FOREWORD	xi
EDITOR'S PREFACE	xii
INTRODUCTORY REMARKS	1
THE MOON	11
The Lunar Surface	11
Composition of Lunar Rocks	21
Lunar Craters and the Regolith	30
Lunar Glass	48
History and Age of the Moon	51
Organic Chemistry of Lunar Samples	63
Origin of Moon by Capture	109
Microbiology of Lunar Samples	120
MARS	131
Problems of Relevance to the Origin of Life	131
Martian Atmosphere From Ground-Based Observations	138
Martian Atmosphere From Mariner 6 and 7 Observations	152
Nitrogen in the Atmosphere of Mars	155
Lower Atmosphere, Haze, and Brightenings	164
The Martian Surface	174
Martian Craters, Weathering, and the Martian Atmosphere	204
Goals of Future Exploration	226
REFERENCES	247
PARTICIPANT INDEX	251
SUBJECT INDEX	253
