

Table of Contents

1	Introduction	1
1.1	ESWT in Orthopedics	2
2	Introduction to Physical Principles of Shock Waves	4
2.1	Discovery of Shock Wave Applications in Medicine	4
2.2	Wave Patterns	4
2.3	Shock Wave Generation Systems	5
2.4	Technology of Shock Wave Generation	5
2.5	Dornier Electromagnetic Shock Wave Emitter (EMSE)	5
2.6	Properties of Shock Waves	7
2.7	Shock Wave Focus	8
2.8	Pressure Field	8
2.9	Energy Flux Density and Effective Focal Energy	9
2.10	Aperture Angle	10
2.11	Cavitation	11
2.12	Measuring Methods	12
2.13	Biological Effects of ESWT	13
3	Extracorporeal Shock Wave Therapy Systems	14
3.1	Components of a Typical ESWT System	14
3.2	Targeting Aids for Localization using Patient Feedback	14
3.3	Localization Systems	15
3.3.1	Ultrasound	15
3.3.2	Isocentric X-ray System	17
3.3.3	Dual Imaging	19
3.3.4	Comparison Ultrasound / X-ray Systems	20
4	Orthopedic Shock Wave Therapy	21
4.1	Energy Levels	21
4.2	Action Mechanism of Shock Wave Therapy	22
4.2.1	Structural Damage	22

4.2.2	Analgesic Effect	22
4.2.3	Stimulation of Metabolic Reactions	23
4.2.4	Effects of Shock Waves on the Musculoskeletal System . .	24
4.3	Orthopedic Indications for Shock Wave Therapy	24
4.3.1	Standard Indications	24
4.3.2	Clinical Trials	24
4.4	Contraindications	24
4.5	Patient Information	25
5	Localization Techniques	27
5.1	Patient Feedback	27
5.2	Ultrasound	28
5.3	X-ray	28
5.4	Dual Imaging	29
5.5	Comparison of Imaging Procedures	30
6	Application Techniques	31
6.1	Tangential Coupling	31
6.1.1	Two Point Method (TPM)	31
6.2	Direct Coupling	35
6.2.1	One Point Method (OPM)	36
7	Ultrasound Examination – Standard Ultrasound Cross Sectional Planes (DEGUM Recommendations)	37
7.1	Introduction	37
7.2	Safety Aspects, Advantages and Disadvantages of Ultrasound Examinations	37
7.3	Technical and Physical Principles of Ultrasound Examinations	38
7.4	Configuration of Ultrasound Systems	40
7.5	Transducers, Imaging	41
7.6	Stand-offs	43
7.7	Artifacts and Phenomena	44
7.8	Important Basic Ultrasound Terms	47
7.9	Special System Adjustments and Problems of Ultrasound Examinations of the Musculoskeletal System	48
7.10	DEGUM Guidelines for Documentation and Evaluation . .	49
7.11	Typical Ultrasound Presentation of Selected Tissue Structures	51

8	Shoulder	56
8.1	Anatomy and Pathology of the Periarticular Structures of the Shoulder	56
8.2	Standard Ultrasound Examination of the Shoulder	57
8.2.1	Typical Indications and Findings	57
8.2.2	Examination	57
8.2.3	Standard Sectional Planes	58
	1) Dorsal Region – Transverse Sectional Plane	59
	2) Dorsal Region – Longitudinal Sectional Plane	60
	3) Lateral Superior Region – Transverse Sectional Plane	61
	4) Lateral Superior Region – Longitudinal Plane	62
	5) Ventral Region – Transverse Sectional Plane	63
	6) Ventral Region – Longitudinal Sectional Plane	64
8.3	Calcific Tendinitis	65
8.3.1	Definition	65
8.3.2	Pathology	65
8.3.3	Clinical Diagnosis	66
8.3.4	X-ray	68
8.3.5	Ultrasound	68
8.3.6	Conservative and Surgical Therapy	69
8.3.7	ESWT	70
	1) Prerequisites	70
	2) Anesthesia	70
	3) Positioning and Localization	70
	4) Coupling	73
	5) Treatment Regimen	73
8.4	Results	75
9	Elbow	77
9.1	Standard Ultrasound Examinations of the Elbow	77
9.1.1	Indications and Findings	77
9.1.2	Examination	77
9.1.3	Standard Sectional Planes	78
	1) Ventral Region – Transverse Sectional Plane	79
	2) Ventral Region – Humero Radial Longitudinal Plane	80
	3) Ventral Region – Humero Ulnar Longitudinal Plane	81
	4) Dorsal Region – Transverse Sectional Plane	82
	5) Dorsal Region – Longitudinal Sectional Plane	83
9.2	Lateral Epicondylitis (Tennis elbow)	84
9.2.1	Definition	84
9.2.2	Pathology	84
9.2.3	Clinical Diagnosis	85
9.2.4	Conservative and Surgical Therapy	85
9.2.5	ESWT	85

1) Prerequisites	85
2) Anesthesia	86
3) Positioning and Localization	86
4) Coupling	89
5) Treatment Regimen	90
9.3 Medial Epicondylitis (Golfer's Elbow)	91
9.3.1 Definition	91
9.3.2 Pathology	91
9.3.3 Clinical Diagnosis	91
9.3.4 Conservative and Surgical Therapy	92
9.3.5 ESWT	92
1) Prerequisites	92
2) Anesthesia	92
3) Positioning and Localization	92
4) Coupling	95
5) Treatment Regimen	96
9.4 Results	97
10 Foot and Ankle Joint	99
10.1 Standard Ultrasound Sectional Planes of the Ankle Joint and Foot	99
10.1.1 Standard Indications and Findings	99
10.1.2 Examination	100
10.1.3 Standard Sectional Planes	100
1) Ventral Region – Transverse Sectional Plane	101
2) Ventral Region – Longitudinal Sectional Plane	102
3) Lateral Region – Diagonal Sectional Plane	103
4) Dorsal Region – Transverse Sectional Plane	104
5) Dorsal Region – Longitudinal Sectional Plane	105
6) Plantar Region – Transverse Sectional Plane	106
7) Plantar Region – Longitudinal Sectional Plane	107
10.2 Plantar Fasciitis (Plantar Heel Spur)	108
10.2.1 Definition	108
10.2.2 Pathology	108
10.2.3 Clinical Diagnosis	108
10.2.4 Conservative Therapy and Surgical Treatment	110
10.2.5 ESWT	110
1) Prerequisites	110
2) Anesthesia	110
3) Positioning and Localization	111
4) Coupling	114
5) Treatment Regimen	117
10.3 Results	117

11 Pseudarthrosis	119
11.1 Definition	119
11.2 Pathology	119
11.3 Clinical Diagnosis	119
11.4 Conservative and Surgical Therapy	119
11.5 ESWT	120
1) Prerequisites	120
2) Anesthesia	120
3) Positioning and Localization	120
4) Coupling	120
5) Treatment Regimen	121
11.6 Results	121
 12 Additional Literature on ESWT of the Musculoskeletal System	 123
 13 Additional Literature, Video Tapes and CD-ROMs on Ultrasound Examination of the Musculoskeletal System	 129
 Subject Index	 133
