

2706-892 8

Gopal B. Saha

Fundamentals of Nuclear Pharmacy

Third Edition

With 102 Illustrations

Springer-Verlag

New York Berlin Heidelberg London Paris
Tokyo Hong Kong Barcelona Budapest

Contents

Preface	vii
<i>Chapter 1 The Atom</i>	1
Electronic Structure of the Atom	1
Chemical Bonds	3
Electrovalent or Ionic Bond	4
Covalent Bond	5
Coordinate Covalent Bond	5
Complex Formation	5
Structure of the Nucleus	6
Questions	10
Suggested Reading	10
<i>Chapter 2 Radioactive Decay</i>	11
Decay of Radionuclides	11
Alpha (α) Decay	11
Beta (β^-) Decay	12
Positron or (β^+) Decay	13
Electron Capture (EC)	14
Isomeric Transition (IT)	15
Radioactive Decay Equations	17
General Equation	17
Half-Life and Mean Life	18
Units of Radioactivity	20
Calculations	21
Successive Decay Equations	22
General Equation	22
Transient Equilibrium	22
Secular Equilibrium	24
Statistics of Counting	26
Error, Accuracy, and Precision	26
Standard Deviation	26
Standard Deviation of Count Rates	27

Propagation of Errors	28
Questions	28
Suggested Reading	30
Chapter 3 Instruments for Radiation Detection and Measurement	31
Gas-Filled Detectors	31
Dose Calibrators	31
Geiger-Müller Counters	33
Scintillation Detecting Instruments	34
Collimator	35
Detector	35
Photomultiplier Tube	36
Preamplifier	36
Linear Amplifier	36
Pulse Height Analyzer	37
Display or Storage	37
Scintillation Camera	38
Collimator	39
Detector	40
X,Y Positioning Circuit	40
Pulse Height Analyzer	41
Display or Storage	41
Tomographic Imagers	42
Single Photon Emission Computed Tomography	43
Positron Emission Tomography	44
Questions	45
Suggested Reading	45
Chapter 4 Production of Radionuclides	46
Cyclotron-Produced Radionuclides	47
Gallium-67	49
Iodine-123	49
Indium-111	50
Thallium-201	50
Short-Lived Radionuclides	50
Reactor-Produced Radionuclides	52
Fission or (n,f) Reaction	53
Iodine-131	54
Molybdenum-99	54
Neutron Capture or (n, γ) Reaction	54
Target and Its Processing	55
Equation for Production of Radionuclides	56
Specific Activity	58
Questions	63
Suggested Reading	63

<i>Chapter 5</i>	Radionuclide Generators	65
	Principles of a Generator	65
	Important Radionuclide Generators	68
	^{99}Mo – $^{99\text{m}}\text{Tc}$ Generator	68
	^{113}Sn – $^{113\text{m}}\text{In}$ Generator	76
	^{68}Ge – ^{68}Ga Generator	77
	^{82}Sr – ^{82}Rb Generator	77
	^{81}Rb – $^{81\text{m}}\text{Kr}$ Generator	77
	Questions	77
	References and Suggested Reading	78
<i>Chapter 6</i>	Radiopharmaceuticals and Methods of Radiolabeling	80
	Definition of a Radiopharmaceutical	80
	Ideal Radiopharmaceutical	81
	Easy Availability	81
	Short Effective Half-Life	81
	No Particle Emission	82
	Decay by Electron Capture or Isomeric Transition	82
	High Target-to-Non-target Activity Ratio	83
	Design of New Radiopharmaceuticals	84
	General Considerations	84
	Factors Influencing the Design of New Radiopharmaceuticals	85
	Methods of Radiolabeling	88
	Isotope Exchange Reactions	89
	Introduction of a Foreign Label	89
	Labeling with Bifunctional Chelates	90
	Biosynthesis	90
	Recoil Labeling	90
	Excitation Labeling	91
	Important Factors in Labeling	91
	Efficiency of the Labeling Process	91
	Chemical Stability of the Product	91
	Denaturation or Alteration	91
	Isotope Effect	92
	Carrier-Free or No-Carrier-Added (NCA) State	92
	Storage Conditions	92
	Specific Activity	92
	Radiolysis	92
	Purification and Analysis	93
	Shelf Life	93
	Specific Methods of Labeling	94
	Radioiodination	94
	Labeling with $^{99\text{m}}\text{Tc}$	98
	Structure of $^{99\text{m}}\text{Tc}$ -Complexes	102
	Kits for $^{99\text{m}}\text{Tc}$ -Labeling	104

