

Table of Contents

1. Introduction	1
<i>I. Bey</i>	
1.1 The Need for Standardized Interfaces for Electronic Data Transfer	1
1.2 Short Summary of Interface Development	2
1.3 ESPRIT Project Nr. 2614/5109 NIRO.....	4
2. State of the Art upon Project Start	6
<i>I. Bey</i>	
2.1 CAD Interfaces	8
2.2 Interfaces in Robotics	9
2.2.1 Robot Programming	11
2.3 Standardization	12
3. Aims of the NIRO Project	15
<i>I. Bey</i>	
4. Results Related to the STEP Standard	17
<i>Chapter Editor: E.G. Schlechtendahl</i>	
4.1 The NIRO Contributions to STEP	18
<i>E.G. Schlechtendahl</i>	
4.1.1 The STEP Kinematics Model.....	18
4.1.2 Physical File Structure	20
4.1.3 STEP Data Access Interface	21
4.1.4 Specification.....	21
4.2 The NIRO Specification for STEP Kinematics Models	22
<i>U. Kroszynski</i>	
5. Development of STEP Processors.....	25
<i>Chapter Editor: T. Sørensen</i>	
5.1 From CAD Systems to STEP	27
5.1.1 GRASP.....	27
<i>P. Sorenti</i>	
5.1.2 BRAVO3	31
<i>A. Ludwig and J. Reim</i>	
5.1.3 CADDS 5	37
<i>C. D'Elia</i>	

5.1.4 CATIA (Kinematics)	41
<i>T. Sørensen and U. Kroszynski</i>	
5.1.5 KISMET	45
<i>A. Ludwig</i>	
5.2 From STEP to Robot Programming and Simulation	56
5.2.1 GRASP	56
<i>P. Sorenti</i>	
5.2.2 CATIA Robotics	59
<i>R. Lutz</i>	
5.2.3 KISMET	64
<i>H.-P. Lorenz and S. Haas</i>	
5.2.4 Scanner/Parser for CATIA and KISMET	69
<i>H.-P. Lorenz and S. Haas</i>	
5.3 Test of Processors and Consistency of the Specification	74
<i>T. Sørensen and U. Kroszynski</i>	
5.3.1 Test Suites, Library of Test Models	74
5.3.2 Evaluation of Test Results. Experiences	80
6. Results Related to IRL and ICR	85
<i>Chapter Editor: W. Jakob</i>	
6.1 Industrial Robot Language (IRL)	85
<i>U. Schmiedecke</i>	
6.1.1 Present Status	85
6.1.2 The Language Features	86
6.1.3 General Purpose Language Features	86
6.1.4 Robot Specific Features	90
6.1.5 Recommendations for Further Enhancements	96
6.1.6 NIRO Contributions to IRL	96
6.1.7 Contextfree Grammar of IRL	97
6.2 Intermediate Code for Robots (ICR)	106
<i>T. Clausen</i>	
6.2.1 Introduction to ICR	107
6.2.2 Technical Aspects of ICR	113
6.2.3 NIRO Contributions to ICR	120
6.2.4 Experiences with ICR	121
6.2.5 Present Status	123
6.2.6 Recommendations for Further Enhancements	123

7.	Development of Processors for IRL and ICR	126
	<i>Chapter Editor: D. Ball</i>	
7.1	Processors for IRL	126
7.1.1	IRL Preprocessor for GRASP	126
	<i>P. Sorenti</i>	
7.1.2	IRL to ICR Compiler	131
	<i>U. Schmiedecke</i>	
7.2	Preprocessors for ICR.....	139
7.2.1	ICR Preprocessor for GRASP	139
	<i>P. Sorenti</i>	
7.3	ICR Interpreters	144
7.3.1	Overview	144
	<i>W. Jakob and J. Reim</i>	
7.3.2	Robot Independent Part	147
	<i>J. Reim</i>	
7.3.3	Robot Dependent Part for the KISMET Simulation System.....	148
	<i>J. Reim</i>	
7.3.4	Robot Dependent Part for the ABB IRB 2000 Robot	149
	<i>T. Clausen</i>	
7.3.5	The Robot Dependent Part for the ABB IRB 60 Robot	154
	<i>A. Bautista</i>	
7.3.6	Robot Dependent Part for Reis ROBOTstar-IV	157
	<i>H. Bruhm</i>	
7.4	ICR Transformation to Robot Vendor Code.....	160
7.4.1	Overview	160
	<i>C. Busk</i>	
7.4.2	ICR Transformation to the Hirobo Robot	162
	<i>C. Busk</i>	
7.4.3	ICR Transformation to PDL2 (the Comau Robot)	164
	<i>M. Odifreddi and C. D'Elia</i>	
7.4.4	ICR Transformation to Reis Robot Language.....	174
	<i>H. Bruhm</i>	
7.5	Test of Processors.....	177
	<i>A. Bautista</i>
