|                     |                                                      |     |
|---------------------|------------------------------------------------------|-----|
| <u>Chapter I:</u>   | Equivariant Embeddings of Tori . . . . .             | 1   |
| § 1.                | <u>B.SAINT-DONAT</u> : Affine Embeddings . . . . .   | 1   |
| § 2.                | <u>B.SAINT-DONAT</u> : General Embeddings. . . . .   | 20  |
| § 3.                | <u>G.KEMPF</u> : Cohomology and Convexity. . . . .   | 41  |
| <u>Chapter II:</u>  | Semi-Stable Reduction . . . . .                      | 53  |
|                     | by <u>D.MUMFORD</u>                                  |     |
| § 1.                | Toroidal Embeddings - Definitions. . . . .           | 54  |
| § 2.                | Toroidal Embeddings - Theorems . . . . .             | 73  |
| § 3.                | Reduction of the Theorem to a Construction . . . . . | 98  |
| <u>Chapter III:</u> | Construction of Nice Polyhedral Subdivisions . .     | 109 |
|                     | by <u>F.KNUDSEN</u>                                  |     |
| § 1.                | Definitions and Projective Subdivisions. . . . .     | 110 |
| § 2.                | Some Examples of Projective Subdivisions . . . . .   | 117 |
| § 3.                | Waterman Points. . . . .                             | 155 |
| § 4.                | Statement and Proof of the Main Theorem. . . . .     | 161 |
| <u>Chapter IV:</u>  | Further Applications. . . . .                        | 165 |
|                     | by <u>D.MUMFORD</u>                                  |     |
| § 1.                | Actions of $T^{n-1}$ on $X^n$ . . . . .              | 165 |
| § 2.                | Tits' Buildings. . . . .                             | 177 |
| § 3.                | Extensions to Schemes over $R$ . . . . .             | 190 |
