Part I Linear Theory

1	Single Oscillator	3
1.1	Harmonic Oscillator	3
1.2	Damped Oscillator	9
1.3	Forced Oscillator	20
1.4	Harmonic Excitations and Resonance	26
2	Coupled Oscillators	35
2.1	Conservative Oscillators	35
2.2	Dissipative Oscillators	42
2.3	Forced Oscillators and Vibration Control	49
2.4	Variational Principles	55
2.5	Oscillators with n Degrees of Freedom	60
3	Continuous Oscillators	71
3.1	Chain of Oscillators	71
3.2	String	76
3.3	Beam	82
3.4	Membrane	86
3.5	Plate	91
3.6	General Continuous Oscillators	98
4	Linear Waves	109
4.1	Hyperbolic Waves	109
4.2	Dispersive Waves	118
4.3	Elastic Waveguide	127
4.4	Energy Method	137

Part II Nonlinear Theory

5	Autonomous Single Oscillator	151
5.1	Conservative Oscillator	151
5.2	Dissipative Oscillator	159
5.3	Self-excited Oscillator	166
5.4	Oscillator with Weak or Strong Dissipation	176
6	Non-autonomous Single Oscillator	185
6.1	Parametrically-Excited Oscillator	185
6.2	Mathieu's Differential Equation	193
6.3	Duffing's Forced Oscillator	198
6.4	Forced Vibration of Self-excited Oscillator	205
7	Coupled Oscillators	215
7.1	Conservative Oscillators	215
7.2	Bifurcation of Nonlinear Normal Modes	223
7.3	KAM Theory	230
7.4	Coupled Self-excited Oscillators	238
8	Nonlinear Waves	247
8.1	Solitary and Periodic Waves	247
8.2	Inverse Scattering Transform	254
8.3	Energy Method	263
8.4	Amplitude Modulations	272
	Notation	285
	References	287
	Index	289
