

Table of Contents

Part 1 Formal Aspects of Concurrent Systems

A Formal Basis for the Specification of Concurrent Systems

L. Lamport 3

On the Construction of Distributed Programs

G. Roucairol 47

Derivation of Distributed Algorithms

J-P Verjus 67

Part 2 Design Issues for Distributed Operating Systems

Design of Highly Decentralised Operating Systems

F. Baiardi and M. Vanneschi 113

Communication Models for Distributed Computation

D.K. Gifford 147

New Concepts for Distributed System Structuring

J-P Banatre 175

Part 3 Hardware Support for Distributed Computing Systems

Distributed Computing System Architectures: Hardware

M. Bozyigit 201

Hardware Support for the Distributed Operating System of the Heidelberg Polyp Processor

R. Manner 219

Part 4 Case Studies

The Apollo DOMAIN Distributed File System <i>P.H. Levine</i>	241
The CHORUS Distributed Operating System: Some Design Issues <i>M. Rozier, J. Legatheaux Martins</i>	261
The Conic Support Environment for Distributed Systems <i>J. Magee, J. Kramer, M. Sloman</i>	289
An Experience in Solving a Transaction Ordering Problem in a Distributed System <i>M. Banatre</i>	311
Distributed Transaction Processing and The Camelot System <i>A.Z. Spector</i>	331
Worm Programs <i>T. Kindberg, A.V. Sahiner, Y. Paker</i>	355
