Preface — VII

1 Introduction — 1

2 Preliminary background — 9

- 2.1 Notations and functional spaces — 9
 - 2.1.1 Space of continuous functions — 9
 - 2.1.2 Spaces of integrable functions — 9
 - 2.1.3 Spaces of weighted continuous functions — 10
- 2.2 Special functions of fractional calculus — 11
 - 2.2.1 Gamma function — 11
 - 2.2.2 k -Gamma and k -beta functions — 12
- 2.3 Elements from fractional calculus theory — 13
 - 2.3.1 Fractional integrals — 13
 - 2.3.2 Fractional derivatives — 14
 - 2.3.3 Necessary lemmas, theorems, and properties — 17
- 2.4 Fixed point theorems — 23
- 2.5 Coincidence degree theory — 24

3 Caputo-type fractional differential equations — 26

- 3.1 Introduction and motivations — 26
- 3.2 Nonlinear implicit Caputo fractional differential equations — 27
 - 3.2.1 Existence results — 27
 - 3.2.2 Examples — 34
- 3.3 Existence results for nonlinear Caputo fractional differential systems — 35
 - 3.3.1 Existence results — 35
 - 3.3.2 An example — 50
- 3.4 Nonlinear periodic problems with Caputo exponential fractional derivative — 51
 - 3.4.1 Existence results — 51
- 3.5 Notes and remarks — 65

4 ψ -Caputo fractional integro-differential equations — 66

- 4.1 Introduction and motivations — 66
- 4.2 Periodic solutions for nonlinear fractional differential equations — 67
 - 4.2.1 Existence results — 68
 - 4.2.2 Examples — 78
- 4.3 Nonlinear Volterra–Fredholm integro-differential equations — 80
 - 4.3.1 Main results — 80
 - 4.3.2 Examples — 92

4.4 Notes and remarks — 94

5 Nonlinear fractional pantograph differential equations with ψ -Caputo derivative — 95

- 5.1 Introduction and motivations — 95
- 5.2 Periodic solutions for some nonlinear fractional pantograph differential equations — 96
 - 5.2.1 Existence results — 96
 - 5.2.2 Examples — 106
- 5.3 Wide class of fractional pantograph differential equations — 107
 - 5.3.1 Existence results — 107
 - 5.3.2 An example — 119
- 5.4 Nonlinear fractional pantograph integro-differential equations — 120
 - 5.4.1 Existence results — 121
 - 5.4.2 An example — 136
- 5.5 Notes and remarks — 137

6 Nonlinear ψ -Caputo fractional pantograph coupled systems — 138

- 6.1 Introduction and motivations — 138
- 6.2 Periodic solutions for pantograph coupled systems — 140
 - 6.2.1 Introduction — 140
 - 6.2.2 Existence results — 140
 - 6.2.3 An example — 155
- 6.3 Notes and remarks — 156

7 Nonlinear fractional differential equations with ψ -Hilfer fractional derivative — 157

- 7.1 Introduction and motivations — 157
- 7.2 Periodic solutions for nonlinear fractional integro-differential equations in Banach spaces — 159
 - 7.2.1 Existence results — 159
 - 7.2.2 Applications — 169
- 7.3 The periodic solutions for nonlinear Volterra–Fredholm integro-differential equations — 171
 - 7.3.1 Existence results — 171
 - 7.3.2 An example — 184
- 7.4 Nonlinear fractional differential equations depending on the Ψ -Riemann–Liouville integral — 186
 - 7.4.1 Main results — 186
 - 7.4.2 An example — 199
- 7.5 Notes and remarks — 200

8	ψ-Hilfer fractional pantograph-type differential equations — 201
8.1	Introduction and motivations — 201
8.2	Periodic solutions for some nonlinear fractional pantograph problems with Ψ -Hilfer derivative — 202
8.2.1	Main results — 202
8.2.2	An example — 215
8.3	Fractional pantograph-type differential equations depending on the ψ -Riemann–Liouville integral — 216
8.3.1	Existence results — 216
8.3.2	An example — 231
8.4	Notes and remarks — 232
9	Nonlinear ψ-Hilfer fractional coupled systems — 233
9.1	Introduction and motivations — 233
9.2	Periodic solutions for some nonlinear ψ -Hilfer fractional coupled systems — 233
9.2.1	Existence results — 233
9.2.2	Examples — 256
9.3	Notes and remarks — 259
10	k-Generalized ψ-Hilfer fractional differential equations with periodic conditions — 260
10.1	Introduction and motivations — 260
10.2	k -Generalized ψ -Hilfer fractional differential equations with periodic conditions — 261
10.2.1	Existence results — 261
10.2.2	An example — 274
10.3	Notes and remarks — 275
11	Nonlinear implicit k-generalized ψ-Hilfer fractional coupled systems — 276
11.1	Introduction and motivations — 276
11.2	k -Generalized ψ -Hilfer fractional differential coupled systems with periodic conditions — 277
11.2.1	Existence results — 278
11.2.2	Examples — 304
11.3	Notes and remarks — 309

Bibliography — 311

Index — 323
