

Contents

Introduction	1
1 Magnetic Properties of Colloidal Ferromagnetics	11
1.1 Magnetism of Small Particles	11
1.2 Magnetization of Single-Domain Particle Dispersions	14
1.3 Magnetization Kinetics of Colloidal Ferromagnetics	32
1.4 Particle Interactions and Magnetic Properties of Colloids	48
1.5 Dispersions of Ferromagnetic Particles in Liquid Crystals	61
2 Structure of Ferromagnetic Colloids	67
2.1 Stabilization of Colloids	67
2.2 Thermodynamics of Colloids and Magnetic Interactions	72
2.3 Periodic Structures of Ferromagnetic Colloids in Thin Layers	84
2.4 2-Dimensional Structures of Non-Magnetic Dispersions in Magnetic Fluids	94
2.5 Diffraction and Scattering of Light in Structured Colloids	100
2.6 Magneto-Optical Effects	104
2.7 Small-Angle Thermal Neutron Scattering	116
3 Models of Magnetizing Fluids	129
3.1 General Principles for Developing Models of Magnetizable Media	129
3.2 Selection and Appropriation of Magnetic Fluid Models by Statistical Modelling	141
3.3 Models of Magnetizable Fluids with Regard to Gyromagnetic Effects	156
4 Quasi-Equilibrium Hydrodynamics of Magnetic Fluids	163
4.1 Basic Equations	163
4.2 Levitation in Magnetic Fluids	169
4.3 Hydrostatics of a Magnetizable Fluid Drop	177
4.4 Structure of Magnetic Fluid Surface in a Vertical Magnetic Field	193
4.5 Parametric Oscillations of Free Surface of a Magnetic Fluid	200
4.6 Hydrodynamics of Magnetic Fluids in Thin Layers	206
4.7 Numerical Modelling of Two-Dimensional Hydrodynamics of Magnetic Fluid in Flat Gaps	230
5 Internal Rotations in Hydrodynamics of Magnetic Colloids	241
5.1 Magneto-Viscous Effect	241
5.2 Hydrodynamics of Magnetic Fluids in Rotating Fields	253
5.3 Rheology of Magnetic Colloids in a Field	277
6 Heat- and Mass-Transfer in Magnetic Fluids	289
6.1 Peculiarities of Thermal Processes in Magnetic Fluids	289
6.2 Thermomagnetic Convection	295
6.3 Heat-Transfer Characteristics in Magnetic Colloids and Suspensions	312
6.4 Mass-Transfer under Non-Stationary Diffusion in Magnetic Field	322
6.5 Magnetodiffusion Convection	332

XII Contents

7	Preparation of Magnetic Fluids	343
7.1	Preparation of Magnetic Fluids by Size Reduction	344
7.2	Preparation of Magnetic Fluids by Decomposing Carbonyls and Other Compounds	347
7.3	Preparation of Magnetic Fluids by Electrodeposition Technique	352
7.4	Preparation of Magnetic Colloids by Evaporation of Metal in a Liquid	356
7.5	Chemical Coprecipitation Technique	361
7.6	Method of Carrier Liquid Exchange	369
Appendix		
Distribution Function Moments of Particles in Orientation Space at Thermodynamic Equilibrium
