Anderson Localization: An Introduction By H. Fukuyama and T. Ando	1
--	---

Part I	The Metal-Insulator Transition in Doped Semiconductors
---------------	---

Critical Behavior Near the Metal-Insulator Transition in Doped Semiconductors. By W. Sasaki (With 4 Figures)	10
Anomalous Spin Susceptibility of Si:P Near the Metal-Insulator Transition. By S. Ikehata (With 5 Figures)	18
Static Magnetic Susceptibility of Si:P Around the Metal-Insulator Transition. By Y. Ootuka and N. Matsunaga (With 4 Figures)	24
NMR in Doped Semiconductors. By D.P. Tunstall (With 2 Figures)	28
Magnetic-Field-Induced Metal-Insulator Transition in Degenerately Doped n -Type Ge. By R.M. Westervelt, M.J. Burns, P.F. Hopkins, A.J. Rimberg, and G.A. Thomas (With 4 Figures)	33
The Metal-Insulator Transition in Ge:Sb By Y. Ootuka, H. Matsuoka, and S. Kobayashi (With 3 Figures) . . .	40
The Metal-Insulator Transition in a Persistent Photoconductor By S. Katsumoto (With 6 Figures)	45
The Impurity Band Nature of the Metal-Insulator Transition in GaAs By D. Romero, Ming-Way Lee, H.D. Drew, M. Shayegan, and B.S. Elman (With 3 Figures)	53

Part II	The Metal-Insulator Transition in Metals
----------------	---

Interaction Effects Near the Metal-Insulator Transition in Semimagnetic Semiconductors. By T. Dietl, M. Sawicki, T. Wojtowicz, J. Jaroszyński, W. Plesiewicz, L. Świerkowski, and J. Kossut (With 6 Figures)	58
Monotonic Increase of Magnetoresistance in Amorphous $\text{Mo}_x\text{Ge}_{1-x}$ Through the Metal-Insulator Transition. By S. Yoshizumi, T.H. Geballe, M. Kunchur, and W.L. McLean (With 2 Figures) . . .	67

Universal Behavior of Hall Conductivity Near the Metal-Insulator Transition in Disordered Systems By M. Rohde and H. Micklitz (With 2 Figures)	70
A Strong Voltage Dependence of the Conductivity in Granular Aluminum. By A.J.G. Schellingerhout, H.M. Appelboom, J.A. Kokkedee, J.E. Mooij, and T.M. Klapwijk (With 4 Figures) . . .	74
The Metal-Insulator Transition in Disordered Metals By S. Okuma, F. Komori, and S. Kobayashi (With 3 Figures)	78

Part III	Theory of the Metal-Insulator Transition
-----------------	---

Numerical Studies of Anderson Localization By B. Kramer (With 3 Figures)	84
Critical Behaviour Near the Metal-Insulator Transition By M. Schreiber and B. Kramer (With 3 Figures)	92
Renormalized Fermi Liquid Theory for Disordered Electron Systems and the Metal-Insulator Transition By C. Di Castro (With 4 Figures)	96
Landau Fermi Liquid Theory for Disordered Systems and the Scaling Theory of the Metal-Insulator Transition By G. Kotliar (With 2 Figures)	107
Thermal Properties of Disordered Interacting Electronic Systems Near the Metal-Insulator Transition By C. Castellani, C. Di Castro, and G. Strinati (With 1 Figure) . . .	115
On the Universality of the Metal-Insulator Transition of Interacting Electrons. By A. Kawabata	119
Localization Properties and Parameters of a-SiSn:H and a-GeSn:H Alloys. By A.D. Zdetsis (With 3 Figures)	126
Quantum Disordered Spin Models and Bose Condensation By J.M.F. Gunn and M.A. Brackstone	130

Part IV	Weak Localization Effects in Metals
----------------	--

The Physical Interpretation of the Interaction Effect By G. Bergmann (With 4 Figures)	136
Nonuniversality of the Mooij Correlation By C.C. Tsuei (With 2 Figures)	143
Spin-Glass Transition and Resonant Kondo Scattering in Weakly Localized Metal Films. By C. Van Haesendonck, J. Vranken, and Y. Bruynseraede (With 8 Figures)	151

Effect of an AC Electric Field on Localization in Thin Metal Films By J. Liu and N. Giordano (With 2 Figures)	159
Transition from Strong to Weak Localization in Ultrathin Pd Films By J. Kästner and H. v. Löhneysen (With 3 Figures)	164
Electron Transport Properties of a 100 Å Crystalline $\text{In}_2\text{O}_{3-x}$ Film By M. Ben-Shlomo and R. Rosenbaum (With 5 Figures)	168
Electron Localization in Heavily Doped Polyacetylene By F. Komori, F. Okamoto, and S. Ikehata (With 2 Figures)	174
Low Temperature Limit of Quantum Corrections to the Transport Properties of a Disordered CuTi Alloy By P. Lindqvist and Ö. Rapp (With 3 Figures)	179
Localization of Electrons and Inelastic Relaxation Time in Metal Films By Y.F. Komnik, E.I. Bukhshtab, and A.V. Butenko (With 1 Figure)	183
Thermoelectric Power and Coulomb Gap in Inhomogeneous Thin Bismuth Films By J.J. Lin, J.L. Cohn, and C. Uher (With 2 Figures)	186
Comparison of Localization Effects in Granular Magnesium and Granular Aluminum. Superlocalization? By M. Kunchur, P. Lindenfeld, and W.L. McLean (With 3 Figures)	190
Analysis of Magnetoresistance Data on Aluminum. By J. Romijn, J.G.F. Kablau, T.M. Klapwijk, and J.E. Mooij (With 1 Figure)	194
Electron-Phonon Scattering Rates in Dirty Three-Dimensional Aluminum Films. By J. Romijn, R.M.G. Boesten, T.M. Klapwijk, and J.E. Mooij (With 2 Figures)	198
Superconducting Fluctuations and Localization in Two-Dimensional Al-Ge. By L.R. Tessler and G. Deutscher (With 2 Figures)	203
Electron Inelastic Scattering and the Upper Critical Field in Thin Nb Films and Wires By M. Hikita, Y. Tajima, and T. Tamamura (With 4 Figures)	207

