

Table of Contents

Character Animation I

Natural User Interface for Physics-Based Character Animation	1
<i>C. Karen Liu and Victor B. Zordan</i>	
Individualized Agent Interactions	15
<i>Ionut Damian, Birgit Endrass, Peter Huber, Nikolaus Bee, and Elisabeth André</i>	
A Real-Time System for Crowd Rendering: Parallel LOD and Texture-Preserving Approach on GPU	27
<i>Chao Peng, Seung In Park, Yong Cao, and Jie Tian</i>	

Motion Synthesis I

Feature-Based Locomotion with Inverse Branch Kinematics	39
<i>Mentar Mahmudi and Marcelo Kallmann</i>	
Planning Plausible Human Animation with Environment-Aware Motion Sampling	51
<i>Je-Ren Chen and Anthony Steed</i>	

Physically-Based Character Motion

Dynamic Balancing and Walking for Real-Time 3D Characters	63
<i>Ben Kenwright, Richard Davison, and Graham Morgan</i>	
Injury Assessment for Physics-Based Characters	74
<i>Thomas Geijtenbeek, Diana Vasilescu, and Arjan Egges</i>	
Reactive Virtual Creatures for Dexterous Physical Interactions	86
<i>Hironori Mitake, Shoichi Hasegawa, and Makoto Sato</i>	

Character Animation II

Building a Character Animation System	98
<i>Ari Shapiro</i>	
Energy-Based Pose Unfolding and Interpolation for 3D Articulated Characters	110
<i>He Wang and Taku Komura</i>	

Generating Avoidance Motion Using Motion Graph	120
<i>Masaki Oshita and Naoki Masaoka</i>	

Behavior Animation

Populations with Purpose	132
<i>Weizi Li and Jan M. Allbeck</i>	
Parameterizing Behavior Trees	144
<i>Alexander Shoulson, Francisco M. Garcia, Matthew Jones, Robert Mead, and Norman I. Badler</i>	

Animation Systems

Intelligent Camera Control Using Behavior Trees	156
<i>Daniel Markowitz, Joseph T. Kider Jr., Alexander Shoulson, and Norman I. Badler</i>	
A Decision Theoretic Approach to Motion Saliency in Computer Animations	168
<i>Sami Arpa, Abdullah Bulbul, and Tolga Capin</i>	
Many-Core Architecture Oriented Parallel Algorithm Design for Computer Animation	180
<i>Yong Cao</i>	

Simulation of Natural Phenomena

Twisting, Tearing and Flicking Effects in String Animations	192
<i>Witawat Rungjiratananon, Yoshihiro Kanamori, Napaporn Metaaphanon, Yosuke Bando, Bing-Yu Chen, and Tomoyuki Nishita</i>	
Adaptive Grid Refinement Using View-Dependent Octree for Grid-Based Smoke Simulation	204
<i>Rinchai Bunlutangtum and Pizzanu Kanongchaiyos</i>	
A Simple Method for Real-Time Metal Shell Simulation	216
<i>Zhi Dong, Shiqiu Liu, Yuntao Ou, and Yunxin Zheng</i>	

Motion Synthesis II

LocoTest: Deploying and Evaluating Physics-Based Locomotion on Multiple Simulation Platforms	227
<i>Stevie Giovanni and KangKang Yin</i>	

Parametric Control of Captured Mesh Sequences for Real-Time Animation	242
<i>Dan Casas, Margara Tejera, Jean-Yves Guillemaut, and Adrian Hilton</i>	

Real-Time Interactive Character Animation by Parallelization of Genetic Algorithms	254
<i>Min Zou</i>	

Crowd Simulation

Improved Benchmarking for Steering Algorithms	266
<i>Mubbasir Kapadia, Matthew Wang, Glenn Reinman, and Petros Faloutsos</i>	
When a Couple Goes Together: Walk along Steering	278
<i>Markéta Popelová, Michal Bída, Cyril Brom, Jakub Gemrot, and Jakub Tomek</i>	

Path Planning and Navigation I

Parallel Ripple Search – Scalable and Efficient Pathfinding for Multi-core Architectures	290
<i>Sandy Brand and Rafael Bidarra</i>	
Hybrid Path Planning for Massive Crowd Simulation on the GPU	304
<i>Aljosha Demeulemeester, Charles-Frederik Hollemeersch, Pieter Mees, Bart Pieters, Peter Lambert, and Rik Van de Walle</i>	
Space-Time Planning in Dynamic Environments with Unknown Evolution	316
<i>Thomas Lopez, Fabrice Lamarche, and Tsai-Yen Li</i>	

Path Planning and Navigation II

Automatic Generation of Suboptimal NavMeshes	328
<i>Ramon Oliva and Nuria Pelechano</i>	
Roadmap-Based Level Clearing of Buildings	340
<i>Samuel Rodriguez and Nancy M. Amato</i>	
From Geometry to Spatial Reasoning: Automatic Structuring of 3D Virtual Environments	353
<i>Carl-Johan Jorgensen and Fabrice Lamarche</i>	

Posters

Reconstructing Motion Capture Data for Human Crowd Study	365
<i>Samuel Lemerrier, Mathieu Moreau, Mehdi Moussaïd, Guy Theraulaz, Stéphane Donikian, and Julien Pettré</i>	
A Quantitative Methodology to Evaluate Motion-Based Animation Techniques	377
<i>Gutemberg Guerra-Filho, George Raphael, and Venkat Devarajan</i>	
Parallelized Incomplete Poisson Preconditioner in Cloth Simulation	389
<i>Costas Sideris, Mubbasir Kapadia, and Petros Faloutsos</i>	
Walk This Way: A Lightweight, Data-Driven Walking Synthesis Algorithm	400
<i>Sean Curtis, Ming Lin, and Dinesh Manocha</i>	
Long Term Real Trajectory Reuse through Region Goal Satisfaction	412
<i>Junghyun Ahn, Stéphane Gobron, Quentin Silvestre, Horesh Ben Shitrit, Mirko Raca, Julien Pettré, Daniel Thalmann, Pascal Fua, and Ronan Boulic</i>	
Directional Constraint Enforcement for Fast Cloth Simulation	424
<i>Oktar Ozgen and Marcelo Kallmann</i>	
A Comparison and Evaluation of Motion Indexing Techniques	436
<i>Gutemberg Guerra-Filho and Harnish Bhatia</i>	
Detecting 3D Position and Orientation of a Wii Remote Using Webcams	448
<i>Jerry van den Heuvel and Jacco Bikker</i>	
Author Index	459
