

Contents

<i>Interactive Theorem Proving and Computer Algebra</i>	1
J. Ueberberg, Universität Giessen, Germany	
<i>A Practical Algorithm for Geometric Theorem Proving</i>	10
A. Rege, J. Canny, University of California, Berkeley, USA	
<i>Combining Theorem Proving and Symbolic Mathematical Computing</i>	18
K. Homann, J. Calmet, Universität Karlsruhe, Germany	
<i>Tools for Solving Problems in the Scope of Algebraic Programming</i>	30
Y.V. Kapitonova, A.A. Letichevsky, V.A. Volkov, Glushkov Institute of Cybernetics, Ukraine	
M.S. L'vov, Kherson State Pedagogical Institute, Ukraine	
<i>Planning a Proof of the Intermediate Value Theorem</i>	48
M. Chippendale, Rutherford Appleton Laboratory, UK	
<i>A General Technique for Automatically Optimizing Programs Through the Use of Proof Plans</i>	64
P. Madden, MPI Saarbrücken, Germany	
I. Green, University of Edinburgh, UK	
<i>Datalog and TwoGroups and C++</i>	80
G. Butler, Concordia University, Canada	
<i>Linear Logic and Real Closed Fields: a Way to Handle Situations Dynamically</i>	93
P. Jumpertz, Université de Paris VII, France	
<i>A Proof Environment for Arithmetic with the Omega Rule</i>	115
S. Baker, Cambridge University, UK	
A. Smaill, Edinburgh University, UK	
<i>Using Commutativity Properties for Controlling Coercions</i>	131
S. A. Missura, ETH Zürich, Switzerland	
A. Weber, Universität Tübingen, Germany	
<i>Theories = Signatures + Propositions Used as Types</i>	144
S. A. Missura, ETH Zürich, Switzerland	
<i>The Ideal Structure of Gröbner Base Computations</i>	156
S. Collart, D. Mall, Federal Institute of Technology, Switzerland	

<i>Modeling Cooperating Agents Scenarios by Deductive Planning Methods and Logical Fiberings</i>	167
J. Pfalzgraf, K. Stokkermans, RISC-Linz, Austria	
U. C. Sigmund, TH Darmstadt, Germany	
<i>Propagation of Mathematical Constraints in Subdefinite Models</i>	191
V. Telerman, Russian Academy of Science, Russia	
<i>Combining Computer Algebra and Rule Based Reasoning</i>	209
R. Bündgen, Universität Tübingen, Germany	
<i>Algebraic Specification of Empirical Inductive Learning Methods based on Rough Sets and Matroid Theory</i>	224
S. Tsumoto, H. Tanaka, Tokyo Medical and Dental University, Japan	
<i>Subsymbolic Processing using Adaptive Algorithms</i>	244
D. J. Nettleton, R. Garigiano, University of Durham, UK	
<i>An Interpretation of the Propositional Boolean Algebra as a k-algebra. Effective Calculus</i>	255
L. M. Laita, L. de Ledesma, Universidad Politécnica de Madrid, Spain	
E. Roanes-Lozano, E. Roanes-Macías, Universidad Complutense de Madrid, Spain	
<i>Subdefinite Computations and Symbolic Transformations in the UniCalc Solver.....</i>	264
A. Semenov, A. Babichev, A. Leshchenko, Research Institute of Artificial Intelligence, Russia