Part V	Weak Localization Effects: Space-Charge Layers
---------------	---

Higher Subband Effect on the Spin-Orbit Interaction in a 2D System in InAs n-Inversion Layers By Y. Kawaguchi, I. Takayanagi, and S. Kawaji (With 2 Figures)	214
Magnetotransport Studies of Localization and Interaction Effects in HgCdTe Two-Dimensional Electron Gas. By E.C. Palm, P.S. Kobiela, W.P. Kirk, R.A. Schiebel, and M.A. Reed (With 2 Figures)	218

Localization and Proximity Effect in InAs Inversion Layer Coupled Superconducting Junction By J. Nitta and T. Kawakami (With 5 Figures)	223
---	-----

Part VI	Theory of Weak Localization Effects
----------------	--

The Temperature of the Superconducting Transition in Amorphous Films. By A.M. Finkel'stein (With 2 Figures)	230
Magnetic Exchange in Disordered Metals By E. Abrahams, A. Jagannathan, and M.J. Stephen	234
The Kondo Effect in the Weakly Localized Regime By S. Suga, H. Kasai, and A. Okiji (With 3 Figures)	238

Part VII	The Quantum Hall Effect and Localization in High Magnetic Fields
-----------------	---

Recent Experiments on the Fractional Quantum Hall Effect By D.C. Tsui, H.L. Störmer, and R. Willett (With 3 Figures)	244
Numerical Study of Localization in 2D Systems: Effects of Magnetic Field and Spin-Orbit Interaction By T. Ando (With 6 Figures)	252
Edge and Bulk Extended States in Two-Dimensional Disordered Electronic Systems in Strong Magnetic Fields By T. Ohtsuki and Y. Ono (With 1 Figure)	260
On the Absence of a Quantum Electrodynamical Correction to the Quantum Hall Effect. By K. Ishikawa and T. Matsuyama	264
Degenerate Ground State for the Fractional Quantum Hall Effect By K. Takano and A. Isihara (With 2 Figures)	268
Conductivity of Band Electrons in a Magnetic Field By I. Sadakata (With 2 Figures)	273
Magnetic Field and Electronic States in Modulation-Doped Heterostructures. By Shi-jie Xiong (With 2 Figures)	277

Part VIII	Quasicrystals
------------------	----------------------

The Localization Problem in Low-Dimensional Quasicrystals By M. Kohmoto (With 6 Figures)	282
Power-Law Conductance of a Fibonacci Lattice By M. Goda (With 2 Figures)	290

Presence of Diffusion in Certain One-Dimensional Random Lattices By K. Kawamura, M. Hibino, K. Kawase, and K. Goto (With 3 Figures)	294
---	-----

Part IX	Mesoscopic Systems: Theory
----------------	-----------------------------------

Statistics of Mesoscopic Fluctuations and Electric Current Relaxation in Disordered Conductors By B.L. Altshuler, V.E. Kravtsov, and I.V. Lerner	300
Universal Conductance Fluctuations, Random Matrix Theory and the Scaling Theory of Localization By A.D. Stone, K.A. Muttalib, and J.-L. Pichard (With 2 Figures) . .	315
Nonlinear Effects in Mesoscopic Kinetics of Microjunctions By D.E. Khmelnitskii (With 1 Figure)	323
Asymmetry of Magnetoresistance in Microstructures By Y. Isawa, H. Ebisawa, and S. Maekawa (With 4 Figures)	329
Magnetoconductance of Mesoscopic Systems By A. Sawada, K. Tankei, and Y. Nagaoka (With 4 Figures)	333

Part X	Mesoscopic Systems: Experiments
---------------	--

Localization and Interference in Small Systems By D.E. Prober, S. Wind, and V. Chandrasekhar (With 5 Figures) . .	338
Four-Wire Measurement of Conductance Fluctuations in Small Systems. By A. Benoit, S. Washburn, C.P. Umbach, R.A. Webb, D. Mailly, and L. Dumoulin (With 3 Figures)	346
Universal Conductance Fluctuations in Mesoscopic n^+ -Si Wires By K. Itoh, Y. Sasaki, S. Tanuma, Y. Iye, and T. Tamegai (With 8 Figures)	352
Aharonov-Bohm Magnetoresistance Oscillations in Selectively Doped GaAs/AlGaAs Submicron Structures By K. Ishibashi, Y. Takagaki, K. Gamo, S. Namba, S. Ishida, K. Murase, Y. Aoyagi, and M. Kawabe (With 3 Figures)	360
Conductance Fluctuations with Variations of Electron Density in Inversion Layers of Silicon. By J. Kinoshita, K. Inagaki, C. Yamanouchi, K. Yoshihiro, J. Wakabayashi, and S. Kawaji (With 5 Figures)	365
Quantum Transport in Disordered Surfaces in Doped Silicon Near the Metal-Insulator Transition. By Y. Ochiai (With 3 Figures)	370
Index of Contributors	375
