

Contents

1	Introduction and Learning Objectives	1
	References	3
Part I Fundamentals		
2	A Special Look at the Origin and Mindset of Cybernetics	7
2.1	What Cybernetics Is and What Cybernetics Is Not	8
2.1.1	Two Examples of Cybernetic Perspectives	9
2.1.2	Cybernetics in the Dictionary of Cybernetics	15
2.1.3	Cybernetics	20
2.2	Systemic and Cybernetic Thinking	24
2.2.1	Circular process in six steps	25
2.2.2	System Delimitation	25
2.2.3	Part and Whole	26
2.2.4	System of Effects	27
2.2.5	Structure and Behavior	29
2.2.6	Control and Development	29
2.2.7	Perception or the Cybernetics of Cybernetics	31
2.3	Control Questions	33
	References	34
3	Basic Concepts and Language of Cybernetics	35
3.1	System	38
3.2	Control Circuit and Elements	39
3.3	Negative Feedback—Balanced Feedback	46
3.4	Positive Feedback—Reinforced Feedback	47
3.5	Aim Resp. Purpose	49
3.6	Self-Regulation	49
3.7	Flow Equilibrium—Steady-State and Other Equilibria	50
3.8	Homeostasis	51
3.9	Variety	52
		ix

3.10	Ashby's Law of Requisite Variety	53
3.11	Autopoiesis	54
3.12	System Modeling	54
3.13	Control Questions	61
	References	61

Part II Cyberneticians and Cybernetic Models

4	Cybernetics and its Representatives	65
4.1	Norbert Wiener and Julian Bigelow	65
4.2	Arturo Rosenblueth	68
4.3	John von Neumann	68
4.4	Warren Sturgis McCulloch	70
4.5	Walter Pitts	71
4.6	William Ross Ashby	72
4.7	Gregory Bateson	75
4.8	Humberto Maturana and Francisco Varela	76
4.9	Stafford Beer	79
4.10	Karl Wolfgang Deutsch	79
4.11	Ludwig von Bertalanffy	81
4.12	Heinz von Foerster	81
4.13	Jay Wright Forrester	83
4.14	Frederic Vester	87
4.15	Concluding Remark	92
4.16	Control Questions	96
	References	96
5	Cybernetic Models and Orders	99
5.1	Cybernetics of Mechanical Systems	100
5.2	Cybernetics of Natural Systems	103
5.3	Cybernetics of Human Social Systems	108
5.4	First-order Cybernetics	110
5.5	Second-Order Cybernetics	113
5.6	Control Questions	115
	References	115

Part III Cybernetic Theories and Practical Examples

6	Cybernetics and Theories	119
6.1	Systems Theory	119
6.1.1	Günther Ropohl and his Systems Theory of Technology	120
6.1.2	Niklas Luhmann and his Theory of Social Systems	123
6.2	Information Theory	127

6.3	Algorithm Theory	128
6.4	Automata Theory	130
6.5	Decision Theory	132
6.6	Game Theory	133
6.7	Learning Theory	137
6.8	Control Questions	143
	References	144
7	Cybernetic Systems in Practice	147
7.1	Cybernetic Systems in Nature	150
7.1.1	Blood Sugar Control Loop	151
7.1.2	Pupils Control Loop	152
7.1.3	Cybernetic Model in the Forest Ecosystem	154
7.2	Cybernetic Systems in Technology	156
7.2.1	Control of Image Sharpness of a Camera	156
7.2.2	Position Control of the Read/Write Head in a Computer Hard Disk Drive	157
7.2.3	Control of Power Steering in a Motor Vehicle	158
7.2.4	Control of Room and Heating Water Temperature	159
7.3	Cybernetic Systems in the Economy	160
7.3.1	A Cybernetic Economic Model of Procurement-Induced Disturbances	163
7.3.2	The Cybernetic Control Loop as a Management Tool in the Plant Life Cycle	168
7.3.3	The CyberPractice Method by Dr. Boysen	171
7.4	Cybernetic Systems in Society	174
7.4.1	Sociocybernetics	175
7.4.2	Psychological Cybernetics	177
7.4.3	Cybernetic Governance	184
7.4.4	Cybernetics and Education—Learning Biology as an Opportunity	195
7.4.5	Cybernetics and Military	202
7.5	Control Questions	203
	References	204
8	Control Questions (Q N.N) With Sample Answers (A N.N) For Chapters 2 to 7	207
8.1	Chap. 2: A Special Look at the Origin and Way of Thinking of Cybernetics	207
8.2	Chap. 3: Basic Concepts and Language of Cybernetics	212
8.3	Chap. 4: Cybernetics and its Representatives	214
8.4	Chap. 5: Cybernetic Models and Orders	217
8.5	Chap. 6: Cybernetics and Theories	219

8.6	Chap. 7: Cybernetic Systems in Practice	230
