

Table of contents

Subvolume b

3 Figures (J. DEMAISON and A. DUBRULLE)	1
4 Constants of radicals	24
4.1 Diatomic radicals (E. TIEMANN)	24
4.1.1 Preliminary remarks	24
4.1.2 The $^2\Sigma$ electronic state	24
4.1.2.1 Preliminary remarks	24
4.1.2.2 Data and references	26
4.1.3 The $^3\Sigma$ electronic state	58
4.1.3.1 Preliminary remarks	58
4.1.3.2 Data and references	60
4.1.5 The $^2\Pi$ electronic state	102
4.1.5.1 Preliminary remarks	102
4.1.5.2 Data and references	104
4.1.6 The $^3\Pi$ electronic state	155
4.1.6.1 Preliminary remarks	155
4.1.6.2 Data and references	156
4.1.7 The $^1\Delta$ electronic state	166
4.1.7.1 Preliminary remarks	166
4.1.7.2 Data and references	167
4.1.8 The electronic states $^4\Pi$, $^2\Delta$, and $^3\Delta$	170
4.2 Polyatomic free radicals (J. M. BROWN)	171
4.2.0 Introduction	171
4.2.1 Linear polyatomic radicals	171
4.2.1.1 Preliminary remarks	171
4.2.1.2 Data and references	173
4.2.2 Non-linear triatomic radicals	179
4.2.2.1 Preliminary remarks	179
4.2.2.2 Data and references	184
4.2.3 Non-linear larger radicals	286
4.2.3.1 Preliminary remarks	286
4.2.3.2 Data and references	287
5 Appendix: Additions to Chapter 2	291
2.2 Diatomic molecules (E. TIEMANN)	291
2.3 Linear molecules (J. DEMAISON)	296
2.4 Symmetric top molecules (J. DEMAISON)	299
2.5 Asymmetric top molecules (J. DEMAISON)	299
2.6 Dipole moments	301
2.6.1 Diatomic molecules (E. TIEMANN)	301
2.6.3 Asymmetric top molecules (J. DEMAISON)	302
2.7 Quadrupole coupling constants	302
2.7.1 Diatomic molecules (E. TIEMANN)	302
2.7.2 Linear and symmetric top molecules (J. DEMAISON)	305
2.7.3 Asymmetric top molecules (J. DEMAISON)	306

2.9 Magnetic constants	306
2.9.1 Diatomic molecules (E. TIEMANN)	306
2.9.2 Linear and symmetric top molecules (W. HÜTTNER)	308
2.9.3 Asymmetric top molecules (W. HÜTTNER)	311
6 Index of substances for Vol. II/4, II/6, and II/14	312

Survey of subvolume a

1 Introduction	1
1.1 General remarks	1
1.2 Review articles and tables	1
1.3 Arrangement of tables, substances, and parameters	1
1.4 Selection of data	2
1.5 Abbreviations used for experimental methods	3
1.6 Selected fundamental constants and conversion factors	3
1.7 References	4
2 Constants of diamagnetic molecules	5
2.2 Diatomic molecules (E. TIEMANN)	5
2.3 Linear molecules (J. DEMAISON)	37
2.4 Symmetric top molecules (J. DEMAISON)	63
2.5 Asymmetric top molecules (J. DEMAISON)	128
2.6 Dipole moments	584
2.6.1 Diatomic molecules (E. TIEMANN)	584
2.6.2 Linear and symmetric top molecules (J. DEMAISON)	590
2.6.3 Asymmetric top molecules (J. DEMAISON)	598
2.7 Quadrupole coupling constants	644
2.7.1 Diatomic molecules (E. TIEMANN)	644
2.7.2 Linear and symmetric top molecules (J. DEMAISON)	654
2.7.3 Asymmetric top molecules (J. DEMAISON)	669
2.8 Hindered rotation (J. DEMAISON, A. DUBRULLE)	717
2.9 Magnetic constants	745
2.9.1 Diatomic molecules (E. TIEMANN)	745
2.9.2 Linear and symmetric top molecules (W. HÜTTNER)	755
2.9.3 Asymmetric top molecules (W. HÜTTNER)	772