Colloids and Labeled Particles	105
Additives and Preservatives	106
Questions	107
Suggested Reading	107
Chapter 7 Characteristics of Specific Radiopharmaceuticals	109
^{99m} Tc-Labeled Radiopharmaceuticals	109
^{99m} Tc-Labeled Human Serum Albumin	109
^{99m} Tc-Labeled Macroaggregated Albumin	110
^{99m} Tc-Labeled Albumin Microspheres	111
^{99m} Tc-Phosphonate or Phosphate Radiopharmaceuticals	112
^{99m} Tc-Sulfur Colloid	114
^{99m} Tc-Labeled Albumin Colloid	115
^{99m} Tc-Labeled Antimony Sulfur Colloid	115
^{99m} Tc Pentetate (DTPA)	116
^{99m} Tc-Labeled Red Blood Cells	116
^{99m} Tc-Labeled Iminodiacetic Acid Derivatives	118
^{99m} Tc-Hexamethylpropylene Amine Oxime	119
^{99m} Tc-Isonitriles	121
^{99m} Tc-Teboroxime	121
^{99m} Tc-Mercaptoacetylglycylglycylglycine (MAG3)	122
^{99m} Tc-Ethyl Cysteinate Dimer (ECD)	123
^{99m} Tc-Dimercaptosuccinic Acid (DMSA)	123
^{99m} Tc-Gluceptate	124
Other ^{99m} Tc-Labeled Radiopharmaceuticals	124
Radioiodinated Radiopharmaceuticals	124
¹³¹ I-Sodium Iodide	124
¹²³ I-Sodium Iodide	125
¹²⁵ I-Labeled Albumin	125
¹³¹ I-Rose Bengal	126
¹²³ I- or ¹³¹ I-Sodium Orthoiodohippurate	127
¹³¹ I-Labeled 19-Iodocholesterol and 6β-Iodomethyl-19-Norcholesterol	127
¹²³ I- or ¹³¹ I-Labeled Metaiodobenzylguanidine (MIBG)	128
¹²³ I-d,l-N-Isopropyl-p-Iodoamphetamine Hydrochloride (IMP)	128
¹²⁵ I-Labeled Fibrinogen	128
Miscellaneous Radiopharmaceuticals of Clinical Interest	129
⁷⁵ Se-Selenomethionine	129
¹¹¹ In- or ^{113m} In-DTPA	129
¹³³ Xe and ¹²⁷ Xe Gases	130
²⁰¹ Tl-Thallous Chloride	130
¹⁸ F-Fluorodeoxyglucose (FDG)	130
⁶⁷ Ga-Citrate	131
³² P-Sodium Phosphate	131

^{57}Co - or ^{58}Co -Cyanocobalamin	131
^{51}Cr -Labeled Red Blood Cells	132
Radiolabeled Leukocytes and Platelets	132
Radiolabeled Monoclonal Antibodies	135
Other Radiopharmaceuticals of Clinical Importance	140
Questions	140
References and Suggested Reading	141
Chapter 8 Quality Control of Radiopharmaceuticals	143
Physicochemical Tests	143
Physical Characteristics	143
pH and Ionic Strength	144
Radionuclidic Purity	145
Radiochemical Purity	146
Chemical Purity	157
Radioassay	158
Biological Tests	161
Sterility	161
Apyrogenicity	163
Toxicity	165
Record Keeping	166
Questions	166
Suggested Reading	167
Chapter 9 Nuclear Pharmacy	168
Concept	168
Design of a Nuclear Pharmacy	168
Operation of a Nuclear Pharmacy	172
Receiving and Monitoring of Radioactive Packages	172
Preparation of Radiopharmaceuticals	173
Quality Control of Radiopharmaceuticals	176
Storage	178
Dispensing	178
Radioactive Waste Disposal	180
Biological Waste Disposal	182
Centralized Nuclear Pharmacy	183
Questions	184
Suggested Reading	184
Chapter 10 Radiation Dosimetry, Protection, and Regulations ...	186
Radiation Units	186
Radiation Dosimetry	188
Radiation Dose in SI Units	191
Radiation Protection	192

