1 WHY USE DELPHI 3?	1
Introduction	1
What this book covers	2
Getting started	2
What computer you need to run Delphi 3.....	3
What's new in Delphi 3.....	3
Converting from Delphi 2 to Delphi 3.....	4
Conventions	4
 2 THE DELPHI ENVIRONMENT	 5
Introduction	5
Running Delphi	5
The Delphi Environment	7
The design form.....	8
The Component Palette	9
The Object Inspector	10
The unit window.....	11
The menu.....	11
The SpeedBar	12
Finding windows	12
 3 THE STANDARD COMPONENT PALETTE.....	 13
Introduction	13
Event Driven Software	13
Changing component properties.....	14
The Label component.....	16
The Edit component	16
The Memo component.....	17
The Button component	18
The CheckBox component	19
The RadioButton component.....	20
The ListBox component	20
The ComboBox component.....	21
The ScrollBar component.....	22
The GroupBox and RadioGroup components	23
The Panel component	23
MainMenu and PopupMenu	24
Using the components	24

4 USING THE STANDARD COMPONENTS	25
Introduction	25
The Changeling application	25
Creating the user interface	26
Adding the Memo and Panel components	27
Adding the ListBox and ComboBox components	27
Adding the RadioButtons	27
Completing the user interface	28
Changing the text colour	29
Changing the background colour	31
Changing the text size	31
Changing the font	32
Italicising the text and closing the application	33
The completed code	33
An easier technique	35
 5 THE ADDITIONAL COMPONENT PALETTE.....	 37
Introduction	37
The BitBtn component	37
The SpeedButton component	38
The MaskEdit component	39
The StringGrid component	41
The DrawGrid component	42
The Image component	43
The Shape component	43
The Bevel component	44
The ScrollBox component	45
The CheckListBox component	46
The Splitter component	46
The StaticText component	47
The Chart component	47
 6 DISPLAYING AND READING TEXT	 51
Introduction	51
The ShowMessage procedure	51
The MessageDlg function	52
What button was pressed?	53
Creating input forms	54
Standard dialog boxes	55
Displaying dates and times	57
Displaying numbers	59

7 USING FORMS	61
Introduction	61
Creating new forms	61
Finding forms	63
Modal and modeless forms.....	63
Displaying forms	64
Unit files	65
The Dialogs page.....	68
The OpenFileDialog component.....	68
The SaveDialog component	70
The OpenPictureDialog component	70
The SavePictureDialog component	71
The FontDialog component.....	71
The ColorDialog component	72
The PrintDialog component	73
The PrinterSetupDialog component	74
The FindDialog component.....	74
The ReplaceDialog component	75
SDI and MDI forms.....	75
Creating parent and child forms	76
Displaying child forms	76
Closing child forms	77
Arranging forms	78
The Object Repository.....	78
 8 OBJECT PASCAL	 80
Introduction	80
Standard data types.....	80
Declaring variables.....	82
Declaring constants	82
Converting between types	82
Operators	85
Bitwise operators	86
Controlling program flow.....	87
If then else statements.....	87
Case statements.....	89
Repeat statements	90
While statements.....	92
For statements.....	92
Calling procedures and functions	93
Passing by value and address.....	94
Using functions.....	95

Data aware components	164
15 FIXING BUGS	165
Introduction	165
Types of errors	165
Code Insight	166
Run-time errors	168
Logic errors	169
Stopping the application	170
Using breakpoints	171
Restarting after breakpoints	171
Viewing breakpoints	171
Stepping	172
The Debug toolbar	172
Viewing data	173
Conditional breakpoints	174
Using watchpoints	174
Pausing programs	175
16 THE VISUAL COMPONENT LIBRARY	176
Introduction	176
The Win32 page	177
The System page	178
The Internet page	179
The Data Access page	179
Data Controls page	180
The Dialogs page	181
The Win 3.1 page	182
INDEX	188
