## I. Plastic Surgery

|                                                                                                                                                          |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Use of Fibrin Glue in Reconstructive Plastic Surgery<br>T. FABRIZIO, M. NAVA, N. ARIOLI, L. CALABRESE, O. PARISE,<br>R. MOLINARI, and A. SAVANI. . . . . | 3  |
| Fibrin Sealant in Plastic Surgery of the Head<br>M. PASCONE and D. DIOGUARDI. . . . .                                                                    | 11 |
| The Use of Fibrin Glue in the Operative Therapy<br>of Dupuytren's Disease<br>K. D. WERBER and C. HIRGSTETTER . . . . .                                   | 16 |
| Osteocartilagenous Reconstruction<br>J. L. EBERLIN, W. HU, J. M. PÈRES, S. RAMIREZ, X. NOËL,<br>B. BASSE-CATALINAT, J. RIVEL, and J. BAUDET . . . . .    | 20 |
| Fibrin Sealing of Facial Skin Plasties in Older Patients<br>H. A. GITT . . . . .                                                                         | 25 |
| Hemangioma Treatment with Fibrin Sealant<br>A. KRÜGER . . . . .                                                                                          | 31 |
| Magnesium Seeds and Fibrin Sealant for the Therapy of Hemangiomas<br>O. STAINDL . . . . .                                                                | 34 |

## II. Nerve Repair

|                                                                                                                                                      |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Tissucol in Peripheral Nerve Repair:<br>An Experimental Study in the Rat<br>W. BOECKX, F. STOCKMANS, and P. GUELINCKX. . . . .                       | 43 |
| Experimental Nerve Anastomoses with Fibrin Adhesive<br>in a Rabbit Model<br>S. PALAZZI, J. VILA-TORRES, J. C. LORENZO, R. BORI, and E. RIJ . . . . . | 51 |

|                                                                                                                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Outcome of Axonal Regeneration Following Rat Sciatic Nerve<br>Transection Treated with End-to-End Microsuture or Fibrin Seal<br>B. POVLSEN, P. DANIELSSON, and G. NYLANDER . . . . .                                                 | 58  |
| Fibrin Glueing of Peripheral Nerves<br>J. SMAHEL and V. E. MEYER . . . . .                                                                                                                                                           | 67  |
| A Combination of Fibrin Sealant and Nerve Growth Factor<br>Accelerates the Regeneration of Leading Sensory Fibers<br>in Experimental Peripheral Nerve Repair<br>A. WORSEG, L. ZENG, G. LEICHTFRIED, H. REDL, and G. SCHLAG . . . . . | 73  |
| Experimental Peripheral Nerve Repair with Nerve Growth Factor<br>and Fibrin Sealant Matrix: Functional and Morphological Evaluation<br>L. ZENG, W. ÖHLINGER, H. REDL, and G. SCHLAG . . . . .                                        | 79  |
| Fibrin Sealant Conduits in Peripheral Nerve Repair<br>N. NICOLI ALDINI, M. FINI, G. GIAVARESI, M. ROCCA, and R. GIARDINO. . . . .                                                                                                    | 89  |
| Ten Years' Experience Using Tissucol in the Repair<br>of the Brachial Plexus and Neighboring Nerves<br>A. O. NARAKAS† and C. BONNARD. . . . .                                                                                        | 95  |
| Fibrin Glue Anastomosis of the Facial Nerve<br>O. STERKERS, N. JULIEN, D. BOUCCARA, and J. M. STERKERS . . . . .                                                                                                                     | 105 |

### III. Burns

|                                                                                                                                                  |            |
|--------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| Use of Human Fibrin Glue in Burn Wound Surgery<br>G. ARTURSON, A. HEDLUND, and S. VEDUNG . . . . .                                               | 113        |
| Tissucol: A 7-Year Experience in Burn Patients<br>CH. DHENNIN, L. VESIN, J.-F. FEAUVEAUX, J.-P. BERDALLE,<br>and Y. YASSINE. . . . .             | 117        |
| The Use of Fibrin Sealant in Burn Treatment<br>D. L. DYESS, C. BLACHE, T. WRIGHT, J. R. FLETCHER,<br>and A. LUTERMAN . . . . .                   | 120        |
| Skin Grafting with Fibrin Glue in Burns<br>J. P. ADANT, B. DETROZ, M. D'SILVA, L. NATOWITZ, M. LEDOUX,<br>B. PESTIAUX, and P. LECLERCQ . . . . . | 128        |
| Fibrin Sealant in Skin Grafting: Indications, Methods, and Pitfalls<br>A. GRABOSCH . . . . .                                                     | 139        |
| Cultured Autologous Keratinocytes Suspended in Fibrin Glue<br>to Cover Burn Wounds<br>G. B. STARK, H. W. KAISER, J. KOPP, and R. HORCH . . . . . | 143        |
| <b>Subject Index . . . . .</b>                                                                                                                   | <b>149</b> |