Radiation Dose Limits	197
Principles of Radiation Protection	197
Personnel Monitoring	200
Dos and Don'ts in Radiation Protection Practice	202
Radiation Regulations	202
Food and Drug Administration	203
Nuclear Regulatory Commission	205
Department of Transportation (DOT)	213
Nuclear Pharmacies	214
Questions	216
Suggested Reading	217
<i>Chapter 11 In Vitro and In Vivo Nonimaging Tests</i>	219
Radioimmunoassay	219
Principle	219
Incubation	220
Separation of the Antibody–Antigen Complex	220
Method	220
Sensitivity and Specificity	222
Application	222
Schilling Test	223
Blood Volume	223
¹²⁵ I-Labeled Serum Albumin Method	223
⁵¹ Cr-Labeled Red Blood Cell Method	224
Application	224
Red Blood Cell Survival	225
Questions	226
Suggested Reading	226
<i>Chapter 12 Uses of Radiopharmaceuticals in Nuclear Medicine</i> ..	227
Central Nervous System	227
Anatomy and Physiology	227
Radiopharmaceuticals and Imaging Techniques	229
Diagnosis	236
Thyroid	237
Anatomy and Physiology	237
Radiopharmaceuticals and Imaging Techniques	239
Diagnosis	241
Lung	241
Anatomy and Physiology	241
Radiopharmaceuticals and Imaging Techniques	244
Diagnosis	250
Liver	251
Anatomy and Physiology	251

Radiopharmaceuticals and Imaging Techniques	252
Diagnosis	258
Spleen	259
Anatomy and Physiology	259
Radiopharmaceuticals and Imaging Techniques	259
Diagnosis	259
Pancreas	260
Anatomy and Physiology	260
Radiopharmaceuticals and Imaging Techniques	260
Diagnosis	261
Kidney	261
Anatomy and Physiology	261
Radiopharmaceuticals and Imaging Techniques	263
Diagnosis	271
Skeleton	271
Anatomy and Physiology	271
Radiopharmaceuticals and Imaging Techniques	271
Diagnosis	272
Bone Marrow	273
Anatomy and Physiology	273
Radiopharmaceuticals and Imaging Techniques	275
Diagnosis	275
Heart	275
Anatomy and Physiology	275
Radiopharmaceuticals and Imaging Techniques	277
Diagnosis	288
Miscellaneous Imaging Procedures	289
Adrenal Gland Imaging	289
Tumor Imaging	290
Thrombus Detection	292
Lymphoscintigraphy	293
Gastric Emptying	294
Meckel's Diverticulum Imaging	295
Gastrointestinal Bleeding Detection	295
Inflammatory Disease and Infection Imaging	296
Radionuclide Therapy	297
Hyperthyroidism and Thyroid Cancer	297
Polycythemia Vera and Leukemia	298
Malignant Effusion in Pleural and Peritoneal Cavities	298
Adverse Reactions to Radiopharmaceuticals	298
Iatrogenic Alterations in the Biodistribution of Radiopharmaceuticals	300
Questions	300
References and Suggested Reading	302

Appendix A	Abbreviations Used in Text	305
Appendix B	Terms Used in Text	307
Appendix C	Units and Constants	313
Appendix D	Radioactive Decay of ^{99m}Tc	315
Appendix E	Radioactive Decay of ^{131}I	316
Appendix F	Answers to Questions	317
Index		319
