

Contents

1	Introduction	1
1.1	Historical Gender Roles in the 21 st Century	1
1.2	Vertical Gender Segregation in Management	2
1.3	Female Quota to Counteract Vertical Gender Segregation	4
1.4	Gender Disparities in Natural Science / Academia	4
1.4.1	Innate and / or Socially Attributed STEM Performance Differences	5
1.4.2	Innate and / or Socially Attributed Variation in STEM Engagement and Attitude to Life	6
1.4.3	Explicit and Implicit Biases in Both Genders	7
1.4.4	Key Takeaway: <i>Leaky Pipeline Phenomenon</i> and Proposed Explanations	8
2	Research Focus and Relevance	11
2.1	Hypothesis 1: Female Underrepresentation Predominately Persists in Senior Positions in Natural Science / Academia	13
2.2	Hypothesis 2: The <i>Goal Congruity Theory</i> Provides an Incomplete Explanation for Female Underrepresentation in Natural Science	13
3	Materials and Methods	15
3.1	Materials	15
3.1.1	Software	15
3.1.2	Transcription Service	16
3.2	Methods	16
3.2.1	Hypothesis 1: Statistical Data Analysis	16
3.2.2	Hypothesis 2: Qualitative Study	18

4	Results	21
4.1	Hypothesis 1: Gender Distribution in Natural Science	22
4.1.1	Gender Distribution in Natural Science – Germany	22
4.1.2	Gender Distribution in Natural Science – Europe	24
4.1.3	Gender Distribution in Natural Science – U.S.	26
4.1.4	Key Takeaway: Gender Distribution in Natural Science	28
4.2	Hypothesis 2: Women In Natural Science – a Qualitative Analysis	28
4.2.1	Characterisation of Study Participants	29
4.2.2	Future Aspirations and Perception of Natural Science / Academia	38
4.2.3	Reasons to Stay in / Leave Natural Science / Academia	43
4.2.4	<i>Goal Congruity Theory</i> and Female Underrepresentation in Science / Academia	46
5	Discussion	51
5.1	Hypothesis 1: Gender Distribution in Natural Science	51
5.1.1	Gender Distribution in Natural Science – Germany	52
5.1.2	Gender Distribution in Natural Science – Europe	52
5.1.3	Gender Distribution in Natural Science – U.S.	53
5.2	Hypothesis 2: Women in Natural Science – a Qualitative Analysis	54
5.2.1	Characterisation of Study Participants	55
5.2.2	Future Aspirations and Perception of Natural Science / Academia	55
5.2.3	Reasons to Stay in / Leave Natural Science / Academia	57
5.2.4	<i>Goal Congruity Theory</i> and Female Underrepresentation in Science / Academia	58
6	Limitations	61
6.1	Hypothesis 1: Gender Distribution in Natural Science	61
6.2	Hypothesis 2: Women in Natural Science – a Qualitative Analysis	63

Contents	xiii
7 Conclusion and Greater Benefit	65
7.1 Final remarks	65
7.2 Greater Benefit	67
