Basic Concepts

1 Physical and Technical Fundamentals of Ultrasound and Doppler Ultrasound

H. Frey

History	3	Geometrical Distortion	15
Oscillation, Sound Wave	3	Continuous Wave Doppler Systems	17
The Generation of Ultrasound	4	Pulsed Wave Doppler systems	17
Physical Effects	5	Alias Phenomenon in Pulsed Doppler	18
Reflection and Refraction	5	Baseline Shift	18
Scattering	6	Wall Filter	19
Interference	6	Color-Coded Doppler Sonography	19
Diffraction	6	Amplitude-Coded Flow Display	19
Absorption	6	Safety Aspects	20
Generating the Image	7	Thermal Effects	20
Pulse-Echo Procedure	7	Mechanical Effects	20
Time Gain Compensation	7	Important Definitions	21
A-Mode	7	Acoustic Output	21
B-Mode	8	Acoustic Power	21
M-Mode	8	Intensity	21
The Sound Field	9	Intensity Special Peak Time Average	21
Resolution	9	Risks of Individual Ultrasound Procedures	21
Focusing	9	B-Mode	21
Scanning Procedures	10	M-Mode	21
Principle of Operation	10	CW Doppler	21
Linear Array Scanner	11	PW Doppler	21
Curved or Convex Array Scanner	11	Color-Coded Doppler Sonography	21
Sector Scanner	11	Summary	21
Phased Array Scanner	11	Important Instrument Settings	22
Mechanical Sector Scanners	12	Selecting the Most Suitable Transducer	22
Rotary Principle	12	B-Mode Settings	22
Wobbler Principle	13	Depth of Penetration	22
Annular Phased Array Transducer	13	Gain	22
Ultrasound Artifacts	13	Focusing	22
Distal Acoustic Shadowing	13	Setting the Doppler Parameters	22
Dorsal Sound Amplification	13	Sample Volume	22
Disadvantages of Mechanical Scanners	13	PRF and Baseline Shift	22
Margin Shadow	14	Scaling the Time Axis	22
Side Lobe	14	Wall Filter	22
Slice Thickness Artifact	14	Orientation of the Tracings of Spectra	22
Repetition Artifact	14	Color-Coded Doppler	23
Doppler Sonography	15	Size of the Color Window	23
Fundamentals of Doppler Sonography	15	PRF	23
		Color Gain	23

2 Indices for the Evaluation of Doppler Sonograms

K. Vetter, M. Gonser, H.-J. Voigt

Introduction	25	Temporal Indices	29
Quantitative Measurements	25	Relative Flow Index	30
Qualitative Measurements	25	Optical Classification	32
Angle Problems	25	Clinical Procedure	33
Wall Filter	26	Reference Curves	34
Indices Used to Evaluate Two-Dimensional Doppler Sonograms	26	Index Quotients	37
Indices of Velocity	26	Summary	39
Indices of Acceleration	28	Suggestions for Obstetric Practice	39
Path Length Index	29		

3 Vascular Supply of the Uteroplacentofetal Unit and Techniques for the Examination of Individual Vessels

C. Sohn

Vascular Supply of the Uteroplacentofetal Unit	41	Examining the Uterine Arteries in the Third Trimester	47
Uteroplacental Blood Supply	41	Displaying the Peripheral Fetal Vessels	47
Fetoplacental Blood Supply	42	Examining the Umbilical Artery	47
Fetal Blood Supply	42	Examining the Aorta in the Second and Third Trimesters	48
Methods of Examining Specific Vessels	44	Examining the Central Fetal Vessels	50
Displaying the Maternal Vessels	44	Examining the MCA	50
Examining the Uterine Arteries in the Second Trimester	44	Examining the Carotid Artery	51

4 Blood Flow Analysis During Pregnancy

K. Vetter, M. Gonser

Uteroplacental Vessels	53	Arteries Supplying the Brain	60
Reference Values	54	Reference Values	61
Physiological Flow Changes	54	Physiological Flow Changes	61
Fetoplacental Vessels	55	Renal Arteries	61
Umbilical Vessels	55	Evaluation Criteria	62
Reference Values	55	Reference Values	62
Abnormal Flow Changes	55	Ductus Arteriosus	62
Medications	55	Inferior Vena Cava	62
Physiological Flow Changes	56	Evaluation Criteria	62
Pathological Flow Changes	56	Reference Values	62
Morphological Changes	56	Physiological Flow Changes	62
Umbilical Vein	58	Pathological Flow Changes	62
Reference Values	58	Ductus Venosus Arantii	62
Physiological and Pathological Flow Alterations	58	Hepatic Veins	63
Fetal Vessels	59	Effect of Therapeutic Measures	63
Aorta	59	Prostaglandins	63
Evaluation Criteria	59	Antihypertensives	63
Reference Values	59	β-blockers	64
Physiological Flow Changes	60	Calcium Antagonists	64
		Epidural Anesthesia	64

