

Table of Contents

Part A: Biographical

What I Learned from Brian	1
<i>Hermann Kopetz</i>	
Brian Randell: A Biographical Note	7
<i>John L. Lloyd and Tom Anderson</i>	

Part B: Conference Papers

On Building a Referee's Avatar	15
<i>Algirdas Avižienis</i>	
From Theory to Practice: The Invention of Programming, 1947-51	23
<i>Martin Campbell-Kelly</i>	
Transactions: From Local Atomicity to Atomicity in the Cloud	38
<i>David Lomet</i>	
From DSS to MILS (Extended Abstract)	53
<i>John Rushby</i>	
Pre-electronic Computing	58
<i>Doron Swade</i>	
Whetstone Wanderings	84
<i>Brian Wichmann</i>	

Part C: Contributed Papers

Using Real-Time Road Traffic Data to Evaluate Congestion	93
<i>Jean Bacon, Andrei Iu. Bejan, Alastair R. Beresford, David Evans, Richard J. Gibbens, and Ken Moody</i>	
Fault Tolerant Autonomic Computing Systems in a Chemical Setting ...	118
<i>Jean-Pierre Banâtre, Christine Morin, and Thierry Priol</i>	
Out of a Closet: The Early Years of the Computer Museum	130
<i>Gordon Bell</i>	
Timing Faults and Mixed Criticality Systems	147
<i>Alan Burns and Sanjoy Baruah</i>	

Professor Brian Randell and the History of Computing	167
<i>Paul E. Ceruzzi</i>	
Computer Storage Fragmentation: Pioneering Work of Brian Randell . . .	174
<i>Ed Coffman</i>	
IBM-ACS: Reminiscences and Lessons Learned from a 1960's Supercomputer Project	185
<i>Lynn Conway</i>	
The Belgian Electronic Mathematical Machine (1951-1962): An Account	225
<i>Pierre-Jacques Courtois</i>	
On the Resilience of the Dependability Framework to the Intrusion of New Security Threats	238
<i>Marc Dacier</i>	
Virtual Fault Tolerance	251
<i>Peter J. Denning</i>	
Recovery Blocks	261
<i>Tony Hoare</i>	
The Development and Writing of "Process Structuring"	267
<i>J.J. Horning</i>	
A Tolerant Approach to Faults	273
<i>Michael Jackson</i>	
Causality in Structured Occurrence Nets	283
<i>Jetty Kleijn and Maciej Koutny</i>	
Diversity	298
<i>John C. Knight</i>	
Swords and Ploughshares: Connections between Computer Projects for War and Peace, 1945-55	313
<i>Simon Lavington</i>	
The Evolution of the Arjuna Transaction Processing System	323
<i>M.C. Little and S.K. Shrivastava</i>	
Making Experiments Dependable	344
<i>Roy Mazon</i>	
Wallpaper Maps	358
<i>M. Douglas McIlroy</i>	
Incremental Design: Programming with Holes and Evolvers	376
<i>Ron Morrison, Dharini Balasubramaniam, and Brian Warboys</i>	

Carrying Goals to Newcastle: A Tribute to Brian Randell	387
<i>Peter G. Neumann</i>	
Distributed Computing in the 21st Century: Some Aspects of Cloud Computing	393
<i>Fabio Panzieri, Ozalp Babaoglu, Stefano Ferretti, Vittorio Ghini, and Moreno Marzolla</i>	
Software Engineering: Multi-person Development of Multi-version Programs	413
<i>David Lorge Parnas</i>	
Tolerance of Design Faults	428
<i>David Powell, Jean Arlat, Yves Deswarte, and Karama Kanoun</i>	
On the Implementation of Concurrent Objects	453
<i>Michel Raynal</i>	
Beyond Traces and Independence	479
<i>Fred B. Schneider</i>	
Socio-technical Complex Systems of Systems: Can We Justifiably Trust Their Resilience?	486
<i>Luca Simoncini</i>	
Safety, Security and Dependability in Crowd Computing	498
<i>Władysław M. Turcki</i>	
Achieving Dependability in Service-Oriented Systems	504
<i>Jie Xu</i>	
Author Index	523
