

TABLE OF CONTENTS

CHAPTER I

Introduction.	1
The algebraic structure of the space of states.	4
The topological structure of the space of states.	9
The conjugate space of Φ .	18
Generalized eigenvectors and the nuclear spectral theorem.	22
A remark concerning generalization.	31
References on Chapter I.	33

CHAPTER II

Introduction.	35
The Moller wave operators.	38
The Hardy class functions on a half plane.	40
References for Chapter II.	51

CHAPTER III

Rigged Hilbert Spaces of Hardy class functions.	53
The spaces Φ^+ and Φ^- .	61
Functionals for H_0 and H_1 .	63
References for Chapter III.	70

CHAPTER IV

The RHS model for decaying states.	71
Dynamical semigroups.	79
Virtual states.	91
References for Chapter IV.	97
APPENDICES.	99
FIGURES.	113
