Preface — V

Preface to the second edition — VII

1	Product design — 1
1.1	Basics — 1
1.2	Examples of advanced high-value-added specialty products — 4
1.3	General aspects of product design — 10
	References — 20
2	Fundamentals and unit operation — 22
2.1	Crystallization and precipitation — 22
2.1.1	Growth and nucleation — 22
2.1.2	Crystallization from solutions — 30
2.1.3	Crystallization from melts — 33
2.1.4	Precipitation — 34
2.2	Size changing and particles shaping — 35
2.2.1	Size reduction — 35
2.2.2	Size enlargement — 38
2.2.3	Pressure agglomeration, including pilling and tableting — 39
2.3	Drying — 44
2.3.1	Drying for agglomeration — 44
2.3.2	Drying of solid materials not related to agglomeration — 48
2.4	Colloids — 51
2.4.1	General properties — 51
2.4.2	Colloidal stability — 53
2.5	Emulsions — 63
2.5.1	Basics — 63
2.5.2	Surfactants — 68
2.5.3	Selection of emulsifier — 73
2.5.4	Micelles — 78
2.5.5	Application of emulsifiers — 81
2.5.6	Emulsion technology — 85
2.5.7	Microemulsions — 88
2.6	Basics of rheology — 89
2.7	Unit operations for specific chemical products — 99
2.7.1	Extrusion — 99
2.7.2	Molding — 109
2.7.3	Calendering — 115
2.7.4	Fiber spinning — 115

- 2.7.5 Unit operations in ceramics processing — **117**
- 2.8 Filtration — **120**
- References — **123**

3 Performance chemicals — 126

- 3.1 Plastics and polymer composites — **126**
 - 3.1.1 Thermoplastics and polymer blends — **126**
 - 3.1.2 Plasticizers — **140**
 - 3.1.3 Foamed plastics — **145**
 - 3.1.4 Adhesives — **149**
- 3.2 Paints, coatings and dyes — **160**
 - 3.2.1 Properties and composition of paints and coatings — **160**
 - 3.2.2 Paint systems — **178**
 - 3.2.3 Dyes — **187**
- 3.3 Laundry detergents — **192**
 - 3.3.1 General — **192**
 - 3.3.2 Composition of detergents — **194**
 - 3.3.3 Production of powder detergents — **200**
 - 3.3.4 Liquid laundry detergents — **204**
- 3.4 Lubricants — **206**
 - 3.4.1 Basics — **206**
 - 3.4.2 Additives — **208**
- 3.5 Ceramics — **213**
 - 3.5.1 General — **213**
 - 3.5.2 Clay products and advanced ceramics — **214**
 - 3.5.3 Glasses — **220**
 - 3.5.4 Cement and concrete — **224**
- 3.6 Catalysts — **231**
 - 3.6.1 Basics — **231**
 - 3.6.2 Catalyst preparation technology — **235**
- 3.7 Pesticides — **244**
 - 3.7.1 Overview — **244**
 - 3.7.2 Applications and formulations — **254**
 - References — **260**

4 Personal chemicals — 264

- 4.1 Absorbent hygiene products — **264**
 - 4.1.1 General — **264**
 - 4.1.2 Diapers — **264**
- 4.2 Pharmaceutical products — **271**
 - 4.2.1 Administration routes — **271**
 - 4.2.2 Advanced systems for controlled drug delivery — **277**

4.2.3	Manufacture of pharmaceutical forms: tablets —	284
4.2.4	Manufacture of pharmaceutical forms: 3D printing —	297
4.2.5	Manufacture of pharmaceutical forms: amorphous powders for inhalation drug delivery —	302
4.3	Personal care products —	308
4.3.1	General —	308
4.3.2	Skin care products —	311
4.3.3	Decorative products/makeup —	323
4.3.4	Hair care, styling and dyeing —	331
4.3.5	Hand sanitizers —	341
4.3.6	Antiperspirants and deodorants —	342
4.3.7	Production technology of skin and hair care products —	344
	References —	352

Index —	357