5 Documentation

C. Sohn

Sample Documentation Records	66
------------------------------------	----

6 Common Errors in the Doppler Ultrasound Display of Uterine Blood Flow and Fetal Vessels

F. Geka, C. Sohn

Correct Display of Vessels with Normal Instrument Settings	69	Complete Series of Doppler Ultrasound Examinations, Including Displays of Maternal Uterine and Fetal Peripheral and Central Vessels	77
Role of the Angle in the Doppler Examination .	69	Basic Concepts: References	80
Possible Sources of Error in Doppler Ultrasound Examinations of Maternal and Fetal Vessels	71	Physical and Technical Fundamentals of Ultrasound and Doppler Ultrasound	80
Displaying the Uterine Artery	71	Indices for the Evaluation of Doppler Sonograms	80
Displaying the Umbilical Artery	73	Blood Flow Analysis During Pregnancy	80
Displaying the Fetal Aorta	74		
Displaying the Middle Cerebral Artery	76		

Obstetric Applications of Doppler Ultrasound

7 The Role of Doppler Ultrasound in the Diagnosis of Ectopic Pregnancy

H.-J. Voigt

The Significance of Transvaginal Sonography and Serum hCG	85	Transvaginal Color Doppler Ultrasound	86
Characteristic Sonographic Findings in Ectopic Pregnancy	85	Diagnostic Validity	86
Differential Diagnosis	85	Effectiveness of the Procedure	86
		Errors	87
		Critical Evaluation	89
		Summary	89

8 Indications for Obstetric Ultrasound

C. Sohn

IUGR and Biological Measurement	92	Suspected IUGR	94
Basic Principles	92	PIH/Preeclampsia/Eclampsia	96
Some Specific Measurements	92	Status Post Dysmature Delivery/Intrauterine Death	96
Skull	92	Status Post Preeclampsia/Eclampsia	97
Abdomen	92	Abnormalities in the Recorded Fetal Heart Rate	97
Extremities	93		
Cerebellum	93		
Procedure when Biological Measurements are Abnormal	93		
Growth Restriction	94		

Reasonable Suspicion of Fetal Anomalies or Fetal Disease	97	Summary	
Multiple Pregnancy with Discordant Growth ..	97	Indications for Doppler Ultrasound in the First, Second, and Third Trimesters	98
Suspicion of Cardiac Anomaly or Heart Disease	98	First Trimester	98
Other Indications	98	Second Trimester	98
		Third Trimester	98

9 Doppler Sonography in Obstetrics—Screening At-Risk Populations

H.-J. Voigt

Validity of a Test	99	Screening for Suspected Fetoplacental Perfusion Disorders and/or IUGR	102
Validation of Indices	100	Summary	102
Screening Population	101		
Screening in Cases of Suspected Uteroplacental Perfusion Disorders and/or Pregnancy-Induced Hypertension	101		

10 Doppler Ultrasound Diagnosis in Preeclampsia, Eclampsia, and HELLP Syndrome

C. Sohn

Pathological Changes in Preeclampsia	103	Evidence for or Exclusion of Fetal Risk—Evaluating the Fetal or Fetoplacental Vessels	106
Evaluating the Risk of Preeclampsia in the First and Second Trimesters—Examining the Uteroplacental Arteries	105	Doppler Sonographic Findings	106
Doppler Ultrasound Findings	105	Doppler Sonographic Findings	106
		Redistribution of Blood (Brain Sparing)	107
Confirming a Diagnosis of Preeclampsia in the Second Half of Pregnancy—Demonstrating Characteristic Doppler Sonographic Changes of Preeclampsia in the Uteroplacental Vessels .	106	Summary	109

11 Doppler Ultrasound in the Diagnosis of Fetal Anomalies

K. Vetter, Ö. Kilavuz, H.-J. Voigt

Anomalies in the Region of the Head and Neck	111	Placenta	119
Anomalies of the Lung and Diaphragm	113	Hydrops Fetalis	119
Fetal Cardiac Malformations	114	Anhydramnios	119
Malformations of the Gastrointestinal Tract and the Abdominal Wall	114	Malformations of the Umbilical Cord	119
Anomalies of the Urogenital System	116	Doppler Ultrasound Diagnosis of Malformations in Early Pregnancy	121
Coccygeal Teratomata	118		

12 Multiple Pregnancy and Doppler Ultrasound

C. Sohn, A. Scharf

Studies Using Doppler Ultrasound for Multiple Pregnancies	124	Velamentous Insertion and Vasa Previa	126
Theoretical Considerations Related to the Above Studies	125	Monochorionic Multiple Fetuses with Circulatory Communication Disorders	127
Special Considerations for the Use of Doppler Ultrasound in Twin Pregnancies	126	Twin-to-Twin (Feto-Fetal) Transfusion Syndrome (TTTS, FETS)	127
Acardius Acranius, TRAP	126	Hydramnios-Oligohydramnios	127
Crossed Cord Around the Neck	126	Summary	128

13 Possible Applications of Doppler Ultrasound in Fetal Anemia

K. Vetter, Ö. Kilavuz

Noninvasive Procedures for Suspected Fetal Anemia	129	Ultrasonic Imaging	129
		Doppler Ultrasound	130

