

CONTENTS

Preface *vii*

- 01** Bone Biology and Physiology for Dental Implantology *1*
- 02** Review of Bone Grafting Materials *25*
- 03** Barrier Membranes for Bone Regeneration *53*
- 04** Harvesting Bone from the Ramus *73*
- 05** Harvesting Bone from the Mandibular Symphysis *87*
- 06** Harvesting Bone from the Tibia *111*
- 07** Bone Morphogenetic Proteins for Bone Regeneration *123*
- 08** Alveolar Ridge Preservation After Tooth Extraction *129*
- 09** Maxillary Sinus Grafting for Placement of Dental Implants *151*

CONTENTS

10 Augmentation and Grafting of the Maxillary Anterior Alveolar Ridge 181

11 Subnasal Elevation and Bone Augmentation 205

12 Grafting of the Nasopalatine Canal 213

13 Ridge-Spreading and Ridge-Splitting Techniques for Dental Implants 221

14 Membrane-Guided Bone Regeneration With and Without Cortical Bone Pins 239

15 Alveolar Ridge Grafting with Autogenous Bone Plates 257

16 Allogeneic Bone Plates for Bone Grafting 283

17 Titanium Mesh for Bone Regeneration 297

Index 313
