

Contents

Preface — V

Foreword — VII

About Prof. György Keglevich — IX

List of Contributors — XIII

Hélène Pellissier

Chapter 1

Organocatalytic dynamic kinetic resolution in the total synthesis of bioactive heterocycles — 1

Rajjakkur Rahaman, Prasenjit Das, Poulami Hota, and Dilip K. Maiti

Chapter 2

Organophotoredox-catalyzed synthesis of bioactive heterocycles — 17

Rahul Dev Mandal, Moumita Saha, and Asish R. Das

Chapter 3

Synthesis of imidazo[1,2-*a*]pyridines and indazole under metal-free conditions — 47

Akbar Ali, Huma Masood, Muhammad Ibrahim, Tahir Maqbool, Nadia Akram, and Marcio Weber Paixao

Chapter 4

Microwave-assisted metal-free solid-support-catalyzed synthesis of bioactive heterocycles — 81

Akbar Ali, Zill-e-Rehman Abbas, Muhammad Ibrahim, Atta Ul Haq, Nadia Akram, and Amjad Hussain

Chapter 5

Graphene oxide (GO): an efficient and recyclable catalyst for one-pot synthesis of bioactive heterocycles — 103

Tahir Farooq, Razia Noreen, Bushra Parveen, Kulsoom Ghulam Ali,
Muhammad Abdul Qayyum, Arruje Hameed, Tanzeela Khalid, Sahar Ilyas,
and Touseef Ur Rehman

Chapter 6

L-Proline-catalyzed green synthesis of functional *N*-heterocycles — 131

Chebolu Naga Sesha Sai Pavan Kumar and Vaidya Jayathirtha Rao

Chapter 7

Molecular iodine-catalyzed synthesis of *N*-heterocycles and some important organic transformations — 163

Xiangyu Zhan and Yunfei Du

Chapter 8

The aryl iodine-catalyzed synthesis of bioactive heterocycles via hypervalent iodine species generated in situ — 189

Gana R. J., Kokila Sakthivel, Ritu Mamgain, and Fateh V. Singh

Chapter 9

Hypervalent iodine-mediated synthesis of biologically important heterocycles via dearomatization of phenols — 239

Sathish Kumar J., Anindya Borah, Ritu Mamgain, and Fateh V. Singh

Chapter 10

Hypervalent iodine-mediated synthesis of biologically important nitrogen- and oxygen-containing heterocycles — 285

Rajarshi Sarkar, Dripta De Joarder, and Dilip K. Maiti

Chapter 11

Synthesis of bioactive heterocycles involving λ^3 -hypervalent iodine — 319

Index — 339