14 Umbilical Cord Complications and Doppler Ultrasound

K. Vetter, Ö. Kilavuz

Doppler Ultrasound Findings when Umbilical Cord Complications Affect Hemodynamics	133	Diagnostic Doppler Ultrasound in Preeclampsia, Eclampsia, and HELLP Syndrome	135
Obstetric Applications of Doppler Ultrasound: References	135	Multiple Pregnancy and Doppler Ultrasound ..	135

Advanced Topics in Obstetrics and Gynecological Doppler Ultrasound

15 Doppler Ultrasound and the Cardiotocogram

H.-J. Voigt

Comparing Tests	139	Information Lead Time Using Doppler Ultrasound	140
Comparing Tests to Predict Neonatal Asphyxia ..	139	Clinical Significance of Doppler Ultrasound ...	141
Comparing Tests to Predict Neonatal Acidosis ...	140		

16 Doppler Ultrasound Findings Near Term

K. Vetter

Physiological Findings in the Late Stages of Pregnancy	143	Common Carotid Artery	144
Aorta: Quantitative Analysis	143	Middle Cerebral Artery	144
Aorta: Qualitative Analysis	144	Renal Arteries	145
Cerebral Arteries	144		

Changes at Term and Postterm	145	Clinical Conclusions	147
Femoral Arteries	145	Doppler Ultrasound during Labor?	148
The "Term Effect"	146	Summary	149
The Circulatory Balance	146		

17 Diagnostic and Clinical Significance of Doppler Ultrasound in Obstetrics

M. Gonser, K. Vetter

Studies of Diagnostic Significance	151	Umbilical Arteries	154
Uteroplacental Arteries	152	Analysis of Individual Clinical Doppler	
Umbilical Arteries and Other Fetal Vessels	152	Studies	154
Umbilical Arteries and Fetal Aorta	152	Cumulative Metaanalysis	155
The Umbilical Vein in Arterial Diastolic Block		Conclusions	156
or Reverse Flow	152	Diastolic Reverse Flow	156
Cerebral Arteries and Redistribution of		Multiple Pregnancy	156
the Circulation	153	Summary	158
Studies of Clinical Significance	153		
Uteroplacental Arteries	154		

18 Doppler Sonography of the Fetal Venous Circulation

C. Hofstaetter

Anatomy	159	Ultrasound Display and Doppler Sonography	
Physiology	160	of the Venous System	161
The Left Path from the Ductus Venosus		Results of the Doppler Studies	162
to the Foramen Ovale	160	Summary	165
The Right Path from the Inferior Vena Cava			
to the Right Atrium	160		

19 Seven Cases Illustrating the Use of Doppler Ultrasound in Obstetrics

K. Vetter, H.-J. Voigt

1—Fetal Growth Restriction	167	5—Patient with Antiphospholipid-Antibody	
2—Extreme Fetal Growth Restriction Due to		Syndrome	172
Endarteritis Obliterans	168	6—Marked Fetal Growth Restriction	177
3—Exclusion of Potter Syndrome	169	7—Twin Pregnancy with Twin-to-Twin	
4—Closely Coordinated Preventive Care for		Transfusion Syndrome	178
High-Risk Patients	171		

20 Doppler Ultrasound in Gynecology

P.M. Baier

Tumor Angiogenesis	184	Ovarian Diagnosis	187
Essential Considerations for Clinical Practice ..	185	Conventional Ultrasound Examination of the	
Examination Procedure and Instrumentation		Ovary: Procedure and Results	187
for Ultrasound Diagnosis of the Pelvis	185	Normal Findings in the Doppler Ultrasound Ex-	
Evaluation	186	amination of the Ovaries	188

Significance of Color-Coded Doppler Ultra- sound	188	Endometrial Diagnosis	191
Doppler Ultrasound and Myomas	190	Essential Considerations for Clinical Practice ..	191
Essential Considerations for Clinical Practice ..	190	Essential Considerations for Clinical Practice ..	195

21 Diagnosis of the Uterine Tube by Transvaginal Sonography

F. Geka

Application of Ultrasound in Diagnosis of the Uterine Tube	197	Comparison to Other Procedures	198
Display of the Tube by Contrast Sonography	197	Supplementation by Doppler	198

22 Diagnostic Sonography of Blood Flow in Breast Tumors

A. Baudendistel

Biological Background	201	Doppler Ultrasound and the Cardiotocogram .	207
Instrumentation	201	Doppler Ultrasound Findings Near Term	207
Continuous Wave Doppler	201	Diagnostic and Clinical Significance of	
Pulsed Wave Doppler	202	Doppler Ultrasound in Obstetrics	208
Color-Coded PW Doppler	202	Doppler Ultrasound of the Fetal	
Angio Color, Angio Mode, Power Doppler	203	Venous Circulation	210
Introduction of Ultrasound Contrast Media	204	Doppler Ultrasound in Gynecology	210
Color-Coded Doppler Ultrasound in the Differential Diagnosis of Breast Tumors	205	Diagnosis of the Uterine Tube by Transvaginal Ultrasound	211
Advanced Topics in Obstetrics and Gyneco- logical Doppler Ultrasound: References	207	Diagnostic Ultrasound of Blood Flow in Breast Tumors	212
