ₂ Mg phase), bulk: under pressure	228
V ₂ Zr (Cu ₂ Mg phase), films	228
V ₂ Zr _{1-x} X _x (Cu ₂ Mg phase), pseudobinaries and multinarys: bulk	228
V ₂ Zr _{1-x} X _x (Cu ₂ Mg phase), pseudobinaries: films	233
V ₂ Zr _{1-x} Hf _x (Cu ₂ Mg phase), pseudobinaries: wires and tapes	233
V–Zr–X (other phases)	234
W (Tungsten) (T. WOLF)	235
W element, bulk	235
– transition temperatures only	235
– specific heat data	235
– critical field data	235
– other physical properties	235
W films, deposited at > 77K	237
W films, deposited at ≤ 77 K	239
WX, dilute alloys	239
W based alloys and compounds	240
W–B ... W–Zr	240
Xe (Xenon) (T. WOLF)	247
Xe element	247
Xe element under pressure	247
Xe based alloys and compounds	248
Y (Yttrium) (T. WOLF)	248
Y element, bulk	248
– transition temperatures only	248
– specific heat data	248
– other physical properties	249
Y element under pressure	249
Y films	251
YX, dilute alloys	251
Y based alloys and compounds	252
Y–Al ... Y–Co	252
Y ₄ Co ₃ :	
– transition temperatures only	253
– specific heat and critical field data	254
– other physical properties	254
(Y _{1-x} X _x) ₄ (Co _{1-y} Z _y) ₃ , ternaries	255
Y ₉ Co ₇ :	
– specific heat data	256
– critical field data	256
– other physical properties	257
Y ₉ Co ₇ X, dilute alloys	259
(Y _{1-x} X _x) ₉ (Co _{1-y} Z _y) ₇ , ternaries	259
Y–Cu ... Y–Zn	260

Yb (Ytterbium) (T. WOLF)	264
Yb element, bulk	264
Yb element under pressure.	265
Yb films	265
Yb based alloys and compounds	265
Zn (Zinc) (T. WOLF)	265
Zn element, bulk	265
– transition temperatures only	265
– specific heat data	266
– critical field data	267
– other physical properties	267
Zn element under pressure	269
Zn films, deposited at > 77 K	269
Zn films, deposited at ≤ 77 K	269
ZnX, dilute alloys	271
Zn, implanted	274
Zn based alloys and compounds	275
Zn–Ag ... Zn–Zr	275
Zr (Zirconium) (T. WOLF)	281
Zr element, bulk	281
– transition temperatures only	281
– specific heat data	282
– critical field data	282
– other physical properties	283
Zr element under pressure	283
Zr films, deposited at > 77 K	284
Zr films, deposited at ≤ 77 K	285
ZrX, dilute alloys	285
Zr, implanted	287
Zr based alloys and compounds	289
Zr–Ag ... Zr–Zn	289
